ARE YOU DIALED IN?

THE MOST ADVANCED MOVEABLE WEIGHT TECHNOLOGY IN THE WORLD

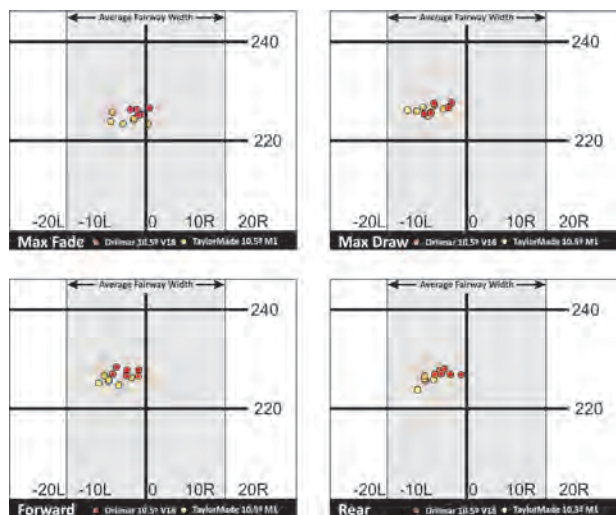

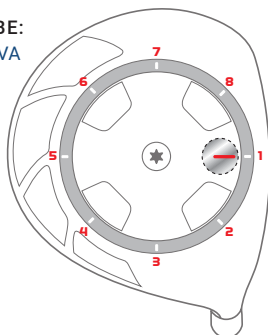

V18 360° ADJUSTABLE WEIGHT DRIVER

The Orlimar V18 Driver could be the most advanced movable weight system you've ever seen. Not one track or two tracks of movement, but a full 360 degrees of weight adjusting freedom around the entire sole's perimeter. The never-before-seen D.I.A.L. (Diametrically Adjustable Launch) technology allows you to rotate sole weighting 360 degrees in one of 8 preset locations for tour level fitting.

SEE THE V18 DRIVER IN ACTION ON YOUTUBE:
<https://www.youtube.com/watch?v=zF1rykQQGVA>

A FULL 360° OF ADJUSTABILITY

POSITION	RESULT / CORRECTION
1	Lower flight and less spin
2	Low draw
3	Maximum draw
4	High draw
5	Higher flight, greatest forgiveness
6	High fade
7	Maximum fade
8	Low fade

*Based on independent testing by Golf Laboratories, Inc.

INCLUDES V18 HEADCOVER

TRIMETAL IS BACK AND BETTER THAN EVER!

HIGHER, LONGER, MORE ACCURATE

TRIMETAL FAIRWAY WOOD & HYBRID

TriMetal comprises of 3 distinct metals: High-strength S450 stainless steel encompasses the body including the ultra-thin face - as low as 2.0mm on the variable face design - to maximize ball speed and distance. The sole is constructed of 17-4 stainless steel that is vacuum cast for strength and superior weight distribution, while the 10-gram tungsten screw is positioned strategically for pinpoint accuracy. The low-profile design launches the ball effortlessly from the tightest of lies.

STRAIGHTEN UP

THE ULTIMATE SLICE PREVENTION DRIVER

SLICE KILLER OFFSET TITANIUM DRIVER

The Orlimar Slice Killer will eliminate the slice in virtually any swing! Featuring an extreme 7° closed face, combined with an offset hosel in either 10.5° or 12.5° of loft. A 460cc 6-4 titanium body means longer, higher, straighter drives for even the biggest slicers. In an all-black PVD finish and cutting edge modern design.

ONE LENGTH ONE SWING

GET MORE CONSISTENT WITH
INTERCEPT SINGLE LENGTH IRONS

INTERCEPT SINGLE LENGTH IRONS

The Orlimar Intercept irons are all about developing consistency. By being all the same length, lie, balance and weight as a 7-iron, there is no need to change your posture, stance or ball position so you only have one thought process for every swing with your irons and wedges. Game improvement features include enhanced perimeter weighting by focusing weight where it is needed for golfers to experience a more solid feel and with precision accuracy. Flex-Face Technology in the #5 and 6-irons help boost distance and ensure proper distance gaps and trajectories throughout the set.

ASSEMBLED GOLF CLUB

OR023655 RH #5-9, PW, GW Stiff Flex (sold full set only)

OR023648 RH #5-9, PW, GW Regular Flex (sold full set only)

Head Material: Stainless Steel

Shaft: Orlimar 95 Steel

Grip: Orlimar Custom Velvet

Each club features the same length, lie, and headweight to allow for swing consistency. Different lofts and face thicknesses ensure proper distance gaps.

A typical iron set requires different swings for each club.

Intercept uses the same swing throughout the set, resulting in greater consistency.

EASY PEASY

WITH THE ULTRA FORGIVING ORLIMAR STRATOS HYBRID IRON

STRATOS HYBRID IRON **NEW**

The Orlimar Stratos irons are cross between a hybrid and a hollow-bodied iron for maximum game-improvement performance. Designed for the weekend warrior seeking added distance and more solid contact at impact, the Stratos features a variable sole width proving more assistance in the longer clubs where it is needed most and transitioning to scoring clubs that look more traditional at address. The thin, variable thickness cup-face construction allows the face to flex to boost both ball speed and maximize distance.

Head Material: Stainless Steel

Shaft: Orlimar Custom Graphite

Grip: Orlimar Custom Velvet

THE ESCAPE SUPER GAME
IMPROVEMENT CLUBS

ESCAPE FAIRWAY WOODS & HYBRIDS

The Orlimar Escape may be some of the easiest to hit clubs ever produced. The Escape fairways are specifically designed with a shallow face height and very low center of gravity to launch the ball high and land the ball softly from a wide range of distances and ground conditions. The Escape hybrid irons are a perfect replacement for those who have trouble with conventional irons.

SPIN IT TO WIN IT

STOP IT ON A DIME WITH THE ST2 AND SPIN TECH WEDGE

ST2 WEDGE

The Orlimar ST2 wedges were created to inspire and ensure maximum performance.

Features micro-milling on the back to create a boutique, hand-crafted appearance.

The face is laser engraved to additional friction for exceptional spin and control on the green and the C-shaped sole grind is versatile from a variety of course conditions.

ORLIMAR DELUXE PUTTING MAT

Track the path of your golf balls while you practice putting! The golf ball will leave a faint track on the surface where the ball rolls. The grooming brush (included) will wipe it away. Features a large 10' long x 18" wide putting surface and the green speed is realistic and the mat lays flat when unrolled. The adjustable wedges allow you to increase the difficulty. Distances are well marked and there are plenty of potential targets (whether on the mat itself or with the putting cups). Roll up, secure with elastic band and store when not in use. Golf balls not included.

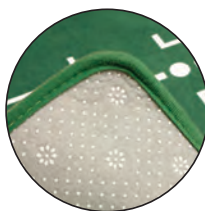

MODEL: OR027851

10' Feet long putting mat with ball trail technology

Includes 2 putting cups and 2 foam wedges to create breaks

Non-slip backing

In retail ready packaging

ORLIMAR TRIPLE HEIGHT HITTING MAT

This 3-in-1 hitting mat lets you practice from 3 different surfaces (Tee box, well-groomed fairway and rough). You can insert a real golf tee on the Tee box grass just as you would on a regular course and practice driving at your preferred tee height. The other two surfaces allow you to practice full shots with all other clubs as well as chipping and pitching. Mat folds quickly for easy storage and travel. Perfect for indoor or outdoor use. Includes 6 restricted flight foam practice balls and 6 wooden golf tees.

MODEL: OR029527

DIMENSIONS

Unfolded: 24" x 16" x 1.5" **Folded:** 16" x 8" x 3.5"

You can use real tees!

3 Different surfaces for the ultimate in realistic practice

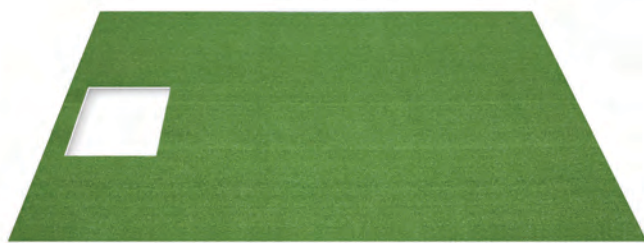

Includes 6 golf tees and 6 foam balls

In retail ready packaging

Non-slip backing

OPTISHOT GOLF MAT

This golf mat is the perfect companion for the OptiShot 2 Golf Simulator (sold separately). The mat comes with a pre-cut hole for OptiShot's infrared sensor base. The high-quality, durable nylon artificial grass surface and foam backing provides for a realistic feel and appearance.

ILLEGAL POWER

BEHEMOTH 520CC DRIVER

At 520cc, it is an ILLEGAL club head that exceeds the maximum size allowed by the USGA. The Behemoth offers the largest possible sweet spot available for the extra confidence to go after it on the tee. Available in multiple lofts and flexes as well as OFFSET version to combat slicing. The Behemoth Fairway Wood is also super-sized, and an excellent choice for any amateur golfer looking for an affordable fairway wood. All Behemoth woods feature forged alloy construction and pre-assembled with a matching graphite shaft, soft rubber grip and includes a headcover.

TAKING CARE OF BUSINESS

#2 PUTTER

The Intech Golf #2 Putter is sure to put a smile on everyone's face in your foursome. Take care of business on the green with the poop emoji-shaped putter which is so funny, it will make you nearly poop your pants. This face-balanced mallet design is more than just a novelty item, it will roll your ball as smooth as fudge with no skid marks. The high MOI putter provides added forgiveness whether you are pinching a loaf on that breaking downhill 3-footer or trying to drop a bomb on your partners who won't believe it when you splash it into the chute. Your putting game will no longer stink and you will be the King of the Throne at the 19th hole with the Intech #2 Poop Putter.

USA Cooler Bag! Keep hydrated and store your valuables with the Intech Golf Bag Cooler & Accessory Caddy. Capable of holding ten 12-ounces cans plus ice, plus also features an insulated liner, side mesh bottle holder, tee holder, zippered side pocket and larger zippered front pocket to hold your valuables. The padded top and extra-long strap make it easy to transport or can be clipped or strapped to your golf bag or cart.

GET ORGANIZED

GOLF TRUNK ORGANIZERS

The Intech Golf Trunk Organizers keep all your golf gear neatly arranged. Made of a durable black nylon with an ergonomic cushioned rubber handle, clear ID holder and fully zippered top. Double Trunk Organizer measures 19" x 14" x 12" and has 4 separate large compartments to store and separate your golf shoes, shirts, hats, rain gear and golf towels. Single Trunk Organizer measures 19" x 14.5" x 6" and has up to 5 separate compartments with Velcro dividers and two mesh compartments.

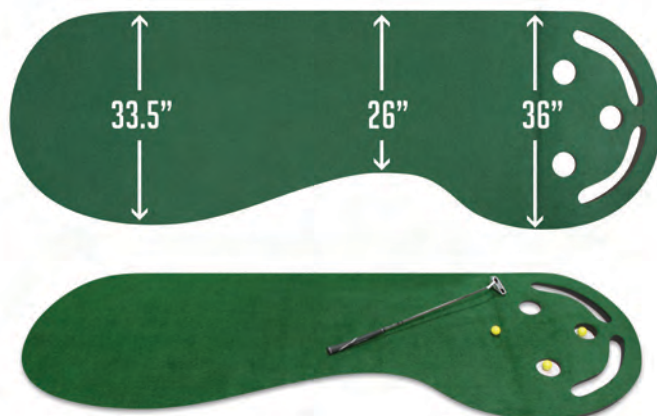

HONE YOUR PUTTING SKILLS

WITH THE INTECH 3 HOLE PORTABLE GOLF PUTTING MAT

3-HOLE PORTABLE PUTTING MAT

Practice your putting game before hitting the green with the Intech 3 Hole Golf Putting Mat. The 9 foot long x 3 foot wide kidney-shaped mat has 3 smaller than regulation sized holes on a slightly included surface to make your practice more challenging while there are two bunkers to collect missed putts.

IN020043

Available in a variety of colors

SQUEAKY CLEAN GOLF BALL WASHER

The Intech Squeaky Clean Pocket Golf Ball Washer is a simple item you can carry with you to keep your golf ball clean. Just pull the Microfiber liner out and wet it and wring out any excess water. Push the liner back in and you have a portable ball washer that you can carry with you easily in your pocket. The outer material stays dry so there are no leaks.

IMPACT BAG

Practicing with the Intech Golf Impact bag for just 15 minutes a day can help you develop better rhythm, technique, endurance, consistency and distance, while encouraging muscle memory and a flat left wrist (for a RH golfer) at impact for on-target shots. Easy set-up: fill with towels, clothes, sheets or any cloth-type material through the zippered opening, zip it up and you are ready to practice. Use at home or out on the range. 15" diameter x 10" high.

IN021866

THICK SYNTHETIC LEATHER 12-PIECE IRON HEAD COVER SET

Intech's Thick Synthetic Leather Golf Iron Head Covers will protect your clubs from colliding against one another in the bag as well as offering protection from the weather elements. The 12-piece set are individually numbered from #3-9 and include 5 labeled wedge covers too. These slip on easily to modern game-improvement irons and have a magnetic closure to keep them secure onto the head while they are in the bag. The simulated leather look adds a touch of style while the padded foam-backed polyurethane (PU) supplies the protection.

IN021484

EASY-OPEN MAGNETIC ENCLOSURE

PLASTIC PUTTING CUP

Intech's durable plastic putting cup catches ball and keeps them in place. Work on your putting game anywhere!

I99007

SINGLE PADDED ADJUSTABLE GOLF BAG STRAP

Thanks to the Intech Single Padded Adjustable Strap for Golf Bags, you may not have to buy a brand-new bag when the strap breaks. This strap features a comfortable, thick pad and attaches by two heavy-duty snap hooks. The lower hook can be removed to attach to existing 1.5" buckle downs. Fully adjustable to fit a wide range of golfer heights.

IN022207

NEOPRENE MALLET PUTTER HEADCOVER

The Intech Neoprene Black Mallet Putter Cover is handy to keep the putter in good condition or replace a misplaced headcover. Velcro enclosure and slit designed to fit the shaft or hosel of most right-handed mallet putters on the market.

I99045

ALL-PURPOSE 5-IN-1 GOLF TOOL

All-in-one divot tool and groove cleaner, a stroke counter, a retractable brush, a golf ball marker and a belt clip. Small in size, this tool can easily fit in the palm of your hand or comfortably in your pockets.

I99061

GOLF BALL PICK UP

This just attaches to your grip for easy pick up of the golf balls. Saves wear and tear on your back. No more bending over!

I99066

TWO-SIDED GOLF CLEANING BRUSH

Features nylon bristles on one side for woods and brass bristles on other for irons. Great cleaning tool with clip to attach to bag.

K40319

BETA-TI GOLF BALLS

A high energy core combined with a thin cover converts club head speed into exceptional distance and roll. This premium distance ball provides an optimal launch and soft feel for precision around the green. Advanced aerodynamic 432-dimple pattern creates ideal conditions for a superior ball flight. A responsive, yet rugged, thin cover material gives you cut-proof durability without sacrificing feel.

BANDIT SB GOLF BALLS

Try Bandit Golf's Small Ball Technology and High C.O.R. Core Formula for the Ultimate in Illegally Long Distance! Achieve additional distance with ALL clubs from tee to green to make golf courses play shorter. It starts with a smaller 1.65" non-conforming diameter, which creates lower drag coefficient and less resistance for extended flight time and increased distance. The High C.O.R. energy charged core provides for maximum golf ball velocity, while the extra-large oversize core is for improved feel and spin control. Bandit SB golf balls exceeds the USGA's distance limits.

BAN-SB SB Balls - Dozen

BANDIT MD GOLF BALLS

You will not find another golf ball out there that provides the incredible performance of speed, distance and control, which exceeds USGA's distance Limits. Don't buy just any ordinary discount golf balls. Buy the world's longest golf ball. Bandit MD Golf Balls set records – World Records!

BAN-MD MD Balls - Dozen

**HIGH ROLLER EDITION WITH 15-CHIPS!
(INCLUDES BEER CHIP) NEW**

The ultimate on-the-course gambling game. Vegas Golf consists of real casino style chips, the object is to avoid the negative and obtain the positive chips. The High Roller edition features Vegas Golf's 8 original chips plus 6 new fun chips. Only one game is needed per foursome. Includes 14 main chips - 5 positive, 8 negative and a wild card.

VG200 15-Chips with Deluxe tee bag

ON THE COURSE GOLF GAME (12 CHIP EDITION) NEW

The Vegas Golf "On The Course" Golf Game is an exciting game that levels the playing field for all golfers. This game is played on the golf course, and only one game is needed per foursome. It begins by golfers agreeing on values for the poker chips before teeing off on the first hole. Each player begins the round with no chips. Golfers want the positive chips and want to avoid the negative chips. The player that has the game hands out the chips as they are earned. The payoff is determined by the last golfer holding the chip at the end of 18 holes. The game can take place over 18 holes or be broken into 9's. Lots of laughs are to be had! Additional features: Authentic poker chips Positive and negative chips Free chip pouch included This NEW Edition comes with 2 Free Bonus Chips! (Grave Digger and Eagle Chip) our most popular new chips.

VG1200 12-Chips Edition

**19 CHIP VIP EDITION WITH DELUXE
TEE-BAG / CHIP-BAG**

VG1900 19-Chips with Deluxe tee bag

BET & HAVE LOTS OF LAUGHS.

TAKE YOUR NEXT ROUND OF GOLF TO A NEW LEVEL-TRASH TALK.

You will have a blast with your Golf Buddies when you break out this VIP Edition "On The Course" game. It begins with golfers agreeing on a value for each chip. Golfers want the positive chips and you want to avoid the negative chips. New Grave Digger... Takes you more than one shot to get out of a sand trap. Your shot goes into the water... you get the water chip. Furthest from pin on a Par 3... gets you the new Beer Chip, which puts you on the hook for a round of beverages when the beer cart comes by.

ONLY ONE GAME NEEDED PER FOURSOME.

Free Deluxe Tee Bag

THE BEST FITTING BELT IN THE WORLD

TAKE IT TO THE EXTREME

ACER XDS TITANIUM DRIVER

The Acer XDS driver is designed for the vast majority of golfers to experience a distance-enhancing draw off the tee. Features internal heel-weighting which shifts the center of gravity closer to the hosel, assists squaring the face up at impact and enhancing gear effect to impart draw spin. Coupled with the lighter crown and increased head mass ensures greater energy transfer to the ball as well as optimal forgiveness. Additional screw weights available to fine-tune swingweight and/or assembly lengths. Comes with stock 7g screw.

ACER XDS EXTREME DRAW TITANIUM DRIVER

The XDS Extreme Draw is designed for those who battle a chronic slice - at least until now! Three key features (an extreme closed face, offset hosel and internal heel weighting) work in unison to keep ball from slicing from the tee. Additional screw weights available to fine-tune swingweight and/or assembly lengths. Comes with stock 7g screw.

ATTACK THE COURSE

ACER XDS FAIRWAY WOOD

The XDS fairway woods showcase progressive internal heel-weighting to assist into squaring the face up at impact and producing a draw enhancing ball flight. The wrap-around face construction features an ultra-thin, variable thickness face to boost ball speed and distance while multiple lofts provide custom options to attack the course. Modern head weights increase the MOI of the head and work well with today's ultralight shaft to achieve normal swingweights.

ACER XDS EXTREME DRAW FAIRWAY WOOD

Ideal for those moderate fades to chronic slicing, the XDS Extreme Draw fairway woods highlight an offset hosel, modestly closed face and internal heel-weighting to assist squaring the face up at impact. In addition, a wrap-around face construction features an ultra-thin, variable thickness face to boost ball speed a distance. Modern head weights increase the MOI of the head and work well with today's ultralight shaft to maintain normal lengths and solidness of contact.

RELAX. YOU'VE GOT THIS.

ACER XDS HYBRID IRON **NEW**

After a long hard day at work, don't you just want to sink into a giant comfy sofa? That's how you'll feel playing the all-new Acer XDS Hybrid Irons. No anxiety, no stress. Why? Because the Acer XDS Hybrid Irons are designed to give you more of what you're used to, much more. So you can be relaxed and at ease knowing you'll get great results every time.

How do we accomplish this? Yes, we can bore you with talk of advanced hollow head construction, the high-MOI design, or the thin variable cup-face, but what it really comes down to is the transition between the entire set. True wide-sole design on the long irons for superior forgiveness, true thin-soles on the short irons for superior accuracy, and a natural transition on every club in between. No more shock moving from long to mid to short irons. It just feels right. The Acer XDS Hybrid Irons are how iron sets should be made.

ACER XV ULTIMATE THRIVER

The Acer XV Ultimate Thriver provides golfers with the best of both worlds by generating driver distance with the control of a fairway wood off of the tee. Year after year, one of our Thrivers has been one, if not, our highest selling and rated tee club. The XV is the 4th generation model and improves upon several features that have made these fairway-finding demons. Comes with 3 different weights (2, 7 and 12 grams including wrench).

- Shorter, more control length for solidness of contact
- Adjustable weighting to provide more fitting options
- Heavier weight head maximizes MOI and increases momentum into the ball
- Large, confidence building volume (460cc) and face height
- Slightly lower loft than previous versions to increase roll and overall distance

COMPONENT CLUBHEADS

ACER XV MINI THRIVER

The Acer XV Thriver Mini is a special shallow faced control club off a short tee as well as a club to use in the fairway when you need the maximum distance to reach a par 5 or long par 4. Plus being all-titanium it's very light, and we chose titanium for the thin, active face to provide you with more distance.

COMPONENT CLUBHEADS

TFM1469 RH 13°

The large footprint of the Acer XV Thriver-Mini is more forgiving than a typical 3 wood.

ACER XV FAIRWAY WOOD & HYBRID

The Acer XV fairways woods and hybrids feature cup-face construction, making the areas around the clubface perimeter thinner - creating more face deflection for higher ball speeds to areas other than the center of the face. Even when you miss-hit the ball, the XV with cup-face technology provides you that extra spring-like effect for longer shots. In addition, these low profile heads coupled with the Gravity Port moved toward the face promotes a higher launch with lower spin.

CLUB TECHNOLOGY

THE FEEL OF FORGED

ACER XV TOUR BLADE IRON

The Acer XV Tour Blade is geared for golfers who are seeking maximum shot control or the ability to work the ball, while constructed from 304 stainless steel rivaling that nice soft, solid feel of a forged iron. These can be mixed and matched seamlessly with the Acer XV Pro to make the perfect blended set for the skilled player who may still need some help in the longer irons.

ACER XV IRONS

The Acer XV irons are designed instill confidence into your game. Standard version features ample offset to help the player square up the face at impact and the enhanced heel-toe weighting enables players to hit both straighter and more solid shots. The HT (High Trajectory) has nearly a 30% wider sole and shallower face than our standard Acer XV model to get up in the air quickly from virtually any lie with maximum forgiveness. The XV Pro features the same cutting-edge design as the standard, but with a more compact design, thinner topline and reduced offset favored by better players.

FLEX IT TO THE MAX

PROPHET CB IRONS

The Dynacraft Prophet CB iron is all about enhancing distance and performance featuring Flexface; a thin, special vacuum heat treated high-strength forged 17-4 stainless steel face with variable thickness to push high COR to its maximum limit. The thinner face not only increases ball speed coming off the face, but also allows for improved weight distribution for an ultra-low and deep center of gravity.

CLUB TECHNOLOGY

FLEXFACE TECHNOLOGY

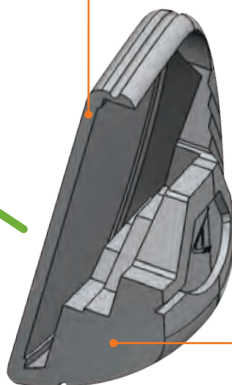

Thinner and more flexible iron face translates into more distance.

GOING FOR THE GREEN

Stronger lofts normalize trajectory for added distance but allow for stoppage on the green.

LOW CG

Very high concentration of weight positioned both low and rearward creates high launch conditions.

DYNACRAFT DRIVING IRON

The Dynacraft Driving Iron series features a thin, special vacuum heat treated, high-strength forged 17-4 stainless steel face with variable thickness to push high COR to the maximum limits. The hollow-bodied construction positions weight low and rearward for advanced perimeter weighting and a more piercing driving trajectory than a comparable lofted fairway wood. The 18° version is designed primarily as a control club off of the tee, but can be an option for approach shots from the fairway from preferred lies like the higher lofted option.

PROPHET MUSCLE BLADE IRON

The Dynacraft Prophet Muscle Blade is all about extremes yet in a design where all the technology is hidden. First, this is a hollow-bodied design to move weight to the perimeters for exceptional forgiveness much like a hybrid. However, this multi-material design key feature is an ultra-thin, high-strength cup face to boost ball speed and maximum your distance. The weight saved in the face is positioned low and rearward for optimal launch conditions. Yet with all this technology this design maintains a traditional appearance and feel in an ultra-game improvement design for golfers of all abilities.

INCREDIBLY LONG AND STRAIGHT

JUGGERNAUT TITANIUM DRIVERS

The Juggernaut Titanium Driver has 515cc volume, 55cc's more than conforming 460cc drivers, translating into bigger power, bigger performance and better accuracy. The larger perimeter weighting results in a more forgiving head on off-center shots. The bigger, wider beta titanium face creates a C.O.R. busting trampoline effect, allowing you to generate explosive distance off the tee.

Available in standard or slice reducing draw version.

Does not conform to the Rules of Golf, because that's the point.

JUGGERNAUT TITANIUM FAIRWAY WOOD

This all-titanium beast is all about maximizing distance with a "hot-face" comparable to today's drivers. Features a deeper face that can be played from a tee yet offset by an incredibly low center of gravity to promote a high trajectory from the fairway or rough. The non-glare matte black crown and contrasting black PVD finish will inspire.

THINNER FACES EQUAL LONGER DISTANCES

JUGGERNAUT HYBRID

The high-performance Power Play Juggernaut hybrid possesses a thin, variable face thickness for an incredible sound and feel at impact. Our exclusive variable thickness crown redistributes weight where it is need most for superior balance and an unbelievable performance. Versatile from a variety of course conditions and features full face progression promoting a neutral flight bias.

JUGGERNAUT IRON

The Power Play Juggernaut are our hottest and longest irons to date. These hollow bodied irons possess an unsupported, super thin specialty face insert, which is devised to flex the face like a titanium driver to maximize ball speed and distance. The face is approximately 25% thinner than a typical cast iron to not only boost the COR near the legal limit, but also save valuable weight that can be used elsewhere to increase trajectory and maximize forgiveness.

OBSESSION WOMEN'S ONLY SERIES

The iBella Obsession line is not just a man's model painted an alternative color, but exclusively designed for women. Women have quite different needs and the clubs require a unique set of specifications to complement their swing style. Whether driver, fairway, hybrid or iron, specific design elements were carefully implemented to meet today's women's needs. Each iBella club appears with a hot pink, white and silver color scheme and accented with a butterfly motif and authentic Swarovski crystals.

SIMPLIFY YOUR IRON GAME

PINHAWK VERTEX IRONS **NEW**

The Pinhawk Vertex Dual Length irons are the ultimate in modern day technology for game improvement. Combining the best of both worlds for the ultimate in consistency: Not completely single length, and not traditional length. Instead, just two different lengths: the 3, 4 and 5 irons one length, and the 6, 7, 8, 9, PW, AW, SW another. This configuration results in no distance loss in the long irons and the full benefits of single length irons in the “short” set.

PINHAWK SLF/SLH FAIRWAY WOODS & HYBRIDS

The Pinhawk SL single-length fairway woods & hybrids offer a unique choice for players looking for consistent ball striking. Contrary to traditional hybrids that vary in length, the SL series are all designed to be the same length throughout the series (one length for all fairway woods and one length for all hybrids). Each club in the series have the exact same swingweight and flex, so the golfer only has to "learn" one swing that works for him or her. This enables the golfer's swing to become more easily repeatable. Conform to the Rules of Golf.

PINHAWK SL ASSEMBLY TIPS

1. Iron / Hybrid tip trim the shaft, regardless if the head is a #4, #9 or SW as if it were a #7-iron.
Fairways tip trim all as they were a 5-wood.
2. Iron / Hybrid cut the butt end to length as if were a 7-iron. If someone orders a set +1/2", then make that length ½" over your standard #7-iron length for all clubs in the set. Fairways make them all the length of a 5-wood.

The SL is short for Single Length. When you get done, all like clubs will be the exact same length with the only change being the loft.

This should make assembling these irons easier than normal.

ONE LENGTH ONE SWING

PINHAWK SL IRONS

Looking for more consistency from your iron game? You need to seriously consider the Pinhawk SL single length irons! Contrary to a traditional set of irons, the SL's are all designed to be the same length throughout the entire set. In addition, the swingweight and flex are also the same. This allows the golfer to use the same swing, on the same plane, with the same feel, for each iron in the set. The loft gapping is slightly larger than traditional irons; this is to maintain a proper distance gap between clubs.

THE BIG SCOOP

JUGGERNAUT MIRROR WEDGE

Just like the driver, the Juggernaut wedge proves that bigger is indeed better. This hollow-body, 2-piece construction features a deep face to instill confidence in getting the ball out of the thickest rough, while the extra wide sole greatly reduces fat shots. Aim square to your target and let the club do all the work. The Juggernaut wedges works in all types of course conditions.

ACER XB WEDGE

Our most versatile series of wedges. The Acer XB combines the tradition, beauty and elegance of the past you would only expect with a blade style wedge. Starting with a classic teardrop shape, tapered hosel, very minimal offset, thin top line and narrow sole, no attention to detail is left out. Perhaps the greatest attribute is that no other set of wedges are as complete and versatile as the Acer XB wedges.

PINHAWK ON LOCK PUTTER **NEW**

The Pinhawk On Lock putter is specifically designed for the armlock putting method. The armlock putting method has been proven to help you maintain better stability in your putting stroke. By anchoring the shaft and grip to your arm, you are eliminating any deviations in shaft angle from setup to impact where most putting errors occur.

The Pinhawk On Lock putter is perfectly designed for this USGA approved method of putting. It helps keep your wrist from breaking, and it also helps you keep conscious of a proper rotation of the shoulders. All of this results in giving you the stable stroke you need for solid, consistent putting, and it can help with the dreaded 'yips' too.

PUTTER HOSEL ADAPTERS

LONG/BROOMSTICK PUTTER ADAPTER

Converts the lie angle to 79° for use as a long or broomstick putter as the post is designed to fit the inside diameter of the Apollo 53" long putter shaft. Weighs 20g and these will work for either a RH or LH putter.

H001

SLANT HOSEL PUTTER ADAPTER

Converts a RH putter designed to have a compound triple bent shaft with the proper lie/offset and accept a straight shaft. Weighs 44g.

H002

PLUMBER'S NECK PUTTER ADAPTER

Converts a RH putter designed to have a compound triple bent shaft with the proper lie and reduced or non-offset configuration and accept a straight shaft. Weighs 44g.

H003

PUTTER SHAFTS

APOLLO 36" STEPLESS BLACK **NEW**

Standard length (36") straight putter shaft with stepless design for that high-end look. Fits putters requiring 0.370" straight shafts.

STANDARD LENGTH SHAFTS FOR PUTTERS WITH ANGLED HOSELS / BORES

NOTE: All putter shafts are trimmed from the butt end only (Trim Chart IH19).

UST-MAMIYA FREQUENCY FILTERED SHAFTS

The UST-Mamiya Frequency Filtered putter shafts amplify touch and feel to improve the ability of players to perceive or feel where ball impact occurs on the face. Interlinked Carbon fiber in the butt-section creates a tremendous amount of hoop strength for a consistently solid feel in the hands. The steel tip-section makes the shaft a perfect fit for the hottest putter heads on the market.

USTFFS Straight Stepless

USTFFDB2 72° Offset

ACER VELOCITY

The Acer Velocity 45 is a super lightweight shaft at an amazing price featuring a mid-launching design with a stable tip section for more speed and distance. With a raw length of 45", the beauty of this design is that it does not require any trimming at all to achieve a super light / super long driver for maximum speed and distance while maintaining normal swingweights.

Acer Velocity graphite shafts are designed with a lower kick point for optimum trajectory and flexed just right for added distance in every swing. Available in six popular colors, the Acer Velocity shafts are a great match for any clubhead.

SHAFT TERMINOLOGY

FLEX

The common term given to the relative bending properties of a golf club shaft. Standard designation for flex (listed in order from most flexible to stiffest).

LL - One flex softer than L or Ladies

L - Ladies

A, RR, or R2 - Amateur or Senior

R or R1 - Regular

SR - Stiff Regular

S - Stiff

TS - Tour Stiff

X - Extra Stiff

TX - Tour X

XX - Double Extra Stiff

XXX - Triple Extra Stiff

XXXX - Quadruple Extra Stiff

TORQUE

The amount of twist in a shaft under a given amount of force. Lower torque shafts twist less than higher torque shafts.

BUTT DIAMETER

Refers to the measurement of the larger end of the shaft (in inches) where the grip is to be installed (for example, .580" or .600").

TIP DIAMETER

Refers to the measurement of the smaller end of the shaft (in inches) where the clubhead is to be installed. Standard tip sizes are 0.370" parallel or 0.355" taper for irons and 0.335" or 0.350" for woods.

WEIGHT

The weight of the raw shaft before installation. The weight of the shaft has an effect on swing speed and control. Theoretically, the lighter the shaft, the faster one can swing. However, a shaft that is too light may result in reduced control of the club due to inconsistent tempo. The optimum goal is to find the lightest shaft one can control.

LENGTH

Refers to the length of a raw, uncut shaft before installation. Not to be confused with CLUBLENGTH, which is the length of the completed club in the address position.

TIP PARALLEL

The length at which the shaft tip maintains the same tip diameter. Generally indicates how much the tip of the shaft may be trimmed.

BALL FLIGHT

A relative indicator of how high the ball will travel in its trajectory. Typically, golfers with slower swing speeds will obtain greater distance with higher ball flight. Conversely, stronger players will maximize distance with a lower ball flight.

TRIM CODE

The trim code corresponds to suggested trimming instructions to achieve a particular flex for a particular club. For combination flex shafts, the code will be listed to the right of the flex. Trimming tables can be found inside back cover of this catalog.

APOLLO SHADOW

The Apollo Shadow is a 100% graphite shaft well suited for the mid handicapper. Standard Shadow a mid-torque and mid weight design allows you to fit the majority of players. Shadow UL's light 62g weight allows for faster swing speeds, while the mid torque provides accuracy without feeling too harsh. Shadow FL (Feather Lite) is the lightest shaft in the series for those players with a smoother tempo looking at improved trajectory and distance.

LOW BALANCE POINT SHAFT - HEAVIER FEEL

HIGH BALANCE POINT SHAFT - LIGHTER FEEL

The SK Fiber Hypersonic wood shafts are a counterbalanced design. The advantages of counterbalancing are that it allows you to use a slightly heavier head at normal lengths like the Gravity Port in our Acer XV and XDS drivers or many OEM drivers with adapter sleeves. Or you can increase the length (1/2") with standard head weights and yet maintain a normal swingweight. In both cases, this can help increase distance.

SK FIBER TOUR TRAC 55 & 65

The SK Fiber Tour Trac 55 is an ultra-lightweight shaft designed for a wide range of players with slow and moderate tempos seeking a higher launch angle. Custom clubmakers will love the extended raw length and especially the extended parallel tip section (5 inches) that will allow for customized tip trimming. Lastly, the tight plus/minus cpm consistency around circumference of the shaft exemplifies the quality to commitment only SK Fiber delivers. The SK Fiber Tour Trac 65 is a slightly heavier version wood shaft geared more for those who may have a slight quicker tempo or a companion fairway wood shaft to match the playing characteristics of the Tour Trac 55 in a driver. These offer the same versatility as well as shaft-to-shaft consistency as the Tour Trac 55.

DESCRIPTION	MODEL #	WEIGHT	TORQUE	BUTT SIZE	TIP SIZE	LENGTH	TIP PAR.	BALL FLIGHT	TRIM CODE

SK FIBER TOUR TRAC 75

The SK Fiber Tour Trac 75 is a smooth feeling shaft in a popular weight range for irons to balance distance with accuracy. Ultra-tight cpm consistency is ideal for making a matched set of irons. This shaft can also be an excellent choice for use in hybrids requiring 0.370" shafts.

DESCRIPTION	MODEL #	WEIGHT	TORQUE	BUTT SIZE	TIP SIZE	LENGTH	TIP PAR.	BALL FLIGHT	TRIM CODE

TOUR TRAC WOODS FITTING GUIDE

The SK Fiber Tour Trac 55 wood is an extended length golf shaft (47") and has a long parallel tip section (5") making it easy to dial in the flex to the speed and tempo of the golfer. Shown is a matrix of frequencies using our Acer XV golf driver at 45" and D1 swingweight. Each flex is shown with 3 trimming options. Standard tip trimming for this shaft starts out with 1" from the tip. This allows for creating a higher launch / higher spin shafts by trimming less of the tip or slightly reducing launch and spin by trimming more off of the shaft without feeling "boardy".

ALDILA NV IRON **NEW**

The new ALDILA® NV® Irons offer unparalleled performance, in a 40" unitized iron, with a sleek black finish that is designed to complement the recently updated NV® and NVS® wood shafts. Featuring high modulus carbon fibers and a toughed resin system, the NV® Irons offer the feel and stability that are demanded for precise iron play. Coming in a range of weights and flexes, from 45 A-flex to 95 S-flex, the NV® irons will have an option from almost every player.

nothing will improve your game quite like a custom-fit performance shaft

BUILT FOR YOU

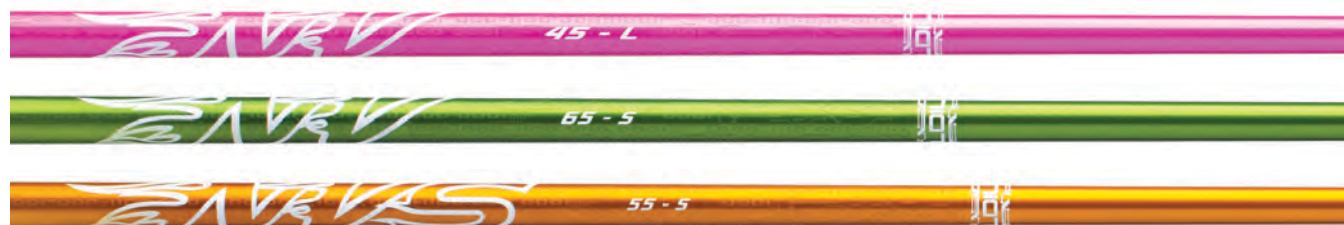

THIS SEASON, CRUSH IT

the legendary, lightweight family of NV® shafts from

ALDILA®

ALDILA NV/NVS NXT

The Aldila NV series is one of the most popular after-market shafts ever. With that kind of success, why change what works. The next generation NV incorporates ALDILA's NexGen Micro Laminate Technology (MLT) - which uses more than 20 layers of ultrathin, aerospace-grade pre-preg, that eliminate unwanted gaps and "dead zones" that can occur during the manufacturing process. MLT enhances feel and eliminates inconsistent shots caused by shaft variability, while the constant taper design provides a smooth and stable feel shot after shot. The Aldila NVS features the same unmatched performance and incredible feel of the NV, with a higher launch.

ALDILA QUARANTA SAPPHIRE

The Quaranta Sapphire is Aldila's latest high-performance, ultra-lightweight SUB-50 gram golf shaft. A classic, smooth bend profile provides a responsive tip and mid-section, balanced by a more stable butt-section. The Quaranta Sapphire is lighter weight and has a lower torque than the Quaranta Blue Series and features premium ion plating and a high-modulus MR70 carbon fiber that helps it launch lower for a flatter ball flight.

ALDILA XTORSION COPPER

The new Aldila Xtorsion Copper series features a stiff tipped, Counter Balanced design along with a new and unique woven graphite material on the outer layer of the shaft at the tip-section. This new MAMBA (Multi-Axial Material Bias Angle) Technology places a high-tech material on the shaft in a +/- 45-degree fiber orientation. This unique use of a flat weave material on the exterior of the shaft provides significantly improved torsional stability to this counter weighted shaft in the lower half (tip-section) where the greatest percentage of twisting occurs during the swing and at impact. The new Aldila Xtorsion Green series features Aldi's classic stiff-tip low launch profile

ALDILA TOUR SERIES

The Aldila Tour series utilizes the latest materials and manufacturing technology to create a new shaft designed to maximize the power of your individual golf swing. The constant taper shaft profile provides exceptional feel and a smooth, controlled release. The ultra-thin, ultra-strong material allows for the construction of a shaft with outstanding performance and unparalleled consistency.

ALDILA ROGUE BLACK 130 M.S.I. NEW

Building off the success of the ROGUE® BLACK 110 M.S.I. Limited Edition which featured 110 M.S.I. Graphitic Carbon Fiber, we have taken ROGUE® performance to another level by incorporating even stronger 130 M.S.I. Graphitic Carbon Fiber. The ROGUE® Black 130 M.S.I. is a mid-high launch, mid spin shaft with a reinforced tip-section fortified with 130 M.S.I. Graphitic Carbon Fiber and a higher-balance point.

ALDILA ROGUE WHITE 130 M.S.I. NEW

The ROGUE® White 130 M.S.I. pushes the limits of performance with the use of extremely high modulus, Graphitic Carbon Fibers to provide the ultimate in performance from a Mid Launch, Low Spin profile. The ROGUE® White 130 M.S.I. profile fills the performance gap between the Low Launch, Low Spin profile of the ROGUE® Silver 130 M.S.I. and the Mid/High Launch, Mid spin profile of the ROGUE® Black 130 M.S.I.

ALDILA ROGUE SILVER 130 M.S.I.

The Aldila Rogue Silver 130 M.S.I. offers unmatched performance and consistency through the use of advanced, ultra-high modulus graphitic carbon fiber. Building from the material knowledge and tour success of the Limited Edition Rogue Silver 125 M.S.I., our development team has taken Rogue performance to another level by incorporating 130 M.S.I. carbon fiber to increase stiffness and further reduce torque and ovaling.

ALDILA ROGUE SILVER 110 M.S.I. NEW

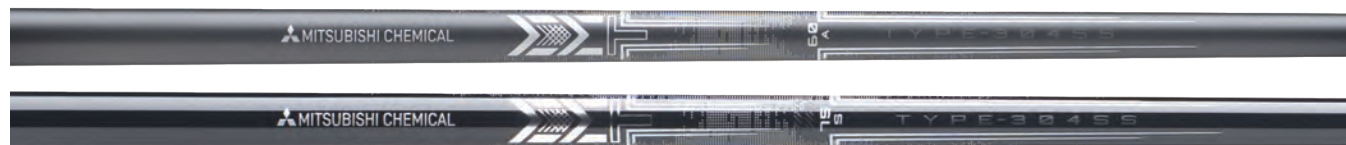

The 2nd Generation ROGUE® Silver 110 M.S.I. Series uses advanced aerospace material in a unique taper design to provide golfers with the superior performance and consistency that the ROGUE® family of shafts has built its reputation on. A stiff tip profile generates the Mid/Low Launch, Low Spin launch characteristics that the ROGUE® Silver 110 M.S.I. shafts are renowned for. Combining matte and gloss finished give the 2nd Generation ROGUE® Silver 110 M.S.I. a premium look to match its performance.

MMT IRON **NEW**

Designed to maximize the benefits of both composite and steel performance, our patent pending Metal Mesh Technology represents the very best of the Mitsubishi end-to-end manufacturing approach. As layers of prepreg are stacked to build the shaft's core, a small section of unique Metal Mesh is integrated towards the tip. This Metal Mesh – made up of individually braided strands of 304 Stainless Steel – improves the density and stability of the shaft, while also allowing for thinner overall composite wall construction. Together this yields a finely tuned, highly responsive shaft that still provides the consistent launch and spin control needed for effective iron play.

TENSEI

The TENSEI™ CK Orange builds off of our classic, smooth bend profile and features a unique counter-balanced design and the same Carbon Fiber/DuPont™ Kevlar® weave found in the butt-section of all TENSEI™ CK shafts.

MMT™ Iron Shafts utilize a patent pending Metal Mesh Technology to redefine the possibilities for feel and performance in a composite iron shaft. This metal mesh – made from individually braided strands of 304 Stainless Steel – improves density and stability to allow for thinner overall composite wall construction.

TENSEI CK PRO ORANGE

TENSEI™ CK Pro Orange expands the TENSEI™ CK Series - which features a multi-material design that incorporates more performance-oriented materials than we've ever used in a shaft. This first of its' kind bend profile for MCA GOLF uses a counter-balanced design along with an extreme tip-stiff design to provided added versatility for the stronger player.

GRAFALLOY PRO LAUNCH **NEW**

The Pro Launch is the world's first golf shaft designed and engineered using the launch monitor to produce decreased ball spin, optimum launch angle and maximum clubhead speed. Proprietary Micro-Mesh tip technology provides lower torque for greater stability while offering superior feel at impact compared to other low trajectory, tip-stiff composite shaft designs. Prolaunch Blue provides high ball flight, Platinum mid ball flight and Red provides low ball flight.

THE PROPER ASSEMBLY OF GRAPHITE SHAFTS

1. Remove all oil and debris from hosel prior to assembly with a fast drying solvent such as acetone.
2. Lightly abrade the chrome on steel shafts or the paint and polyurethane on graphite shaft tips for maximum adhesion. Take care to avoid damaging the shaft structure by abrading too much as manufacturers will not warrant broken shafts as a result of this.
3. Countersink the hosel 20° (all heads shown in this catalog are pre-countersunk for you, but if you need to do it yourself, use a countersink drill bit). This process ensures that the shaft is protected from the sharp edges of the hosel, which could cause graphite shaft breakage. Avoid using too much epoxy as excess epoxy can go up far up inside the shaft tip and lead to pre-mature breakage.
4. A ferrule provides added shaft protection and gives the club a finished look.

AEROTECH CLAYMORE

Features a lightweight design utilizing an all-new micro-thin Micro-Tex Carbon Fiber with hoop wound (90°) surface layer that minimizes shaft distortion for superior stability. The MX48's filament wound, super lightweight and moderate tip stiffness allows golfers to maximize club head speed without sacrificing control and accuracy. The Claymore MX60 offers a player slightly higher weight and lower torque than its lighter counterpart.

DESCRIPTION	MODEL #	WEIGHT	TORQUE	BUTT SIZE	TIP SIZE	LENGTH	TIP PARALLEL	BALL FLIGHT	TRIM CODE

AEROTECH POWERCOIL

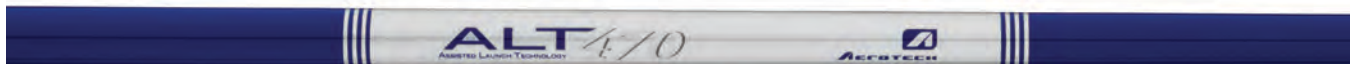

Features lightweight filament wound construction combined with lower torques. The just over 50 gram HP50 is designed so the softer flexes have progressively softer tips to help the slower swing speed players optimize launch conditions. The HP65 is designed for players looking for a slightly stiffer tip and lower ball flight.

DESCRIPTION	MODEL #	WEIGHT	TORQUE	BUTT SIZE	TIP SIZE	LENGTH	TIP PARALLEL	BALL FLIGHT	TRIM CODE

AEROTECH ALT470

The ALT470's super flexible stiffness profile allows even the slowest speeds to load the shaft properly resulting in increased launch angles, higher spin rates and longer hang time. Aerotech's hoop wind surface layer construction makes this shaft more stable and therefore playable than any other super flexible shaft available.

DESCRIPTION	MODEL #	WEIGHT	TORQUE	BUTT SIZE	TIP SIZE	LENGTH	TIP PARALLEL	BALL FLIGHT	TRIM CODE

AEROTECH STEELFIBER

SteelFiber combines filament wound carbon fiber core with steel fiber outer layer to provide superior hoop strength for reduce deformations and unmatched stability. Minimized wall thickness eliminates the "boardy" feel often associated with thicker walled composite shafts. The steel fiber around the perimeter creates a greater density (weight) on the shaft's surface that moves the shaft wall's center of gravity (CG) outward, thus increasing the shaft's Moment of Inertia (MOI).

* Available in both 0.335" & 0.350". Please specify when ordering.

More and more golfers are making the switch to RECOIL® iron shafts, making RECOIL® the #1 Graphite Iron Shaft in the market. Our disruptive RECOIL Technology is more efficient than steel and more responsive than traditional graphite. The result is better feel, precise distance control and pin-seeking accuracy. Traditions are made to be broken - experience how RECOIL will change your game.

THE #1 GRAPHITE IRON SHAFT

Which RECOIL is right for your game?

UST-MAMIYA LIN-Q NEW

LIN-Q features UST Mamiya's exclusive Q-Fiber. Q-Fiber has the unique ability to store and release energy unlike any other carbon fiber material. LIN-Q shafts will deliver more energy to the golf ball and deliver that energy more consistently for maximum distance and accuracy.

UST-MAMIYA PROFORCE V2

One of the top franchises in UST Mamiya history gets a bold new cosmetic update. PROFORCE V2 is designed for players seeking a flatter, more penetrating ball flight. The firm tip section produces a medium launch condition and increased ball speed. The PROFORCE V2 uses the most superior materials and design to produce a very stable, consistent golf shaft. PROFORCE V2 HL shafts offer the same features as the PROFORCE V2 except these are designed for the golfers seeking a higher initial trajectory for longer carry.

With 31 years of proven Accuracy and Distance...
maybe it is time for you to experience the difference!

FEATURES:

- TORAYCA M40X carbon fiber pre-preg with NANOALLOY technology for increased stability in the mid to tip region.
- TORAYCA T1100G carbon fiber pre-preg with NANOALLOY technology for added stiffness in the tip region.
- Available in 45g through 85g weights.
- The XC-4 and -5 models are designed to Mid Launch and Low/Mid Spin.
- The XC-6, -7 and -8 models are designed to promote Low/Mid launch and Low Spin.

NEW
For 2020

TOUR AD™ XC
TORAYCA T1100G
+M40X

FEATURES:

- TORAYCA T1100G carbon-fiber pre-preg with NANOALLOY® technology for increased stability in the mid to tip region and unsurpassed feel.
- Ultra-premium, high modulus, aerospace quality carbon fiber materials.
- Available in 2 models of PRO and Std. and weights of 45g, 55g, 65g and 75g.
- PRO Model is designed to promote Mid launch and Low Spin.
- Std. model is designed to promote Mid to Mid/High Launch with Low/Mid to Mid ball spin rates.

GRAPHITE DESIGN TOUR AD XC NEW

Graphite Design introduces the latest in the Tour AD premium line of golf shafts, the Graphite Design Tour AD XC – designed for "Xtra Carry". The Tour AD XC shaft profile is softer in the butt section, stiff in the center section and has a stiff tip to promote low/mid launch angle and low spin with the ball. The Tour AD XC also utilizes the brand new TORAYCA® M40X carbon-fiber pre-preg in the Mid to Tip Section of the shaft as well as the TORAYCA® T1100G carbon-fiber pre-preg with NANOALLOY® technology in the tip section of the shaft for unrivaled shaft stability and precise ball control without the loss of the exceptional feel that Graphite Design shafts are so well known for.

GRAPHITE DESIGN MAD

Graphite Design MAD wood shafts are designed to alleviate the ill-fated golf ball flight issues that results in a lack of Maximum Accuracy and Distance. Available in two strengths; Standard strength wood shafts designed for the intermediate to advanced players and MAD PRO for the advanced to professional players with higher swing speeds.

MAD Pro Shaft

GRAPHITE DESIGN TOUR AD DI

The Graphite Design Deep Impact shaft is design to provide more power and stability. The mid bend profile of the Tour AD DI allows the player to load the shaft properly, yet maintains a firm enough tip section through impact producing optimal spin and launch conditions.

GRAPHITE DESIGN TOUR AD VR

The Tour AD VR (Vanquish all Rivals), like the other premium Tour AD wood shafts, utilizes premium, aerospace quality 50 carbon-fiber materials and it has a slightly higher balance point than the other current Tour AD wood shaft profiles. The Tour AD VR shaft also utilizes FTT -Fast Taper Technology, which incorporates a faster taper rate from the grip to the lower mid-section of the shaft, providing the overall feeling of greater club head control at impact and an increase in club head speed.

APOLLO ACCULITE

The Apollo Acculite is a high-performance steel shaft series. The Acculite 75 is the lightest and highest launching and designed for smoother tempo players. The Acculite 85 is extremely stable for any shaft in its weight class for distance and precision. The Acculite 95 delivers an astonishing blend of balance, control and feel and similar in weight to most OEM lightweight offerings.

Acculite 75

STING STOPPERS **NEW**

Sting Stoppers are designed to dampen vibrations from a golf shaft that make your wrists, shoulders, and elbows ache at the end of a round.

Golfers with arthritis or other joint problems appreciate the benefits from these inserts. Kits include an installation tool, inserts and an instruction sheet, while packs do not include the tool. Different sizes available for hobbyists to large clubmaking shops to stock the Sting Stopper Vibration Dampening Inserts for their clientele!

TRUE TEMPER XP 95 SERIES

Featuring optimized trajectory in a superlight weight design, the XP shafts are engineered to be the longest and most forgiving steel iron shafts in the game today. Robot and player testing has shown an average of 6-8 yards improvement in carry distance with many players seeing double-digit yardage gains.

DESCRIPTION	MODEL #	WEIGHT	BUTT SIZE	TIP SIZE	LENGTH	TIP PARALLEL	BALL FLIGHT	TRIM CODE
XP 95 - Iron R	UXP95-IR3	99 g	0.605 in	0.370 in	40.5 in	14 in	High	IH1

TRUE TEMPER MULTI-STEP LITE

Multi-Step Lite is designed with a unique step pattern that creates tip flexibility for players seeking higher launch angles from a steel shaft. The extended parallel tip section allows multiple trimming options for nearly all golfers.

DESCRIPTION	MODEL #	WEIGHT	BUTT SIZE	TIP SIZE	LENGTH	TIP PARALLEL	BALL FLIGHT	TRIM CODE
Multi-Step Lite - Iron R/S	TTSU-001-IC	125 g	0.600 in	0.370 in	42 in	14.25 in	High	R: IH1 / S: IH3

THE PROPER METHOD OF CUTTING GRAPHITE AND STEEL SHAFTS

When assembling a variety of golf clubs, clubmakers could potentially encounter shafts made from many different materials. Metal shafts can be cut with a variety of tools, from a simple tubing cutter to a motorized device such as an abrasive cut-off saw. In contrast, graphite and composite-type shafts are best cut by abrasive cutting devices to prevent splintering the shafts.

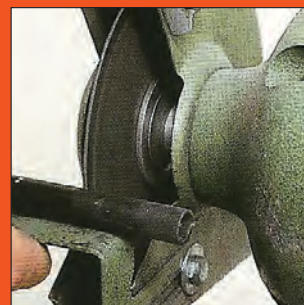

TUBE CUTTER

- Use for steel shafts only
- Be very careful on ultra-light steel shafts
- Wheels will wear out quickly, have extra handy

HACKSAW

- Use for graphite/composite shafts
- Use grit edge or rod saw blade
- Some care and preparation is required

ABRASIVE WHEEL

- Can be used on all types of shafts
- Mount on bench grinder or chopsaw
- Use eye protection / safety precautions

KBS C-TAPER / C-TAPER LITE

The KBS C-Taper design is specially modified through the taper and tip section to produce a lower trajectory and reduced ball spin without sacrificing the signature KBS feel and distance gains.

DESCRIPTION	MODEL #	WEIGHT	BUTT SIZE	TIP SIZE	LENGTH	TIP PARALLEL	BALL FLIGHT	TRIM CODE

KBS TOUR STEEL

Designed for better players, the KBS Tour shaft was engineered with 'moment of inertia analysis' to deliver better transfer of energy from the player's hands to the club. Tour 105 is a balance between the Tour and Tour 90 models, performance combined with light weight. Tour 90 is a lightweight, high performance steel shaft that is comfortable to swing with a softer feel.

MAKE YOUR GRIPS LIKE NEW

KARMA GRIP WIPES

Karma Golf Grip Cleaning Wipes are a convenient, fast and effortless way to clean your grips of dirt and grime and makes your grips tacky once again. The Karma Golf Grip Cleaning Wipes come in a resealable 15-count package that easily fit inside your bag. The fast-drying formula goes to work to minutes. Finally, no more mixing soap and water and then waiting hours for the grips to dry the old-fashioned way. Let Karma Grip Wipes give you peace of mind and no more loss of valuable strokes due to slick grips.

K736088 Pack of 15

RETAIL-READY
PACKAGING

SAVE MONEY & TIME WITH GRIP KITS & BUNDLES

GRIP KITS

To save you money and time ordering, we offer convenient Grip Kits for the majority of our swing grips. Each grip kit contains the following:

- 13 grips
- 13 strips of 2" double-sided grip tape
- 4-ounce bottle of Dynacraft grip solvent
- Rubber vise clamp
- Re-gripping instructions

**Please note that a vise is required to install grips.*

GRIP BUNDLES

We also offer convenience packaging of grips in bundles for most of our swing grips. These can be used for individuals re-gripping a whole set of clubs (13-piece bundles), a set of irons / wedges (9-piece bundles) and in some case 25-piece bundles (for multiple sets and/or additional clubs and spares for the future). Use as gifts for your favorite golfer, stock for on and off-course shops or as a display for retailers.

Not available at all distributors. Contact your local distributor for more information.

HOW TO REGRIP IN 4 EASY STEPS

STEP 1

REMOVING THE OLD GRIP

Place the club in a vise, and starting from the lip of the grip, cut towards the butt with a hooked knife blade. Remove the old tape and clean off the shaft.

STEP 2

APPLYING GRIP TAPE

Apply new double-sided grip tape from the approximate length of the grip to just past the butt. Remove the top liner. Twist the remaining tape and push into the butt.

STEP 3

LUBRICATE THE NEW GRIP

With an index finger over the end cap hole, pour or spray grip solvent into the grip. Close the mouth of the grip with your other index finger and shake to lubricate the entire grip.

STEP 4

INSTALL NEW GRIP

Pour or spray the solvent onto the tape to activate. Slide the mouth of the grip over the butt and push all the way onto the shaft. Align the grip and allow to dry.

THERE IS A
DRI·TAC
GRIP MADE ESPECIALLY FOR YOU!

DRI·TAC

Winn's Signature model
Traditional tapered profile

DRI·TAC WRAP

Classic Wrap with contoured, tapered profile

DRI·TAC :LT **New for 2020**

Less Tapered profile, larger lower hand diameter
Improves control and lighter grip pressure

DRI·TAC LITE

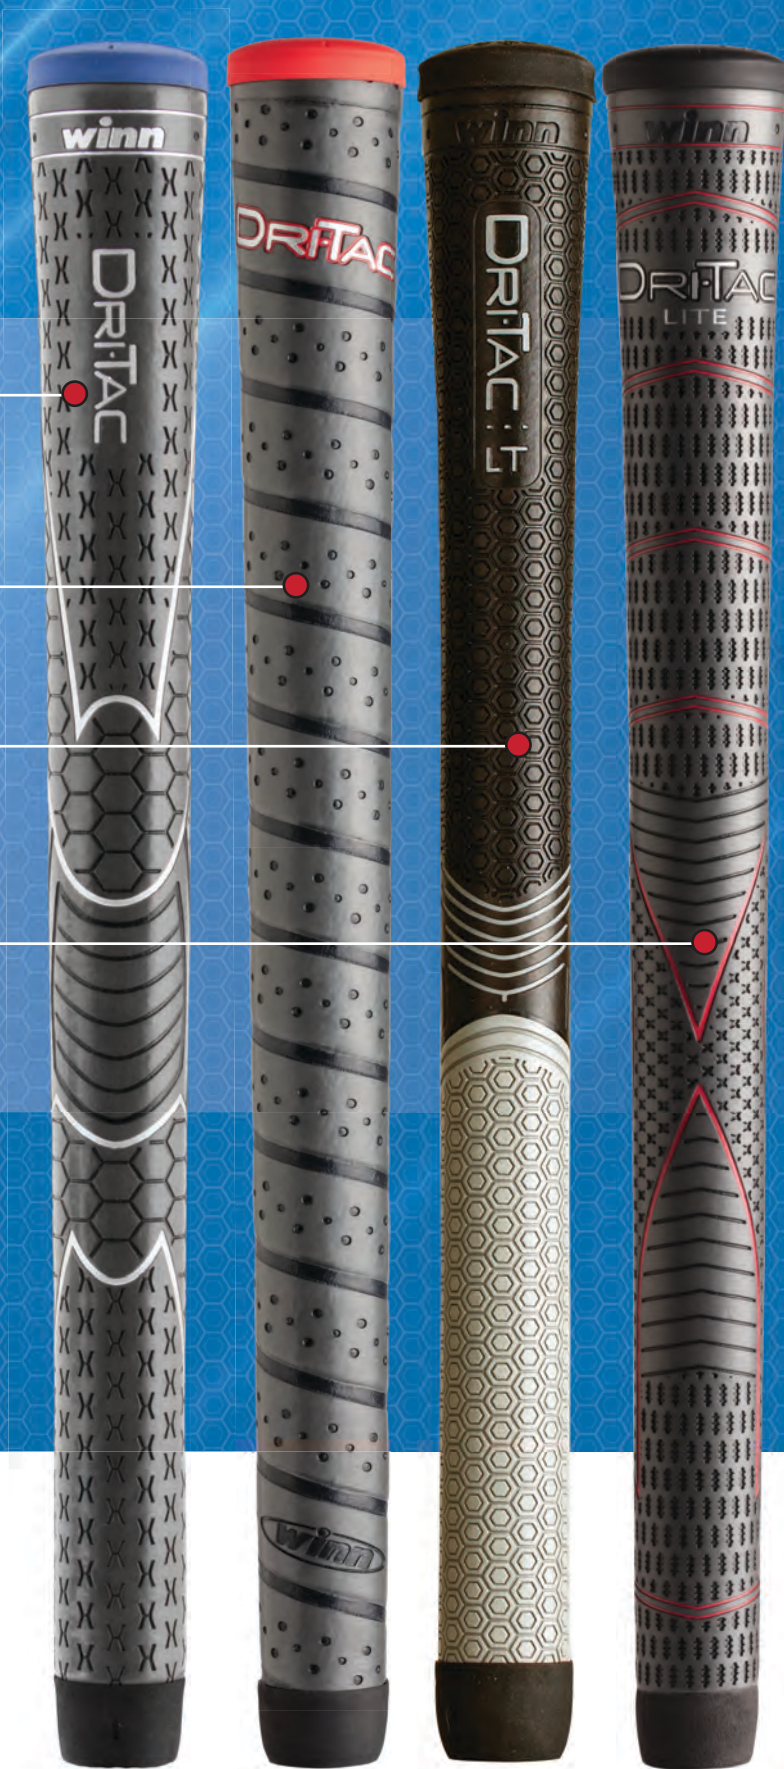

Reduced grip weight for better club head feel
Improves swing tempo and increases solid contact

All DriTac models offer a comfortable feel with exceptional shock-absorption & non-slip performance for a tension free swing. Winn DriTac series offer multiple colors, sizes, weights and profiles to customize your clubs.

DRI-TAC LT NEW

Winn's new Dri-Tac LT (less taper) was designed with a less tapered profile which offers a larger lower hand diameter. This feature offers better control and lighter grip pressure. For golfers suffering from arthritis or hand injuries, the larger lower profile offers easier gripping for less pain and fatigue. Dri-Tac material provides the shock absorption, non-slip comfort and performance in all DriTac grips.

RW237 Standard (0.600" round | 42g)

RW238 Midsize +1/16" (0.600" round | 43g)

RW239 Jumbo +1/8" (0.600" round | 47g)

WINN DRI-TAC

The DriTac is Winn's tackiest ever. The WinnDry polymer material combines a cushioned, comfortable feel with exceptional non-slip performance in all weather conditions. Rain or shine, the DriTac delivers.

RW223 Midsize Pistol (0.590" pistol | 74g)

WINN TOUR PISTOL PUTTER

Winn's Tour Pistol is designed for players who prefer a traditional size & shape putter grip. Well-defined edges offer accurate alignment & consistency. All models come in a unique tone-on-tone color look with an enhanced hexagon pattern, which provides great feel and slip-resistance, promoting light grip pressure.

RW197 Standard Red (0.590" pistol | 62g)

RW199 Standard Black (0.590" pistol | 64g)

WINN EXCEL NTP (NO-TAPER PISTOL)

Winn's NTP putter grip has a consistent no-taper unique pistol profile. The NTP is designed to promote light and even grip pressure to eliminate added movement during the putting stroke. The 1.10" diameter provides added stability. Textures designed for optimum traction and performance, combined with Winn's proven Excel polymer material for best results on the green.

RW234 Midsize Black (0.590" pistol | 126g)

RW235 Midsize Blue (0.590" pistol | 126g)

RW236 Midsize Red (0.590" pistol | 126g)

PRO X PUTTER

Offered in 3 sizes, the WinnPro X™ putter grips use a less tapered profile than traditional designs to eliminate wrist movement during putting while still delivering that comfortable, tacky feel you've come to expect from Winn. Extended non-tapered profile eliminates wrist movement during the stroke. Created using a comfortable, tacky Excel polymer and staggered tread pattern for ultimate feel.

ST HYBRID +2 WITH CALIBRATE NEW

Perfect for players seeking a grip that provides excellent all-around performance in a smoother, tackier and more tactile feel that also offers exceptional all-weather playability, the ST Hybrid Calibrate features a variety of breakthrough technologies, including the Calibrate reminder to promote consistent hand placement for better control and the all new "Smooth Tack" Genesis Material incorporated into two distinct zones to provide more traction in the upper hand and soft tactile feel in the lower.

RL101927 Standard (0.600" ribbed | 54g)

RL101928 Midsize (0.600" ribbed | 58g)

ST HYBRID +2 NEW

For any golfer looking for an all-around superior performing grip, the ST+2 Hybrid features Lamkin's newest "Smooth Tack" Genesis Material providing a great feel tacky surface that is long-lasting, comfortable, and far more wear resistant to degradation than standard rubber grips. Designed to provide traction in the upper hand and a soft tactile feel in the lower hand, golfers will fully experience the grips unique hybrid characteristics, thereby gaining more control over their shots.

RL101929 Standard (0.600" round | 53g)

RL101930 Midsize (0.600" round | 57g)

SONAR WRAP WITH CALIBRATE NEW

For golfers who prefer the feel of wrap style grips and looking for innovative technology designed to help their game the Sonar Wrap Calibrate is the first and only wrap grip featuring reminder technology promoting consistent hand placement and greater control of the club. A solid performer in all-weather conditions, the Sonar Wrap Calibrate is made from Lamkin's proprietary Genesis Material plus Fingerprint Technology to provide a tacky feel with excellent traction.

RL101925 Standard (0.600" ribbed | 53g)

LAMKIN SONAR TOUR WITH CALIBRATE NEW

For golfers with higher swing speeds seeking a high-performance grip to enhance shot-making from tee-to-green, Sonar Tour Calibrate features reminder technology to promote consistent hand placement and greater control of the club to better square the face at impact. It is purposefully engineered with Lamkin's proprietary tacky Genesis Material in a slightly firmer durometer and Fingerprint Technology for enhanced torsion control and consistent feel in any weather.

RL101924 Standard (0.600" ribbed | 53g)

LAMKIN SONAR

A new "comfortable performance" grip, SONAR is made with a softer-feeling material that feels great and provides outstanding torsion control. Straighter profile with a slightly larger lower hand promotes the ideal light pressure grip for greater consistency and control.

RL101902 Standard (0.600" round | 53g)

RL101926 Oversize (0.600" round | 77g)

RT01 Standard (0.580" round | 50g)

TACKI-MAC ITOMIC

Features a velvet surface, combined with a proprietary, ultra-tacky elastomeric compound for a very distinctive look and more importantly, feel.

RT05 Midsize +3/64" (0.600" round | 56g)

TACKI-MAC WRAP

The traditional perforated wrap style pattern provides a maintenance-free, ultra-tacky surface for superior traction and performance.

RA66 Jumbo (0.600" round | 81g)

RT12 Jumbo +3/32" (0.600" round | 65g)

TACKI-MAC UNIFIED WRAP NON-TAPER

This wrap-style grip is non-tapering rather than the traditional tapering. The larger bottom portion of the grip can help increase control as well as power into the shot.

TACKI-MAC ARTHRITIC

The unique serrated design gives outstanding control and feel for anyone looking for a 3/32" oversized grip. Excellent for golfers with weaker hand strength.

PURE PRO SERIES

With the PURE Pro, comfort and control are yours for the taking. Unique uniform traction is engineered to provide maximum feedback and control with a firm, tacky feel. The PURE Pro features a deep "W" shaped texture pattern around a seamless grip using PURE Grips' exclusive EPDM rubber compound.

RP11012 Undersize (0.580" round | 43g)

RP011132 Standard (0.600" round | 50g)

RP011232 Midsize (0.600" round | 59g)

RP021012 Undersize (0.580" round | 46g)

RP021132 Standard (0.600" round | 53g)

RP021232 Midsize (0.600" round | 63g)

RP031132 Standard (0.600" round | 48g)

RP031232 Midsize (0.600" round | 57g)

PURE WRAP SERIES

Great for those with joint strain concerns. The PURE Wrap features a symmetrical, perforated texture designed to minimize hand-and-wrist strain while delivering maximum comfort and performance. This classic grip was specifically engineered to offer a softer feel, reduced torque, and enhanced tackiness.

RP011332 Standard (0.600" round | 50g)

RP011432 Midsize (0.600" round | 60g)

RP12132 Jumbo (0.600" round | 80g)

RP021332 Standard (0.600" round | 53g)

RP091332 Standard (0.600" round | 48g)

RP091432 Midsize (0.600" round | 58g)

RP031332 Standard (0.600" round | 48g)

PURE DTX

PURE'S most aggressive grip gives a dual-texture for maximum control! The innovative PURE DTX grip combines the technology of PURE Grips' exclusive PURE Tack rubber compound with a heavy contrasting texture for the ultimate performance and connection with your club.

RP011532 Standard (0.600" round | 44g)

RP011632 Midsize (0.600" round | 54g)

RP091632 Midsize (0.600" round | 52g)

RP031632 Midsize (0.600" round | 52g)

RP11712 Black (0.580" paddle | 69g)

PURE CLASSIC PUTTER

For golfers that prefer a standard size putter grip with a soft tacky feel. The grip molds perfectly into your hands without any harsh or sharp edges and the tackiness gives you confidence over every putt.

RP11812 Black (0.580" pistol | 85g)

PURE MIDSIZE PUTTER

For golfers that prefer a slightly larger putter grip with a soft and tacky feel. The grip molds perfectly into your hands without any harsh or sharp edges, and the tackiness gives you confidence over every putt.

RP11912 Black (0.580" non-tapered | 121g)

PURE BIG DOG PUTTER

Designed for golfers that prefer an oversized grip with less taper. At about 120 grams, The Big Dog delivers a counter balance effect that increases the stability of the club head.

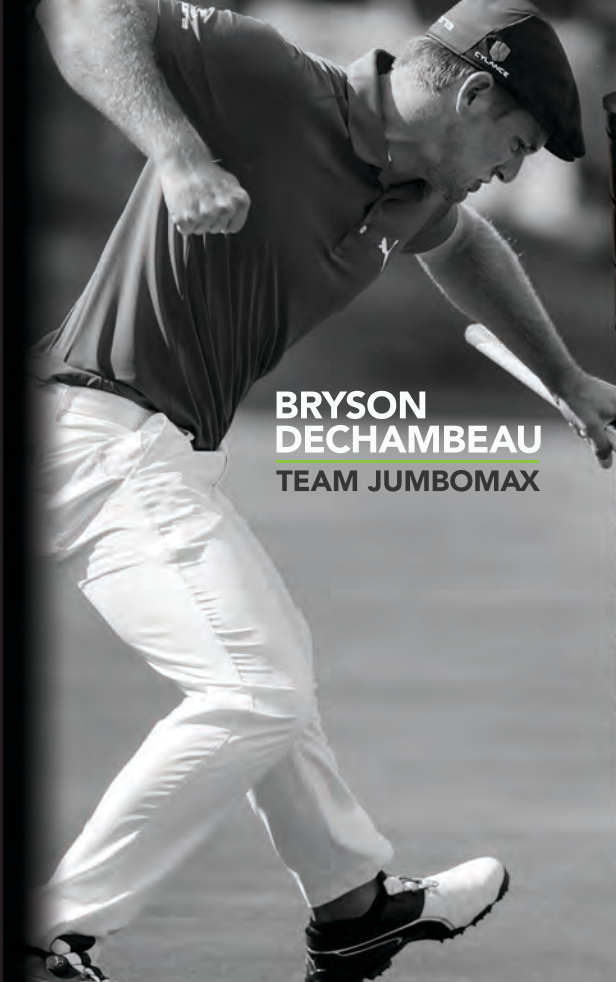

PURE TAPELESS INSTALLATION GUN

Combine the PURE installation gun with any standard air compressor to install PURE grips as securely as any adhesive tape. Once installed on a steel or graphite shaft, friction will ensure the grip will not loosen or slip.

TEAM JUMBOMAX

WRAP TOUR SERIES ULTRALITE

TOUR PROVEN PERFORMANCE

Bryson DeChambeau and JumboMax Grips

JumboMax™ grips provide incredible face angle awareness with maximum comfort and control. And now, the JMX UltraLite™ provides all the benefits of a JumboMax at less than half the weight.

Less grip pressure means longer, straighter golf shots, guaranteed. That's the JumboMax advantage!

JumboMax
GOLF GRIPS

STR8 TECH NON-TAPER **NEW**

Combines legendary JumboMax game-improvement with a non-tapered profile to maximize lower hand feel and face angle awareness. Decreases grip tension. Developed with input and real-world testing by some of the world's best instructors and tour professionals. The STR8 Tech grip also features a recessed cavity which will accommodate the Cobra Connect.

BLACK WRAP

RJM500-2200 Medium +5/16" (0.600" round | 105g)

TOUR SERIES

RJM550-2200 Medium +5/16" (0.600" round | 105g)

JMX ULTRALITE **NEW**

The JMX UltraLite grips are a breakthrough in grip technology offering the stability and control of our patented JumboMax grips at around half the weight. Not possible until recent manufacturing innovations, the JMX UltraLite grips are for the player who wants all the stability and control of our oversized grip technology, while retaining the feeling of more weight in the club head.

RJMX600-1100 Small +1/4" (0.600" round | 46g)

RJMX600-2200 Medium +5/16" (0.600" round | 47g)

RJM430-6600 X-Large +3/8" (0.600" round | 120g)

JUMBOMAX WRAP

The patented JumboMax grip gives you a stronger, yet more relaxed grip on the club for longer shots and incredible accuracy.

The performance characteristics of JumboMax Grips are achieved through a twist-resistant, high-energy transfer core, while the ultra-tacky, shock-absorbing outer layer enhances feel and playability in a variety of weather conditions.

RJM1000 Jumbo Jr. +1/8" (0.600" round | 87g)

RJM1100 Small +1/4" (0.600" round | 95g)

RJM2200 Medium +5/16" (0.600" round | 105g)

RJM4400 Large +11/32" (0.600" round | 113g)

RJM6600 X-Large +3/8" (0.600" round | 120g)

JUMBOMAX MID-JUMBO PUTTER

The slightly tapered, moderately oversized profile of our Mid-Jumbo Putter Grip promotes reduced grip pressure and stabilizes the hands throughout the putting stroke for improved accuracy. Features a twist-resistant, high-energy transfer core and an ultra-tacky outer layer for enhanced feel and playability in a variety of weather conditions.

RJMP3000 Jumbo Putter White (0.580" paddle | 98g)

RJMP2000 Jumbo Putter Black (0.580" paddle | 98g)

GARSEN EDGE

Unlike a traditional putter grip, the G-Pro Edge places your hands in a position so the palms face each other and the wrists are in a neutral position. It turns your elbows into your body and sets your shoulders back. This relieves arm and shoulder tension, inhibits wrist action, which takes "the hands out of the putting" and promotes shoulder rotation, creating a solid putting stroke, which will give you a one-piece feel, leading to a more consistent stroke.

GARGR101 Midsize Black (0.580" semi-tapered paddle | 73g)

GARGR103 Midsize Blue (0.580" semi-tapered paddle | 73g)

GARGR102 Midsize Red (0.580" semi-tapered paddle | 73g)

GARGR104 Midsize White (0.580" semi-tapered paddle | 73g)

G-PRO MAX AND G-PRO MAX 15"

Unlike a traditional putter grip, the G-Pro Max places your hands in a position so the palms face each other and the wrists are in a neutral position. It turns your elbows into your body and sets your shoulders back. This relieves arm and shoulder tension, inhibits wrist action, which takes "the hands out of the putting" and promotes shoulder rotation, creating a solid putting stroke, which will give you a one-piece feel, leading to a more consistent stroke. Available in standard length and a 15" version.

GARGR201 Jumbo Black/White (0.600" semi-tapered paddle | 60g)

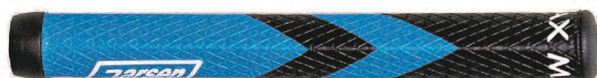

GARGR202 Jumbo White/Black (0.600" semi-tapered paddle | 60g)

GARGR203 Jumbo Black/Red (0.600" semi-tapered paddle | 60g)

GARGR204 Jumbo White/Red (0.600" semi-tapered paddle | 60g)

GARGR205 Jumbo Black/Blue (0.600" semi-tapered paddle | 60g)

GARGR206 Jumbo White/Blue (0.600" semi-tapered paddle | 60g)

GARGR401 Jumbo Black/White (0.600" semi-tapered paddle | 85g)

GARGR402 Jumbo White/Black (0.600" semi-tapered paddle | 85g)

GARGR403 Jumbo Black/Red (0.600" semi-tapered paddle | 85g)

GARGR404 Jumbo White/Red (0.600" semi-tapered paddle | 85g)

GARGR405 Jumbo Black/Blue (0.600" semi-tapered paddle | 85g)

GARGR406 Jumbo White/Blue (0.600" semi-tapered paddle | 85g)

G-PRO ULTIMATE

the G-Pro ULTIMATE has three flat sides. Like the original G-Pro design it allows you to place your hands in a position so the palms face each other and the wrists are in a neutral position. It also allows you to place hands into many other positions creating your desired grip. It works extremely well with the claw grip. This grip was developed with input from players on the PGA Tour.

GARGR301 Standard Black (0.600" non-tapered | 55g)

GARGR302 Standard Red (0.600" non-tapered | 55g)

GARGR303 Standard Blue (0.600" non-tapered | 55g)

QUAD TP PROTOTYPE AND QUAD TOUR

The QUAD grip was designed with a more traditional hand placement but with the benefits of the original grips which helps turn your elbows into your body and sets your shoulders back. Available in two different shapes; a traditional tapered profile and a non-tapered profile.

GARGR501

Midsize Red/Blue (0.600" tapered 4-sided angled | 70g)

GARGR502

Midsize Red/Blue (0.600" tapered 4-sided angled | 70g)

GARGR504

Jumbo Red/Blue (0.600" non-tapered 4-sided angled | 55g)

GARGR505

WE WROTE THE BOOK ON CLUBMAKING & CLUBFITTING

MODERN GUIDE TO CLUBMAKING BOOK

Now in gorgeous 152 pages full color! The 6th edition Modern Guide to Clubmaking book explains in detail the proper procedures for modern clubmaking and the first one ever produced in color! Step-by-step photos and detailed text explain how to assemble clubs, trim shafts, installation of grips - every procedure to properly assemble component clubs. There are also more advanced discussions on such topics as setting up a shop, how components are manufactured, frequency and moment of inertia matching to common repair procedures such as finishing a through bore, extending a club, bending an iron to re-boring a hosel. This comprehensive book is perfect for anyone interested in the craft of clubmaking.

Model: # MCB6

- How to efficiently organize your clubmaking shop
- How to select tools based on shop size
- Step-by-step instructions for all types of modern assembly
- Which method to use - manual or mechanical
- Hundreds of photos detailing each step of the process
- Complete discussion on shafts including identification, construction and installation techniques
- Comprehensive look at grip installation including custom sizing
- How to pre-calculate swingweight before ever putting the club together
- Common repairs and more advanced applications such as finishing a through bore, extending a club, bending an iron to re-boring a hosel

MCB6 + MGC Book Bundle

MODERN GUIDE TO GOLF CLUBFITTING BOOK

This all-new text is written by Hireko's Technical Director Jeff Summitt who has spent more than 20 years helping fit and educating fellow golfers in selecting the proper equipment for their game. The 256 pages is full of modern approach that details the different concepts of fitting and applicable to professional club fitters down to those that simply want to learn more about the equipment they play. Covers everything you want to know and more about custom fitting, including: getting started, the personal interview, cause and effect relationships, a comprehensive discussion on clubhead anatomy, grip sizing and materials, role of the shaft, vital importance of length and weight as well as complete step-by-step fitting breakdown for each clubhead category set in a logical sequence.

Model: #MGC

- The concept of fitting from various degrees and not one cookie cutter approach
- What your club fitting operation will need
- Personal interview questions do's and don'ts
- Hundreds of diagrams detailing each club head parameter as well as the basics of the swing
- Taking the myths out of custom grip fitting and sizing
- Complete discussion on shaft fitting and role of the shaft in the swing
- A comprehensive look at perhaps the most important fitting factor; length
- The function of weight and weight distribution and how each component contributes
- Practical and modern step-by-step procedures for each club head category in the most logical sequence (Driver, Putter, Irons, Wedges Fairway & Hybrids)
- Insight on fitting those least served; women and juniors
- Ball fitting

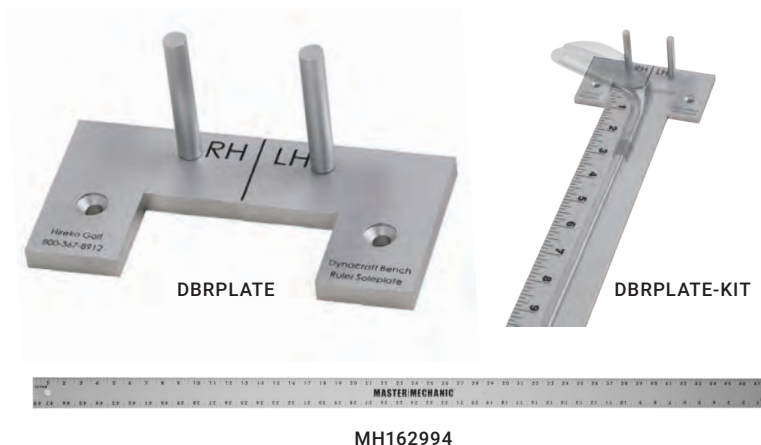

THE DYNACRAFT BENCH RULER SOLEPLATE

Measure club length quickly, easily and accurately! Simply slide edge of ruler inside slot, lay club face down with shaft centered on ruler and rest sole against the vertical pin. Takes up minimal space and can be screwed onto your workbench. Measures both RH and LH golf clubs and works for all clubs including woods, hybrids, irons, wedges and putters.

DBRPLATE Dynacraft Bench Ruler Soleplate

MH162994 48" Clublength Ruler

DBRPLATE-KIT Dynacraft Bench Soleplate with 48" Ruler Kit

MH162994

THE FERRULE BLOCK

More than just a fast, efficient way of installing ferrules onto the shaft, the Ferrule Block is an indispensable combination measuring tool that will become a mainstay on any clubmaker's workbench.

Model: #FBLOCK

- Counter-bored recess seats the ferrule to allow easy push-down installation.
- Accepts all standard sized ferrules from 0.335" to 0.370".
- Built-in gauges measure butt and tip diameter.

Precision milled to ensure accuracy

Place the ferrule into the recess and tamp down to seat onto the shaft

Butt diameter gauge

Tip diameter gauge

DYNACRAFT LIE FITTING BOARD

The Dynacraft Lie Fitting Board is used to determine the correct lie for a golfer. Hit balls off the textured surface and it leaves a black mark on the club's sole which can be easily wiped off and requires no special tape. Hole allows ball to sit without rolling and positioned forward to increase effective strike area. Approximately 1/8" x 8" x 16".

Model: #DY702977

DEMO CLUB TAPE

A durable polyethylene plastic tape that's perfect for protecting club heads from damage during demos and fittings. 3" x 18 yard roll with perforations every 4".

Model: #BRP07

DYNACRAFT GRIP REMOVAL TOOL

The Dynacraft Grip Removal Tool removes most grips for re-use. Offset handle and sturdy blade makes quick work along with a little solvent.

GRT

UNEK SCRAPER

This scraper is the fastest and safest way to remove grip tape from graphite or steel shafts. Equipped with ergonomic handle.

BRP06

RUBBER VISE CLAMP

Used with a shop vise to protect the shaft and hold the club securely in place during assembly/ disassembly.

RAVC-001

MIT028

PRESSURIZED GRIP REMOVER REPLACEMENT NEEDLE

Loosens the grip for easy removal by injecting solvent through the needle. Works in conjunction with the pressurized grip remover gun or grip remover extension hose. Sold individually.

EPOXY MIXING STICKS

Simple clean way of mixing & applying epoxy.

MIT048 Wooden sticks (100 pack)

CHROME CLEANER

Removes heat mark left on the hosel after shaft removal. Works on all metal.

CHROME 4 oz. Jar

RATTLE TRAP

Eliminates head rattles by trapping loose debris. Put a few drops inside the hosel and allow it to flow inside the head. No mixing required.

RS-001 4 oz. Bottle

RTSYR 1 oz. Syringe

EPOXY DISPENSING GUN

Gun applicator for use with epoxy cartridges: EPCART and EP06 and Brampton's BRP10, BRP11 and BRP12. Mixes 1:1 ratio.

EPGUN

HOSEL DISC PLUGS

Place at the bottom of the hosel of metal wood hosels to prevent epoxy from dripping into the head and creating a rattle.

GDW9016 25 pack

BRASS SHIMS

Fit conventional shaft tips into clubheads with oversized inside hosel diameters. Sold individually.

JSSHIM-STD
Standard (0.015" gap)

JSSHIM-OS
Oversize (0.030" gap)

SHAFTING BEADS

Align, center and cushions shaft. Eliminates off-center shafts and uneven bonds. Add to mixed epoxy 3 - 5% by volume.

SB-001 4 oz. Jar

BRAMPTON BLACK PIGMENT

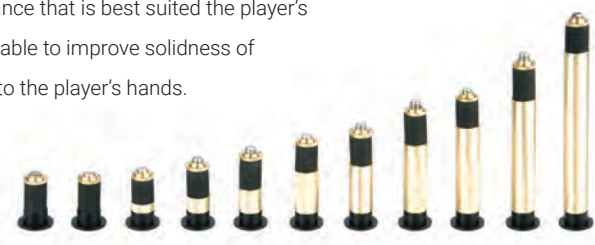

Mix with Brampton epoxies (or any other clear epoxy) to tint the color to black.

BRP13 2 oz. Bottle

TOUR LOCK PRO PLUS COUNTERWEIGHT

Optimize the static weight and balance of a golf club to enhance the performance that is best suited the player's natural swing. New and improved weights are easily installed and interchangeable to improve solidness of contact, accuracy, feel and distance by shifting the balance of the club closer to the player's hands.

- Stronger and longer lasting rubber locking plug
- No rattles; No stripping; Patented technology
- Fits all steel and graphite shafts .480" inside diameter and larger
- Easier installation and removal
- Compatible with all grips modified with TLP grip modifier
- Compatible with all SuperStroke threaded cap grips
- Conforms to the USGA and R&A Rules of Golf

TLP GRIP MODIFIER

Tool used to modify any grip and create a precision-cut hole in the butt end for the use of all Tour Lock Pro and Opti-Vibe weights.

TLGM

PLASTIC END CAP

Plastic end cap snap in place and fills hole vacated by grip modifier.

TLPCAPS

TOUR LOCK FASTENING TOOL

L-shaped wrench used for installing, adjusting, locking and removing Tour Lock Pro Weights.

TLPFT

OPTI-VIBE DUAL TOOL

Proprietary tool used for installing, adjusting, locking and removing Opti-Vibe Weights.

TLDT

ECONOMY COUNTERWEIGHTS

Counter-balancing is the hottest new trend in golf. These easy to install plugs help improve distance and consistency by shifting the balance point of the club closer to the hands and helping the club swing faster. They are also great for over-length clubs. Simply insert into the butt end of the shaft prior to installing the grip. Specify steel or graphite shaft. The models for steel will fit shafts with a 0.600" butt or larger.

NOTE: 4g = 1 swingweight. Graphite counterweights have a 0.470" stem; steel is 0.550"

Counterweights
Fit right into the butt of
the shaft.

Standard counterweights

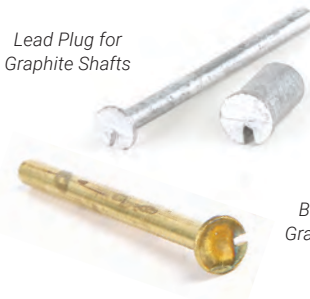

Putter counterweights

SHAFT TIP WEIGHT PLUGS

Use weight plugs to add weight to towards the clubhead. All plugs are inserted into the tip end of the shaft. 7.5 g brass weight may be trimmed to desired weight/length.

MODEL	USAGE	MATERIAL	QTY	PRICE
BW05W	Fits graphite shafts 7.5g	Brass	30 pcs	\$21.95
BW15I3	Fits 0.370" steel iron shafts 3g	Lead	30 pcs	\$3.95
BW15I5	Fits 0.370" steel iron shafts 5g	Lead	30 pcs	\$3.95
BW15I7	Fits 0.370" steel iron shafts 7g	Lead	30 pcs	\$6.95

BW15W7	Fits steel 0.335" wood/ 0.355" iron shafts 7 g	Lead	30 pcs	\$6.95
LWGI	Fits graphite shafts 3 g	Lead	30 pcs	\$3.95
LWGW	Fits graphite shafts 5 g	Lead	30 pcs	\$3.95

Lead Plug for
Graphite Shafts

Lead Plug for
Steel Shafts

Brass Plug for
Graphite Wood or
Iron Shafts

TUNGSTEN POWDER

Tungsten powder has superior density properties to lead powder, non-toxic and much safer to handle.

TG2 8 oz. Jar Powder

TG1 4 oz. Jar Powder

IRON CORKS

Tamp down with steel ram rod to hold tungsten powder in place. Fits 0.370" parallel and 0.355" taper tip steel iron shafts.

CORKS 25 Pack

REPAIR TAGS

Two-part tags are great for identifying customer clubs and avoiding embarrassing mistakes.

MIT056 100 Pack

LEAD TAPE

Self adhesive lead tape may be placed anywhere on the clubhead to fine-tune swingweighting and clubhead performance. 100" Roll.

LT100

DRILL BITS

Use these bits to clean out and/or make hosel bore the correct size

MIT018 8.6 mm Bit (0.335")

MIT019 9.4 mm Bit (0.370")

SHAFT CUT-OFF WHEEL

6" dia. x 0.35" thick wheel cuts both steel & graphite. 1/2" arbor hole.

MIT016 6" x 0.35"

SPIRAL DEBURRING

ROLL & MANDREL

Use in drill to clean out hosels after re-shafting or prior to assembly for best bond.

SDRM Mandrel & 5 deburring rolls

SDRR 5 Deburring rolls

GIVE YOUR IRONS THAT HIGH END LOOK

CUSTOM IRON FERRULES

Premium iron manufacturers are using longer, custom ferrules in their irons. Now you can achieve the same high-end look! These 30mm (1.2") long custom iron ferrules fit both standard parallel and taper tipped iron shafts. Pre-sized outer diameter (OD) for a better fit. Sold 12 per package. 13.6mm OD. (fits stainless irons and hybrids).

STANDARD FERRULES

Fits standard parallel 0.370" iron/hybrid shafts & 0.335" woods. Standardize base requires little to no turning of ferrules: Irons (13.6mm base), Titanium Drivers (12.6mm base), Stainless Fairways (12.2mm base). The FR1013TG is designed to fit the zinc alloy irons or any iron that requires a larger 14.8mm base. All ferrules sold 12 per package.

SPECIALTY FERRULES

0.355" Taper Tip Iron Ferrule

Non-collared ferrule designed to fit popular irons and wedges that use 0.355" taper tip shafts. 0.545" OD. 12 pcs/pkg.

GDW9355

0.350" Wood Ferrule

1/2" non-collared universal ferrule for woods. 0.350" ID x 0.485" OD. 12 pcs/pkg.

GDW4020

PARAGE SHAFT EXTENDERS

High-quality nylon blended plastic designed to extend one club (maximum 2" for swing clubs). Will work with most graphite shafts as well as the 3 largest models will fit 0.560", 0.580" and 0.600" steel shafts respectively.

PGGSE-470-LG Fits 0.470" ID

PGGSE-485-WH Fits 0.485" ID

PGGSE-490-BL Fits 0.490" ID

PGGSE-495-PK Fits 0.495" ID

PGGSE-500-GD Fits 0.500" ID

PGGSE-5075-OR Fits 0.5075" ID

PGGSE-515-YL Fits 0.515" ID

PGGSE-5225-GN Fits 0.5225" ID

PGGSE-530-RD Fits 0.530" ID

PGGSE-5375-CP Fits 0.5375" ID

PGGSE-545-PU Fits 0.545" ID

PGGSE-560-BK Fits 0.560" ID

PGGSE-575-SI Fits 0.575" ID

ID = inside diameter of the shaft

**STEEL SHAFT EXTENDER**

Steel shaft extenders provide exacting fit for most steel shafts. Extends 2 clubs.

EX580 0.580" OD Extender fits steel shafts with 0.540" ID

EX600 0.600" OD Extender fits steel shafts with 0.560" ID

**PARAGE SHAFT EXTENDER MEASURING GAUGE**

This device helps simplify and determine the correct Parage shaft extension for the job. To use, simply insert the gauge into the butt end of the shaft you wish to extend without forcing it in. When the gauge stops, you identify the color just above the butt of the shaft, which corresponds to the Parage Shaft Extender color.

PGGSMG

SANDING BELTS**GRAPHITE SHAFT SANDING BELT**

For graphite shaft tip abrasion.

MIT015 1" x 42"

**STEEL SHAFT SANDING BELT**

For steel shaft tip abrasion.

MIT012 1" x 42"

**FERRULE DRESSING BELT**

For turning down ferrules.

MIT014 1" x 42"

**ROD SAW BLADE**

The ideal tool to cut graphite and composite shafts safely and efficiently with the long-lasting tungsten carbide cutting edge. Fits any standard 12" hacksaw frame. TIP: Wrap the shaft with making tape where you want to cut, mark the tape and cut along the mark to prevent fraying or splintering.

SPECIAL TRIM NOTES

- C** For fairway woods, tip trim 1" For hosels with bore-depths greater than 2", Aldila recommends blind-boring the shaft in the hosel 1 3/4". (Applies to certain Aldila wood shaft only).
- D** Do not tip trim more than 3" off the tip (applies to select shafts only).
- F** For blind bore fairway woods tip trim 0.5" and for thru bore clubs only insert tip 2".
- G** For blind bore tip trim 0.5" less than stated and for thru bore take 1" less off than stated.
- H** For thru bore driver insert tip 2" only and for thru bore 5-9 wood tip trim 0.5".
- I** For higher ball flight and 5 cpm less, trim 1" less than stated. For a slightly lower ball flight and 5 cpm more, trim 1" additionally than stated. (Applies only to select SK Fiber shafts).

STANDARD BORE

Approx 1.5" (driver) or 1" (fairway) from shaft to ground.

THRU BORE SHAFT

Penetrates all the way through the head.

BLIND BORE

Approx 0.5" from shaft to ground

TIP TRIMMING INSTRUCTIONS FOR HYBRIDS, IRONS AND WEDGES

Special Note

Some hybrid shafts are trimmed based on the loft of the club. For those that are not or if you are using an iron shaft, tip trim based on the clubhead weight. For the length on all hybrids, use the clubhead weight to determine the proper length. Not all hybrids will weigh the same, thus special attention must be made for this category.
