MOLD CONSTRUCTION

# MOLD MAKING

Henneke Formbau GmbH has its roots in mold making.

In 1988, when Frank Henneke went into business for himself, his main focus was on specialization in the molding of ceramic and fire resistant components. During the course of the years, this technology has advanced – and so has Henneke:

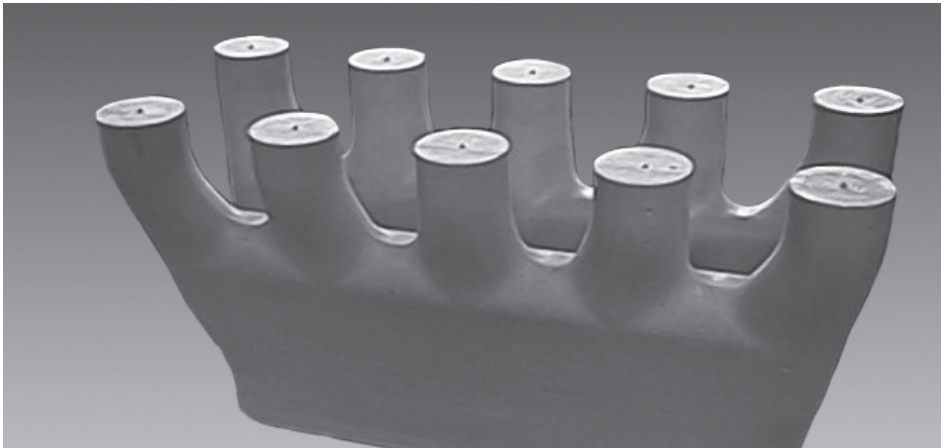

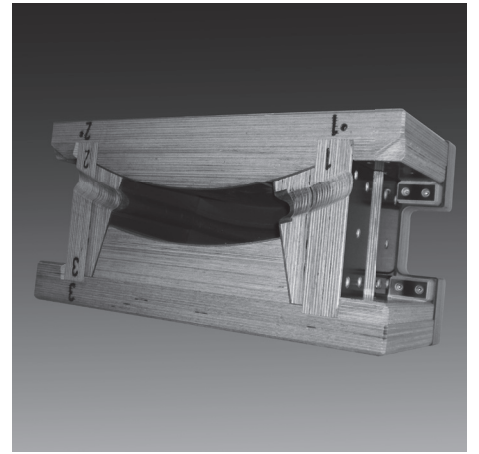

In the meantime, using state-of-the-art CNC and CAD technology, molds can be planned and produced digitally with millimeter precision.

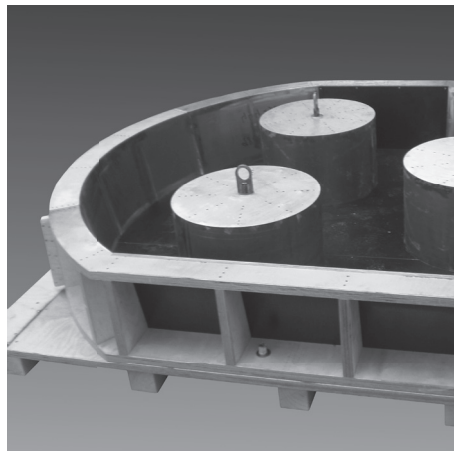

Henneke Formbau GmbH is now a market leader in the area of mold construction. It could be time for you to consider optimizing your component manufacturing process. Let us know what you have in mind. Together we will find a solution.

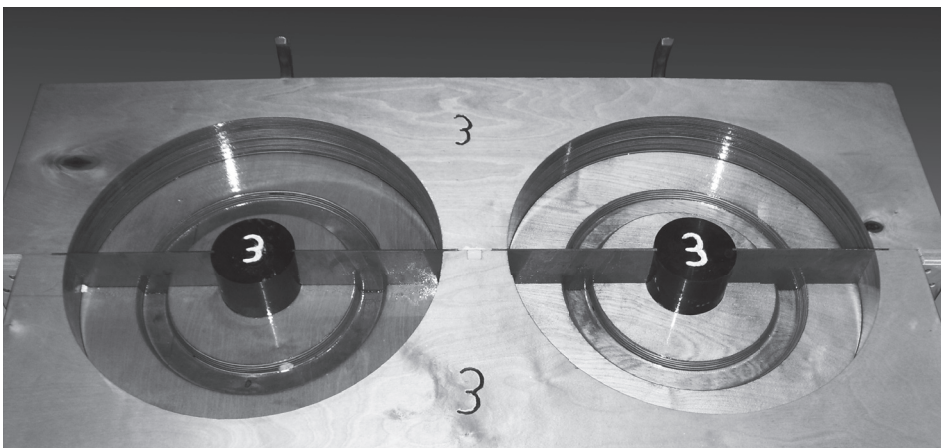

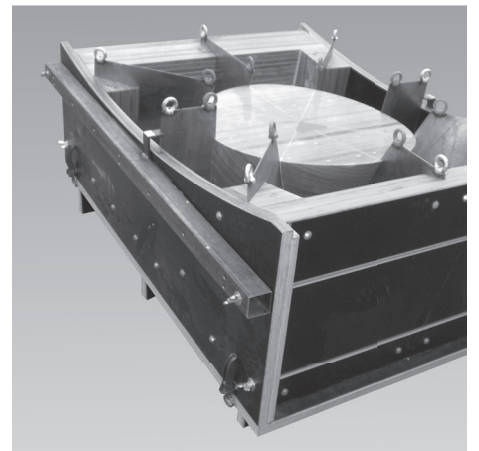

Plated molds for stamped components

Disposable molds and Styrofoam cores

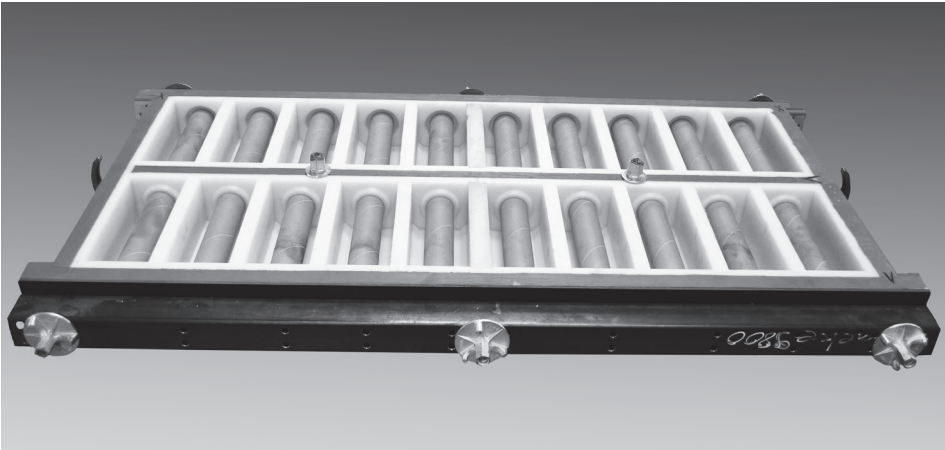

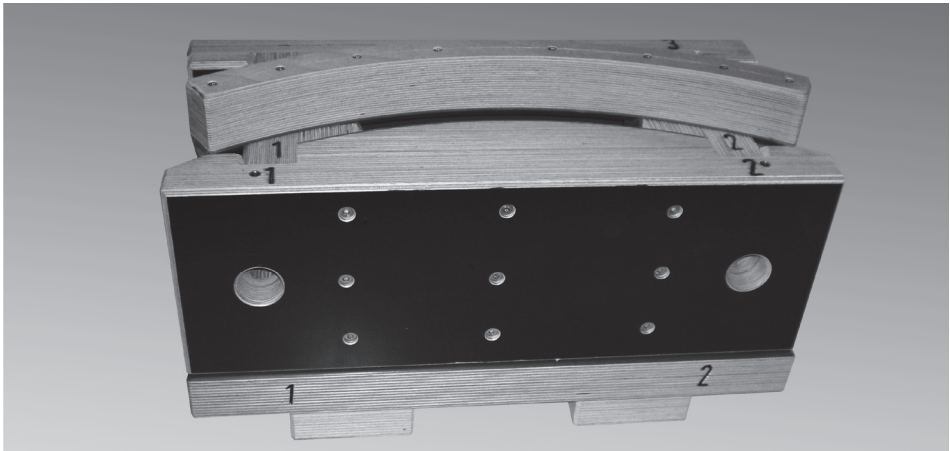

Large-format molds for EAF lids

Casting mold for 12-piece inspection opening component

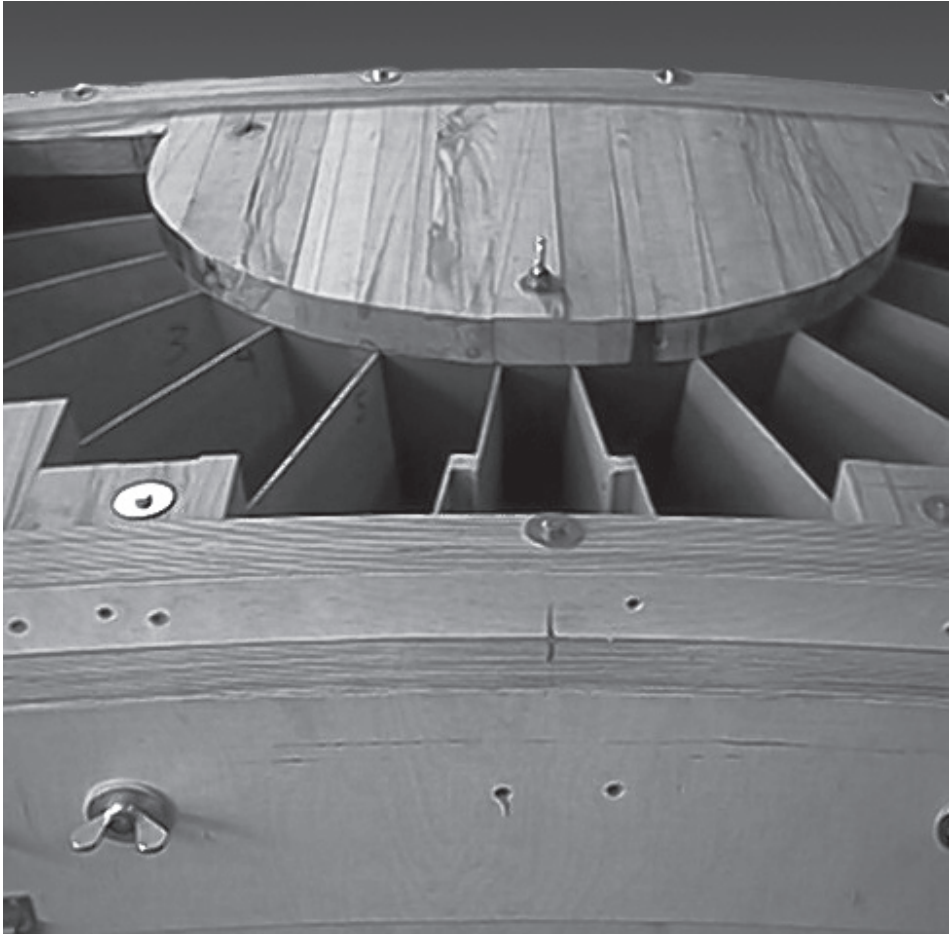

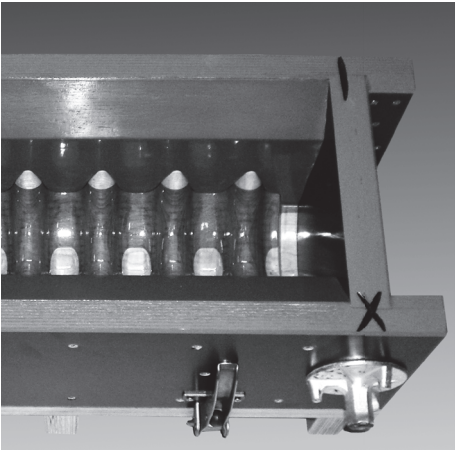

Mold for segment component with tongue and groove

20-fold mold with plastic lining for large quantities

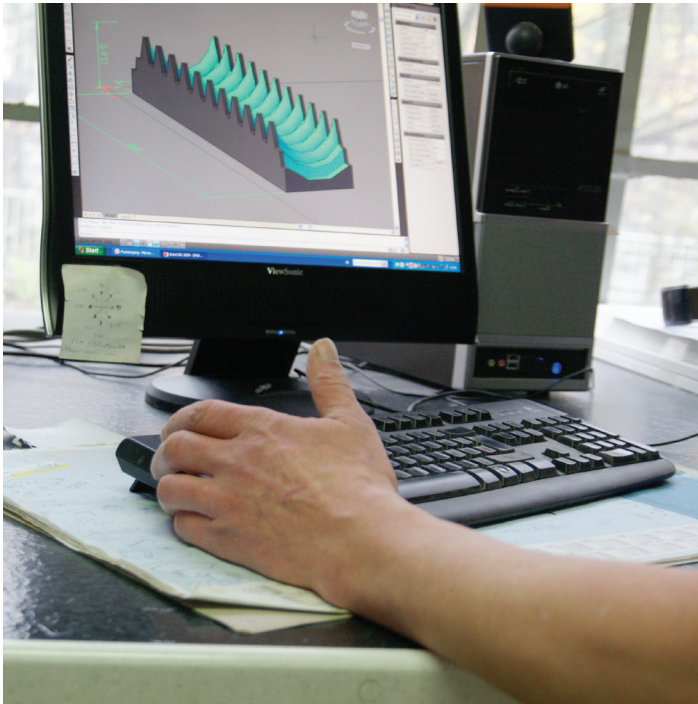

Stamped mold for manhole

Below: Casting mold with 3-D milled insert

## MOLD CONSTRUCTION

## MOLD CONSTRUCTION

Enriched by knowledge and experience gained also with new materials and technologies during the course of our business operations over the years, our offering in the area of mold making includes:

- **SPECIAL MOLDS FOR THE REFRACTORY INDUSTRY**
- **PLATED STAMPED MOLDS**
- **CAST MOLDING WITH PLASTIC LINING AND FIXED OR FLEXIBLE CORES**
- **DISPOSABLE MOLDS MADE OF STYROFOAM AND WOOD-BASED MATERIALS**

Complicated challenges are met by us with customized solutions. Thus, we can use synthetic resins to realize complex contours for precast concrete parts. For assembly, we use formworks and cores of Styrofoam as well as CNC-milled plywood formwork and blanks. We also manufacture fitments made of plywood or multiplex gauges, plastics and artificial resins.

We are sure to find the right solution for you. Approach us.

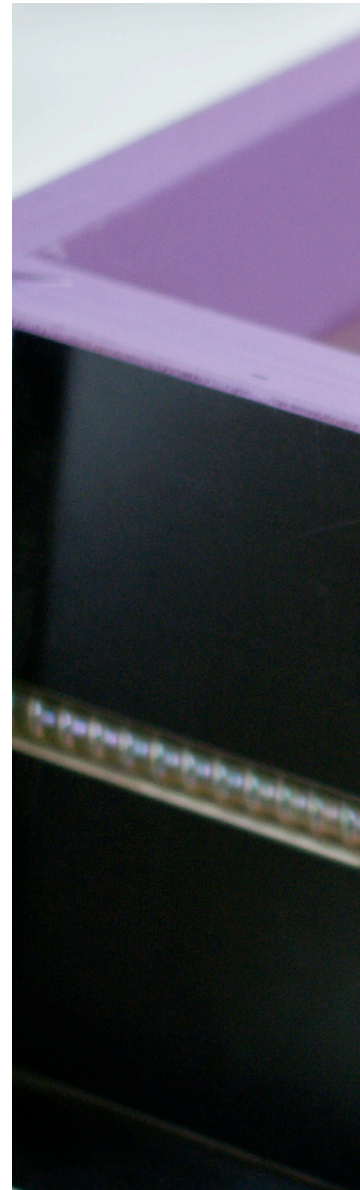

FORM STRUCTURES BASED ON CUSTOMER SPECIFICATIONS.
