OUR PRODUCTS

Pocket Filters

The Filter Plus product range includes synthetic fabric bag filters designed specially to meet the ISO 16890 standard.

We can offer filters with very different characteristics according to your preferences and needs. Our product range focuses on filters with the lowest initial pressure drop and maximum particulate removal efficiency.

Our filters keep your device maintenance costs and electricity bills in check. By investing in a high-quality filter with low pressure loss, you can save significantly on energy costs.

The optimal energy consumption of our filters is very important for us. Therefore, the filters you find in our product range only have energy labels from A+ to B.

OUR PRODUCTS

Panel filter

Filter Plus offers a wide range of synthetic and fibreglass panel filters, all of which comply with ISO 16890.

Using only the best fabrics, we can offer minimal initial pressure drop and high particulate removal efficiency. This ensures that our filters are very energy efficient. The Filter Plus product range includes the following efficiency classes for panel filters:

- ISO Coarse – ISO ePM10 / G4–M5
- ISO ePM10 – ISO ePM1 / M5–F9

The standard thicknesses for Filter Plus plastic-metal frames are 25, 48 and 98 mm.
