

A stylized map of Europe in shades of blue serves as the background for the lower half of the page. Overlaid on the map is a network diagram consisting of a central bright white point from which numerous white curved lines radiate outwards to various locations across the continent. Each of these lines terminates at a small white hexagonal icon, representing a distribution point or customer location.

Let experience work for you!

Focussing on Competence.

Since the year 2000 when it was founded, MY-CHEM has become successfully established at the interface between producers of chemical raw materials and the processing industry. Our key strategy is working with selected products only once we are thoroughly familiar with them. Thus our comprehensive knowledge of those products is naturally superior to that of most full-range competitors.

For our business partners in Germany and abroad, this means:

MY-CHEM can do more for you: We deliver maximum quality standards, whether it comes to sourcing, distribution, trading, complex logistic chains or sophisticated service packages.

MY-CHEM stands for expertise, flexibility, safety and reliability.

Delivering highest quality.

The comprehensive MY-CHEM quality service is currently available for the following products:

Styrene

Talloil Products

Pentaerythritol

Di-Pentaerythritol

Trimellitic Anhydride (TMA)

Maleic Anhydride (MA)

Methylated Melamine Formaldehyde resins

Purified Isophthalic Acid (PIA)

Phthalic Anhydride (PA)

Purified Terephthalic Acid (PTA)

Heat Transfer Fluids (HTF)

Silicate Dispersions

Paraformaldehyde

Glycols
