

HILSCHER. ALWAYS THE RIGHT SOLUTION

„Industrial communication requires cutting-edge technology packaged in a minimum of space for the production processes of our modern world. It is fascinating to be part of this development. It is highly satisfying to shape things right from their beginnings. It is a truly fulfilling job to set up an enterprise for this purpose.

There are no solutions without passion. We gain experiences, think further, communicate way ahead of time, allow inspiration to carry us away, we are experimental and courageous. That's how we develop innovative solutions for the world of industrial communication.

We do not view the relationship with our customers as a short term procedure or a one time event. Instead, we live a partnership characterized by continuity and competence.“

Sebastian Hilscher
CEO

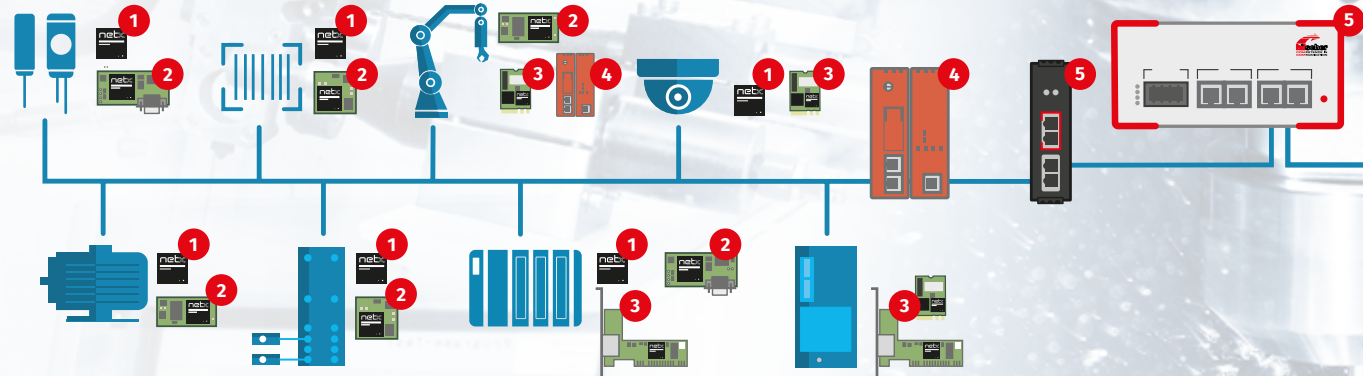

- ✓ More than 30 years of experience
- ✓ Local support for global customers
- ✓ Clear focus on industrial communication
- ✓ Family owned international corporation

YOUR APPLICATIONS. ALL NETWORKS. ONE TECHNOLOGY. netX

With more than five million controllers worldwide, our **netX** technology is well established in the market. The most powerful feature of the **netX** technology is the advantage to serve all networks typical in industrial communication with only one controller.

With its scalable platform and multi-network support, **netX** will future-proof your applications. Let **netX** build a secure position for your company as a leader in the field of industrial communication. No matter what type of communication solution you need for your device: **There is no other provider on the market that is able to offer you such an extensive portfolio of solutions.**

- ✓ One technology for all protocols as master or slave
- ✓ Scalability Platform to implement your application
- ✓ Easy to integrate
- ✓ Short time-to-market
- ✓ Proven & reliable technology - more than five million **netX** based solutions sold

1 Network Controller

2 Embedded Modules

3 PC cards

4 Gateways

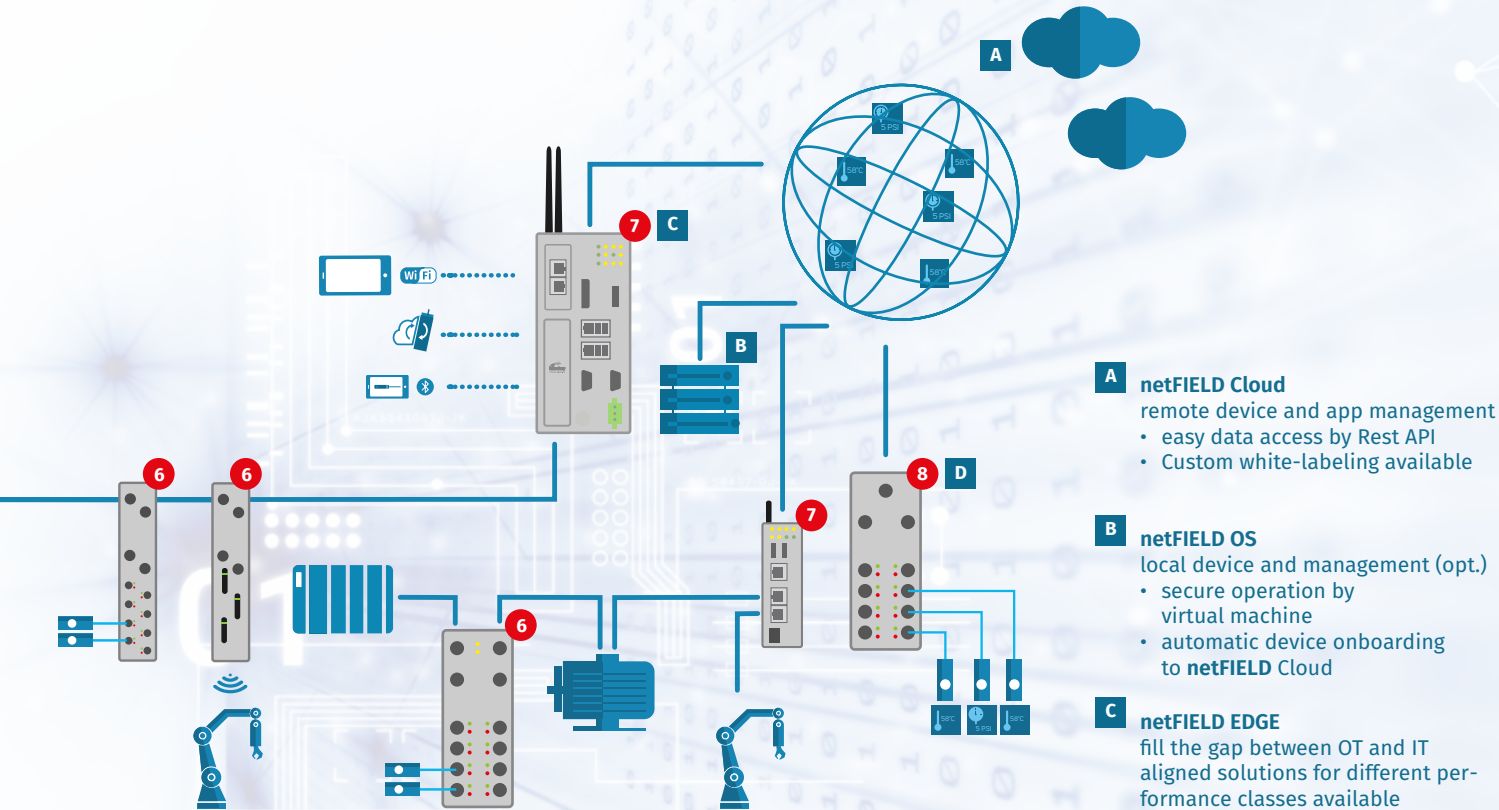

5 Analyzer & Data Acquisition

MANAGE MILLIONS OF DEVICES FROM ANYWHERE. **netFIELD.**

netFIELD and related hardware components are your technology enabler for new business models and services.

Our solutions are designed to work seamlessly with your Docker based environment. This gives you the freedom to generate new ideas and new opportunities for your business. **netFIELD** is the enabler for IoT applications in brownfield and greenfield installations. Easily integrated and configured within minutes!

A netFIELD Cloud
remote device and app management
• easy data access by Rest API
• Custom white-labeling available

B netFIELD OS
local device and management (opt.)
• secure operation by virtual machine
• automatic device onboarding to **netFIELD Cloud**

C netFIELD EDGE
fill the gap between OT and IT
aligned solutions for different performance classes available
• Real-Time Ethernet support
• perfectly integrated into **netFIELD OS** and **netFIELD Cloud**

D sensorEDGE
connects up to 8 IO-Link sensors directly with the Cloud
• fast and easy auto configuration
• dashboard visualisation for sensor data

6 netFIELD Devices (IO-Link)

7 netFIELD EDGE (Gateways)

8 sensorEDGE (Gateway)

- ✓ Complete secure system architecture from OT to IT
- ✓ Continuous expansion and customizing of the entire system either by your own application, through Hilscher or 3rd parties
- ✓ Centrally manage your device from the **netFIELD.io** portal or via your own solution

YOU NEVER WALK ALONE! PARTNERSHIP IS THE KEY TO SUCCESS. WORLDWIDE.

IoT is only successful when knowledge is combined. The technology of a communication specialist is combined with the know-how of a solution provider and the expertise of a system integrator. The **netFIELD.io** concept presents a simple implementation of this idea based on an easy to use system architecture in which all partners can use their specific skills. A fast realization of the project, a short time to market and a reliable ROI are guaranteed.
Let's work together!

”

„We closely cooperate with Hilscher, one of our strategic partners within the Open Industry 4.0 Alliance, in the development of digital services. With Hilscher Industrial IoT Technology we can collect and manage machine data to create additional value for our customers.“

”

„Hilscher's technology has made it possible to implement our IIoT project quickly and cost-efficiently. Our applications provide the plant operator with a very good overview of the status of the production process. Problems are detected instantly and can be fixed without delays. A WIN-WIN situation for all.“

”

„With Hilscher we found an ideal partner to realize our IIoT projects in industrial- and press-automation. Hilscher's netFIELD technology together with the always immediate and competent support allowed an efficient integration of our Digitalization strategy to our automation solutions.“

GÜDEL

- ✓ Competent technology partner in global automation markets
- ✓ Continuously growing customer and partner base
- ✓ Local support worldwide
- ✓ Individual training programs and workshops
