

Data Logger Systems

Flexible Solutions

To Fit Individual Needs

30 Years of Data Logging Experience

Individual solutions
flexible and
economic

Easy to install:
small, robust,
wireless

Sensors for
multiple
parameters

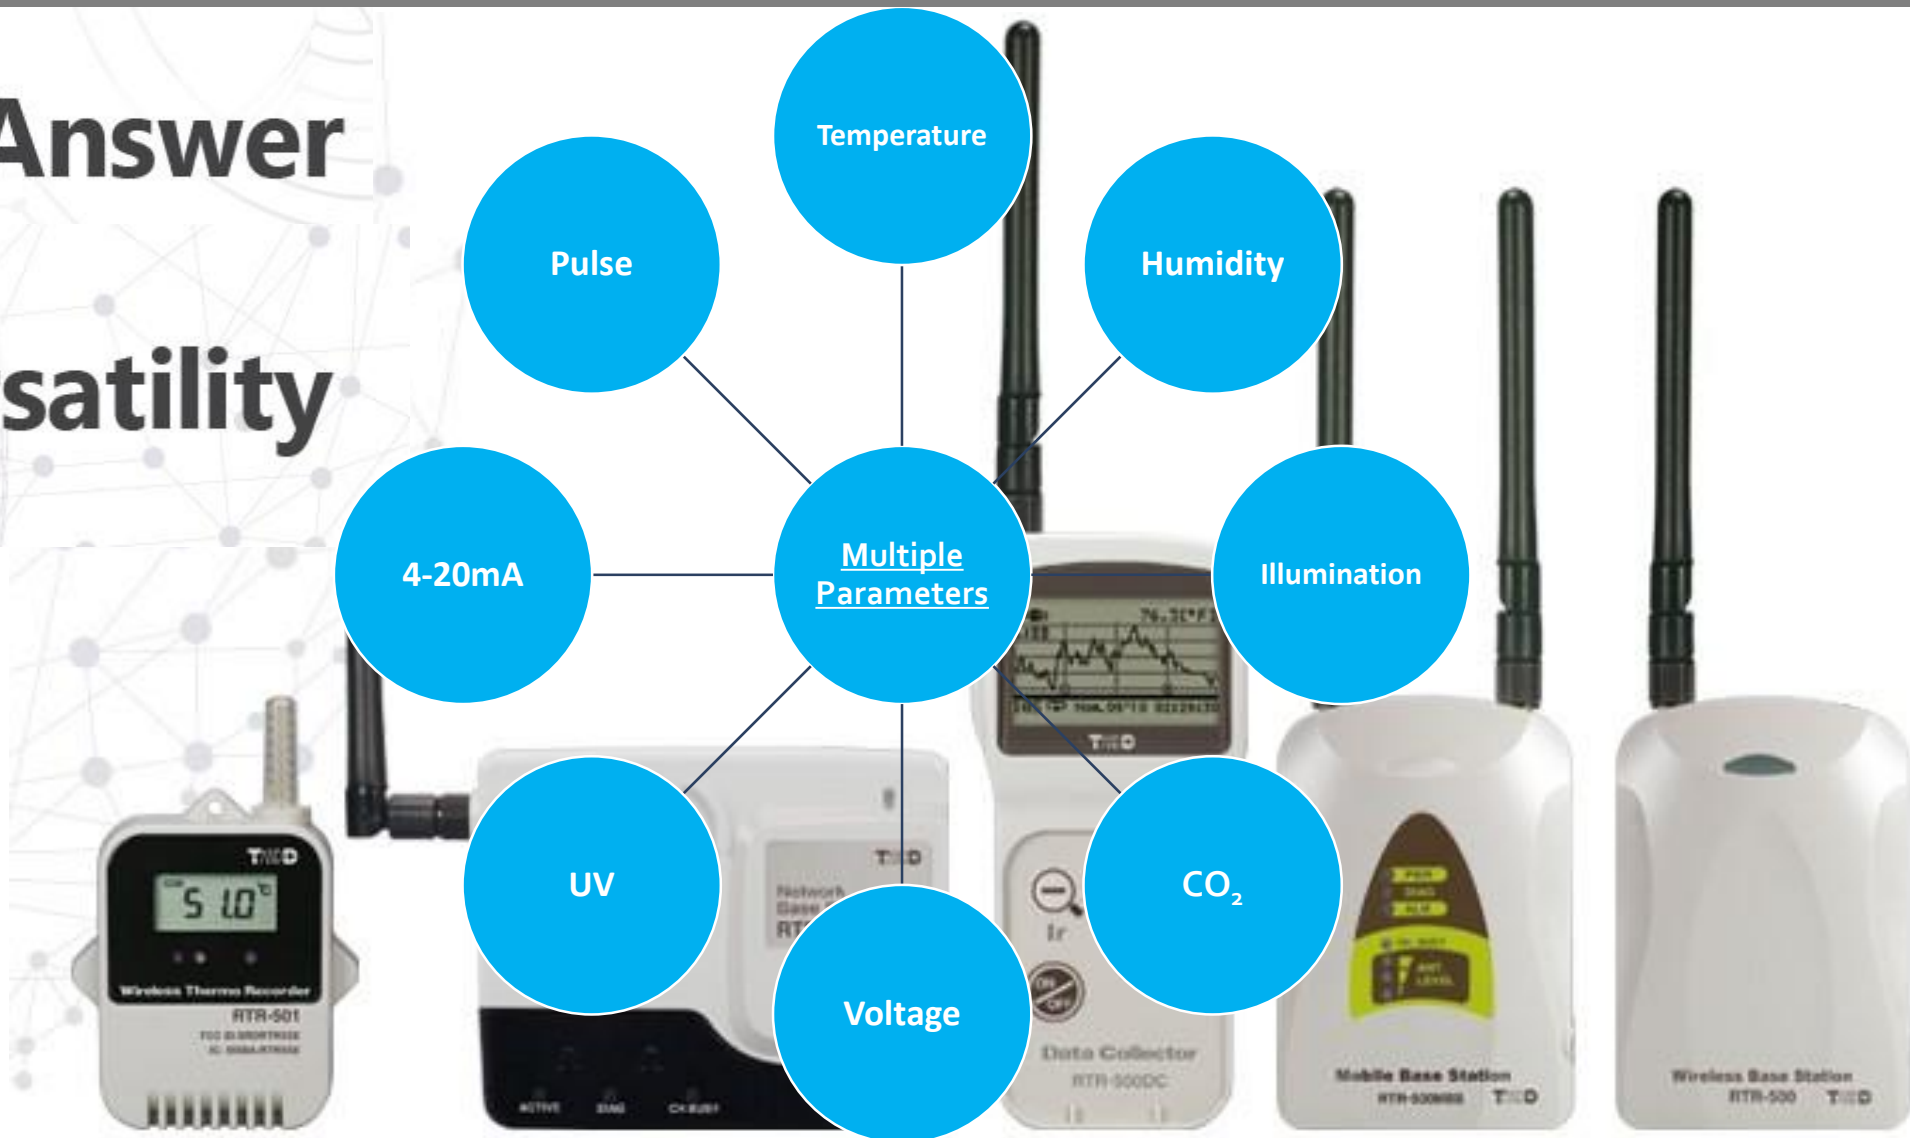

Convenient
Cloud Computing

Alarm function
supports
compliance with
legal regulations

Error-free
automatic
documentation

Faultless Monitoring – Constant Documentation

**The Answer
is Versatility**

Versatile Fields of Application

Agricultural and
Environmental Monitoring

Storage

Moving Objects

Food and Pharma Handling

Facility
Management

RTR-500 Series Wireless Data Logging System

Modular components for every task: Wireless data loggers, devices for communication and data collection as well as cloud services and software

TR-7wb/nw Series stand-alone dataloggers

Economic solutions with Bluetooth function and LAN communication
loggers for temperatur/humidity built for Cloud Storage

TR-7wb/nw Series

For Easy Worldwide
Access and Notification

TR-4 Series Bluetooth 4.0 dataloggers

Smart Solution for maximum flexibility:
Real-time cloud monitoring via smart devices and app

Get Smart...
Get Loggers
for Smart Phones!

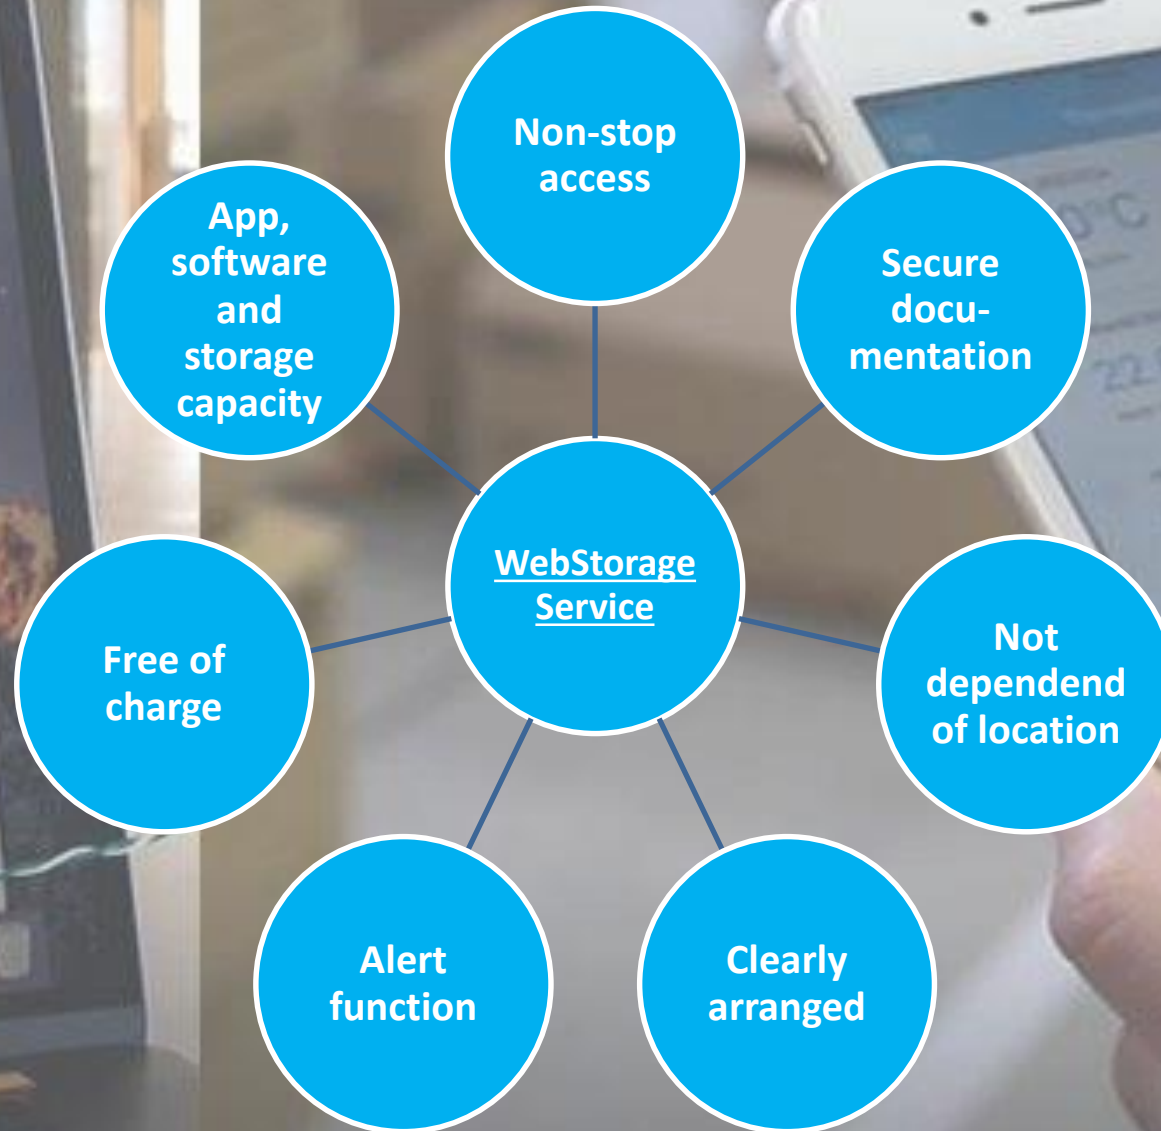

T&D WebStorage Service

Real-time monitoring with free of charge cloud and software

Let the cloud work for you
