Pierre Génin

In 2010, Pierre Génin put his 20 years of experience in luxury at Dior and Cristallerie Daum to work breathing new life into this 50-year-old company. He collaborates with the leading French and international decorators and architects while upholding the values that have made Lum'art successful.

Lum'art offers a unique, refined way to showcase the most beautiful indoor and outdoor spaces with high-end lighting solutions that elegantly combine functionality, authenticity and design.

Lum'art is a genuine French artisan company that designs and makes lighting solutions entirely by hand in its workshops in the Perche, 130km from Paris.

INDOOR AND OUTDOOR LIGHTING SOLUTIONS

Lum'art's catalogue of indoor and outdoor lighting solutions lists over 500 items.

For interiors, the catalogue features chandeliers, wall lights, table lamps, lanterns, spotlights, floor lamps, pendants, picture lights and porthole lights.

For outside, Lum'art has a wide range of lanterns, wall lights, small and large-angle wall lanterns, garden lights, standing lamps and pendants offering comprehensive solutions for showcasing façades and gardens.

Our timeless lighting solutions are always made of solid zinc or solid brass and designed to withstand every kind of weather.

Heritage & Creativity

Reconciling tradition
and innovation since 1961

Each piece is cut, shaped, welded, and finished in accordance with standard practice by artisans who have perfected their craft after years of dedicated work. Lum'art products are known to be highly reliable due to their high-quality craftsmanship, the artisans' mastery of techniques that

are specific to the brand, and the careful attention given at every step in the manufacturing process. Lum'art has successfully combined tradition and innovation, savoir-faire and creative energy, hard work and passion, tradition and future, local focus and international reach.

SINCE

HISTORY

Founded in 1961, Lum'art now offers over 500 items. All of them are available in approximately 15 finishes developed specially in our workshops in Perche region of France.

For over 50 years, Lum'art Studio has designed and created new models every year, from the most contemporary to the most traditional. A continuous quest for new functions, forms or finishes leads to unique contemporary collections. Renowned architects also call on Lum'art's creativity to develop lighting solutions that fulfil the exact requirements of their projects. Such things as the encounter between some of the brand's classic features and new modern forms, the adaptation of an existing design, or a simple sketch can give rise to a one-of-a-kind product.

Made in FRANCE

100% of our lighting solutions
are designed and produced
in the Perche region

Lum'art is dedicated to art and craftsmanship. From design to manufacturing, the entire production process is carried out in France by qualified staff working with the utmost care on two noble materials, solid brass and solid zinc. All the skilled artisans involved in making our products are together under one roof, allowing us to monitor their quality

at every stage of manufacturing, as well as to be highly flexible to meet our customers' expectations as best as possible.

The "Entreprise du Patrimoine Vivant" and "Atelier d'Art de France" certifications admirably recognise this outstanding French craftsmanship.

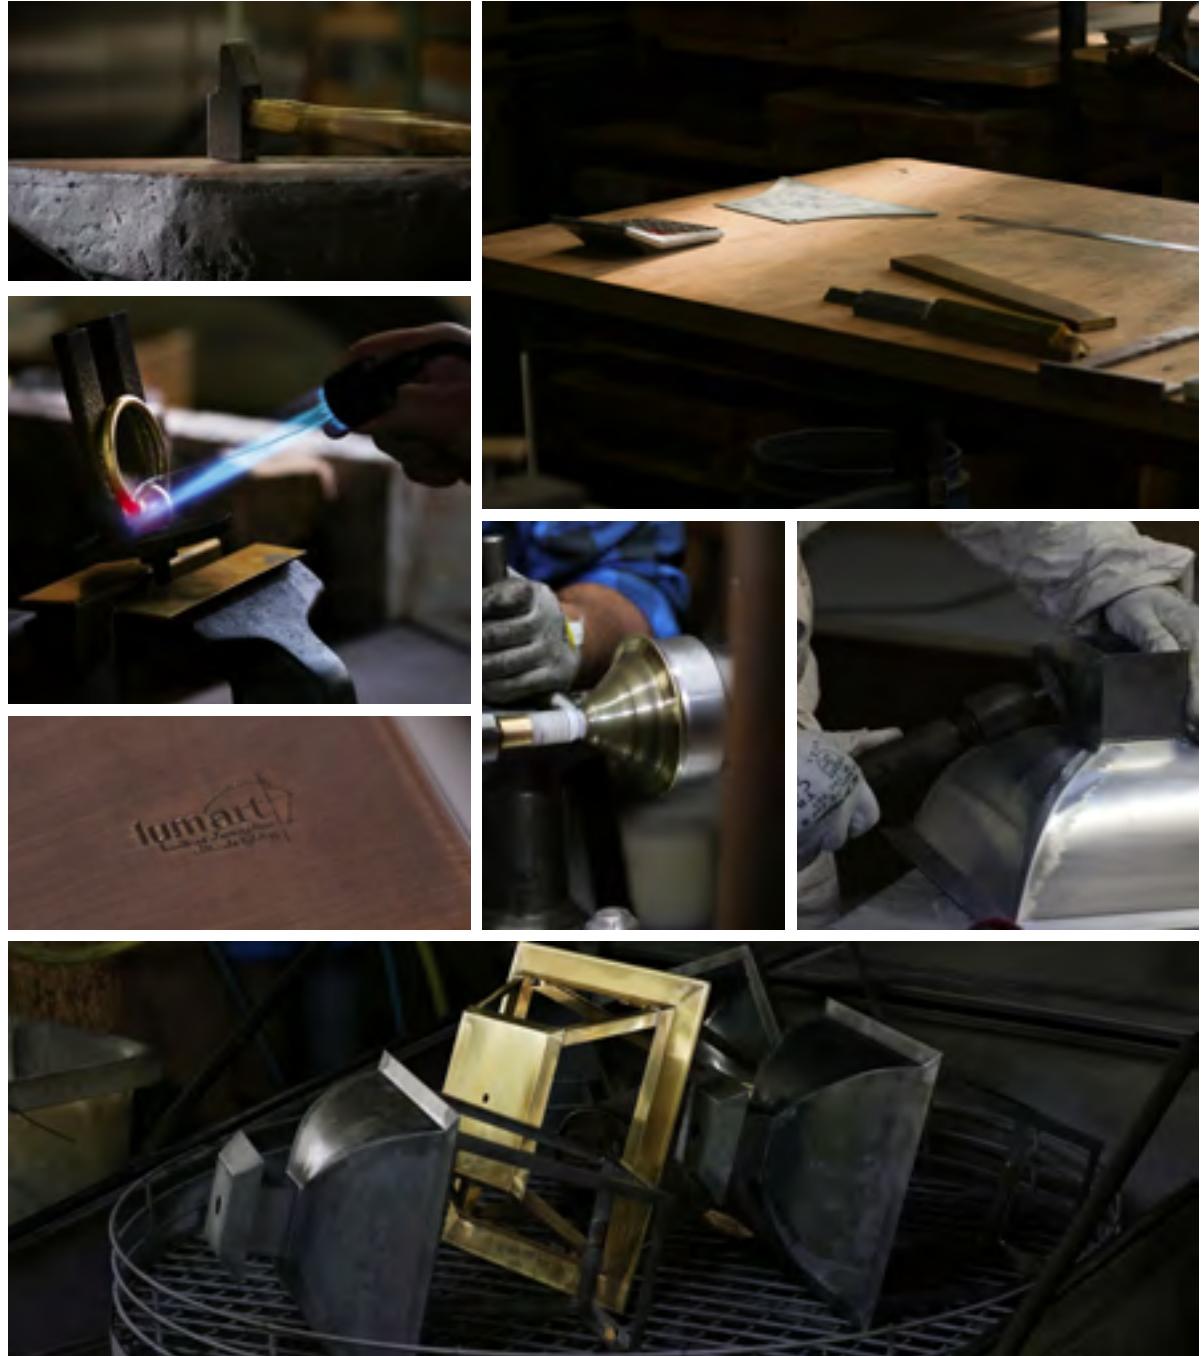

unique CRAFTSMANSHIP

Painstaking attention to detail, the quest for aesthetics and flawless quality are the values that guide us every day in our workshop in the Perche.

The majority of Lum'art's artisans have spent most of their careers with the company, thereby mastering the full range of special skills involved with making lighting solutions, from welding to wiring, cutting, and applying finishes. Others have received highly specialised training, including harpsichord and jewellery making. Their keen eyes have brought new skills to the company.

Thanks to a team of passionate designers and artisans, Lum'art creates exceptional pieces inspired from both traditional architectural styles and new, modern designs.

Each piece is stamped with Lum'art's hallmark before leaving the workshop.

Exclusive FINISHES

By working extensively with the raw materials that make up its products, Lum'art has developed around fifteen unique finishes that subtly recall the charm and authenticity of traditional styles or, alternatively, add an undeniable touch of modernity.

This wide variety of finishes allows Lum'art lights to seamlessly blend with any

indoor or outdoor home decorating project. These finishes are handmade in our studios; they can vary from one piece to another, making each light unique. Certain finishes will continue to change naturally over time.

For technical reasons, some models aren't available in every finish.

A PALETTE OF UNIQUE FINISHES

Lum'art offers its palette of unique authentic, ultra-trendy, minimalist or rustic finishes for countless styles: brushed zinc, aged zinc, patinated zinc, polished zinc, polished nickel,

brushed brass, antique brass, patinated brass, polished brass, polished nickel, acid patinated brass, rust painting, gun metal, verdigris, black nickel.

Choosing a ONE-OFF PIECE

Design your lightings
to match the place
where you live

Combining a very rich historic heritage with constant creativity has led to many designs inspired by the 17th, 18th and 19th centuries as well as more contemporary periods.

Most models are available in different sizes, from "Very Small" to "Super Giant".

Thus, today Lum'art has a rich catalogue of over 500 items. Then you have the choice of having the elected model made with one of the 15 finishes the company offers. Lastly, you can decide how you want to hang your lamp depending on your project (crook, bracket, chain, pillar etc.).

THE 4 STAGES OF PERSONALISATION

The ideal design/size/finish/hanging combination will result in unique lighting solutions
that perfectly match your space
and showcase your interiors, façades and gardens.

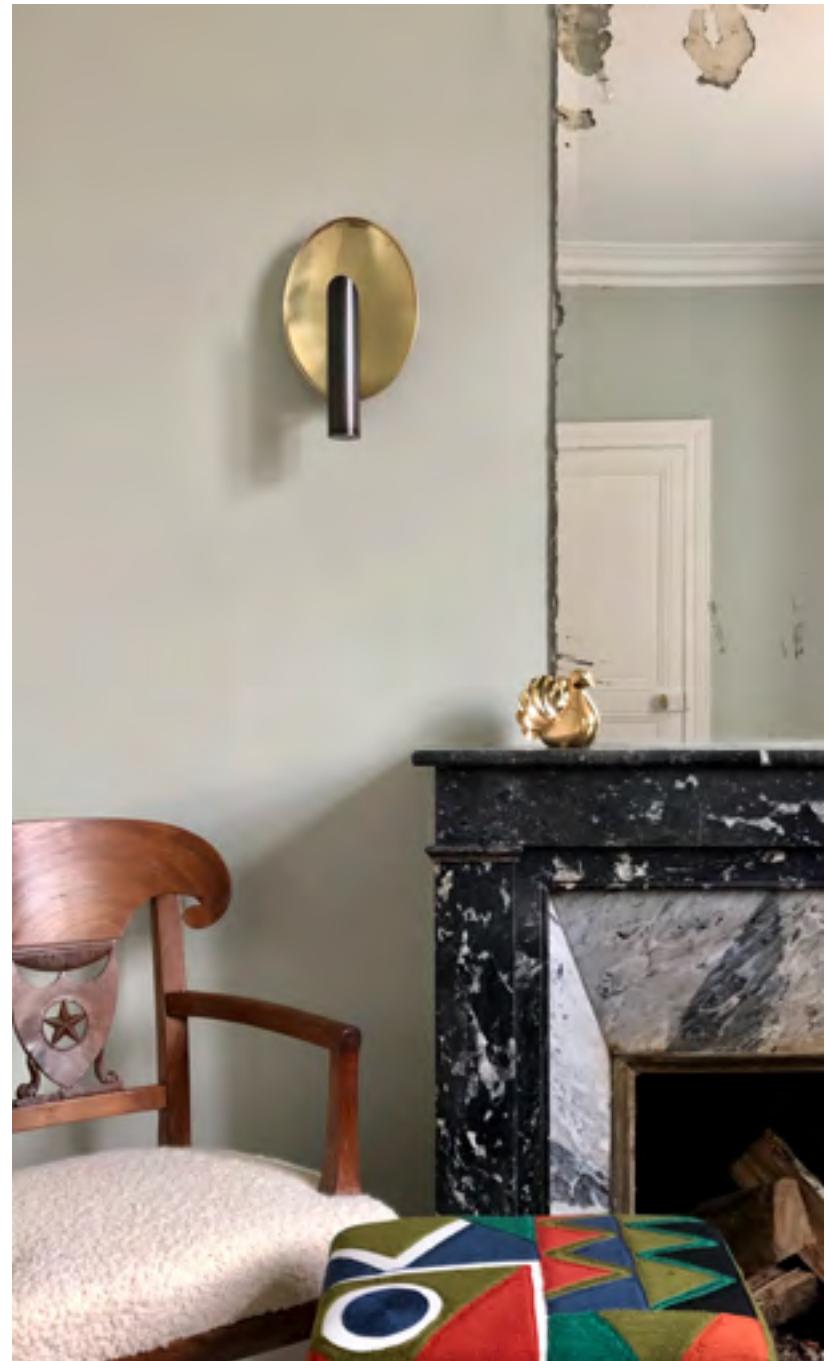

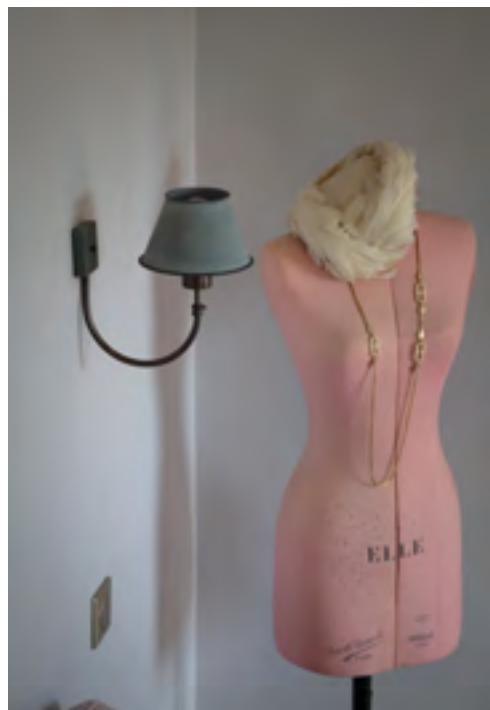

Solutions for PRIVATE CUSTOMERS

YOUR PROJECT PRIVATE HOMES

Lum'art's very wide range makes it possible to accompany many interior decoration projects, from bedrooms to living rooms, dining rooms, halls, vestibules, kitchens and bathrooms!

A modern light can be paired with a more traditional finish to showcase a classic or romantic interior, while more vintage models can be combined with a modern finish to fit seamlessly with a designer aesthetic.

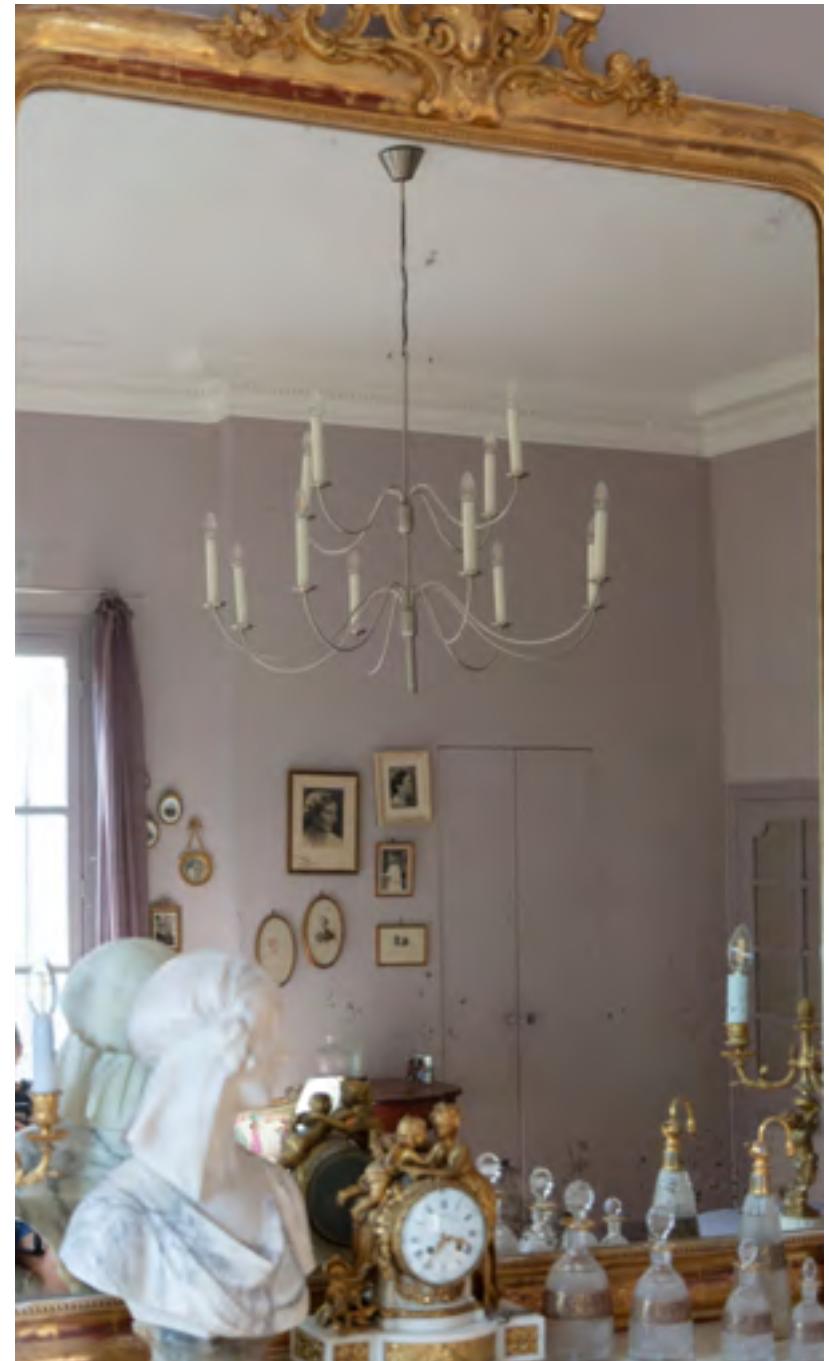

PERSONALISED SUPPORT

Over 50 years of experience allow Lum'art to offer you advice and expertise in selecting your outdoor lighting solutions. With a rich catalogue of over 250 outdoor lighting solutions, Lum'art offers every customer a personalised approach, whether for a 17th century château, a 19th century bourgeois house, a longère in the Perche, a mas in Provence, a contemporary apartment, a mountain chalet or a seaside home. Lum'art's collections will seamlessly and elegantly blend in with your project.

A SUBTLE ALCHEMY BETWEEN STYLE, VOLUME AND PATINA ALLOWS YOU TO FIND THE LIGHTING FIXTURE THAT WILL PERFECTLY MATCH ITS ARCHITECTURAL AND DECORATIVE SETTING

Following various guidelines (the building's architectural style and materials, the roofing, the electrical outlets' location, etc.), our experts will give you ultra-personalised advice. This is precious because it will guide you in your choices so that, after they are installed, you will be completely satisfied with your exceptional lighting solutions and enjoy them for many years!

Services for PROFESSIONALS

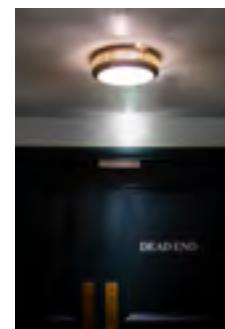

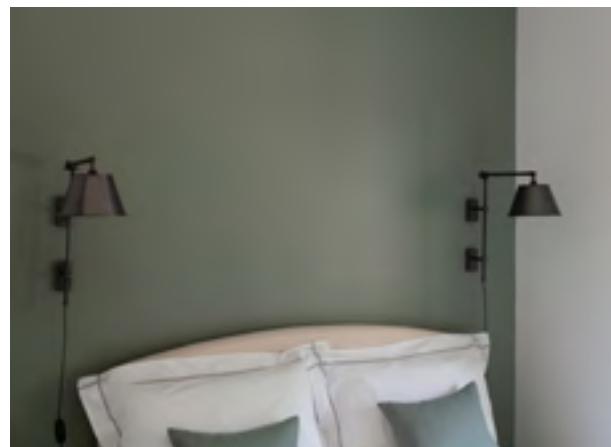

Whether for creations or renovations, Lum'art works every day with many famous architects and decorators in France and internationally on residential and commercial projects.

Because the brand is reliable, flexible, responsive, and local, it has become very popular among decorating professionals.

RELIABILITY

Our partners' great loyalty rewards over 50 years of expertise in the area of high-end lighting solutions. Lum'art products can be found in many hotels, restaurants, public places and private homes. Our customers' satisfaction with completed projects in Europe, the United States and Asia is the result of standards that we keep particularly High.

FLEXIBILITY

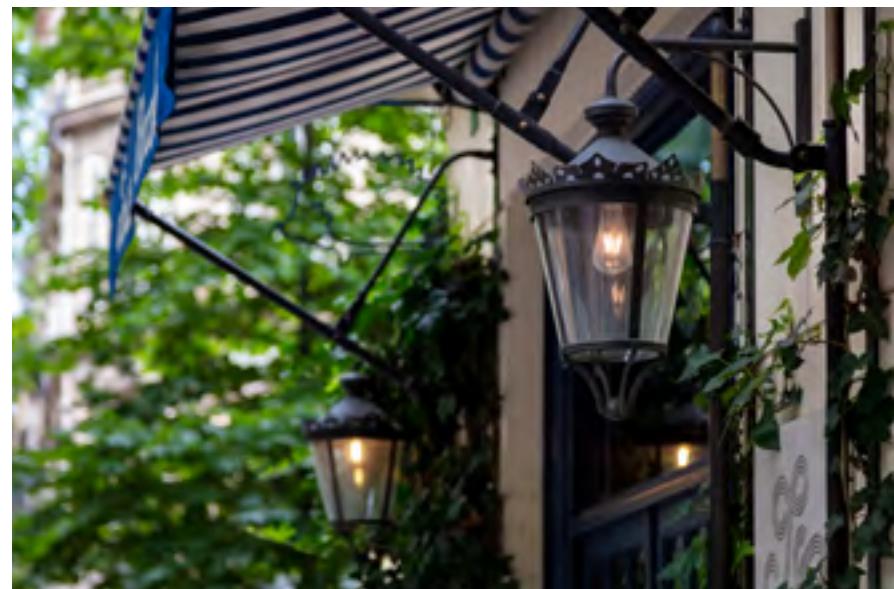

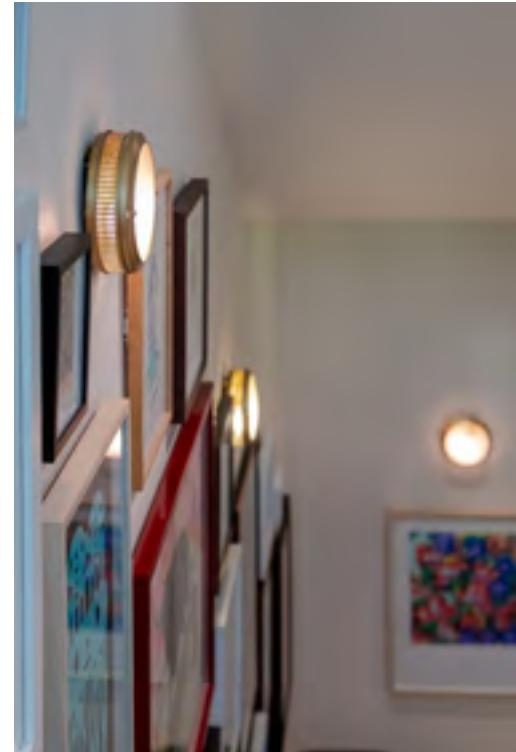

Because our manufacturing process is primarily manual, we can adapt our models to meet the needs of even the most demanding professionals. New sizes, hanging methods and finishes have been designed for specific projects without ever compromising on the quality and aesthetics that have made the brand successful.

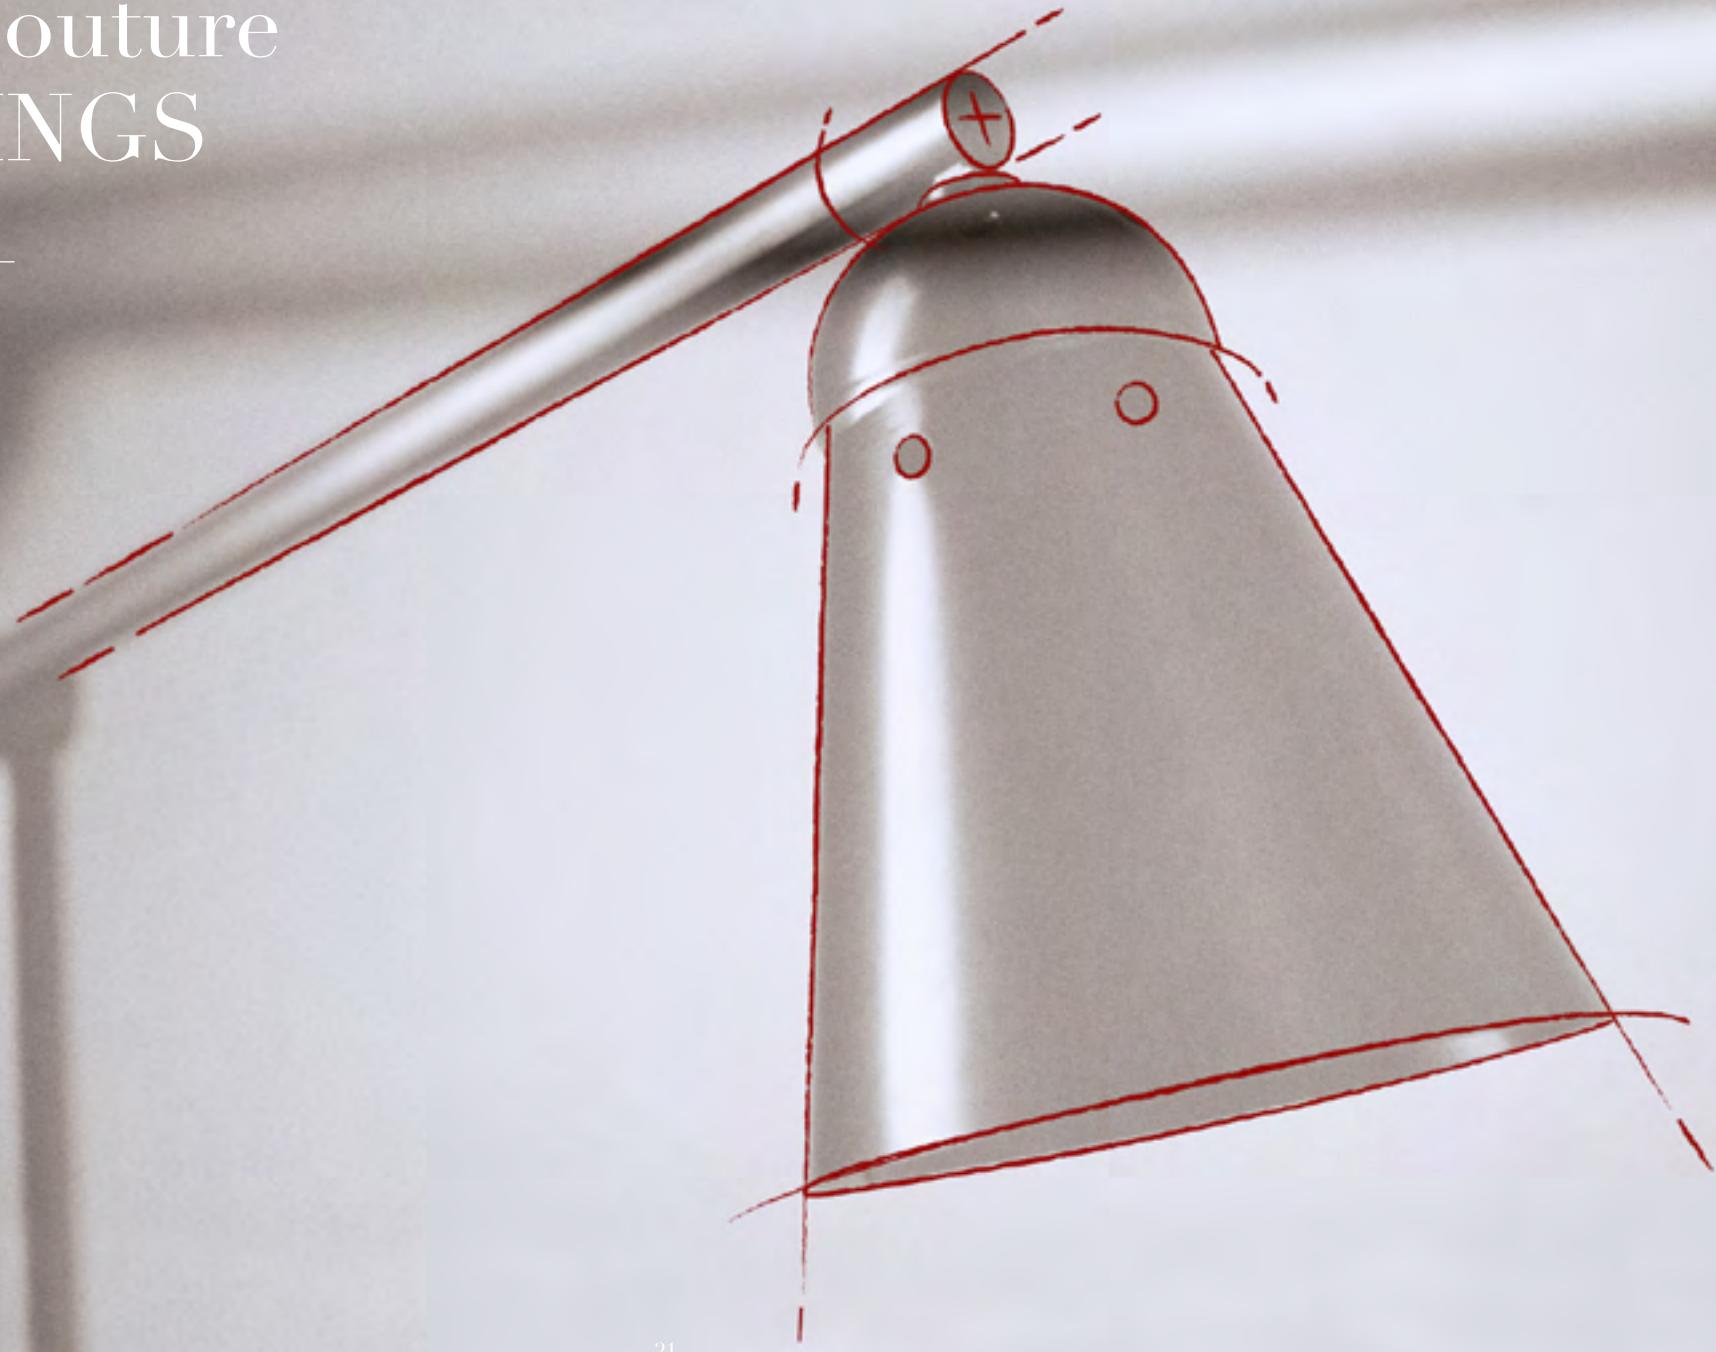

RESPONSIVENESS AND PROXIMITY

Made exclusively in our workshops in France, most of our products are customised and available within 4 to 5 weeks. They can then be shipped anywhere in the world. Because each product is unique, there are no minimum order requirements.

The company's small size means teams can answer any request for a quote or additional information without 24 to 48 hours. Our bilingual team is trained to discuss any topic with an international audience and quickly understand the various issues involved with a project.

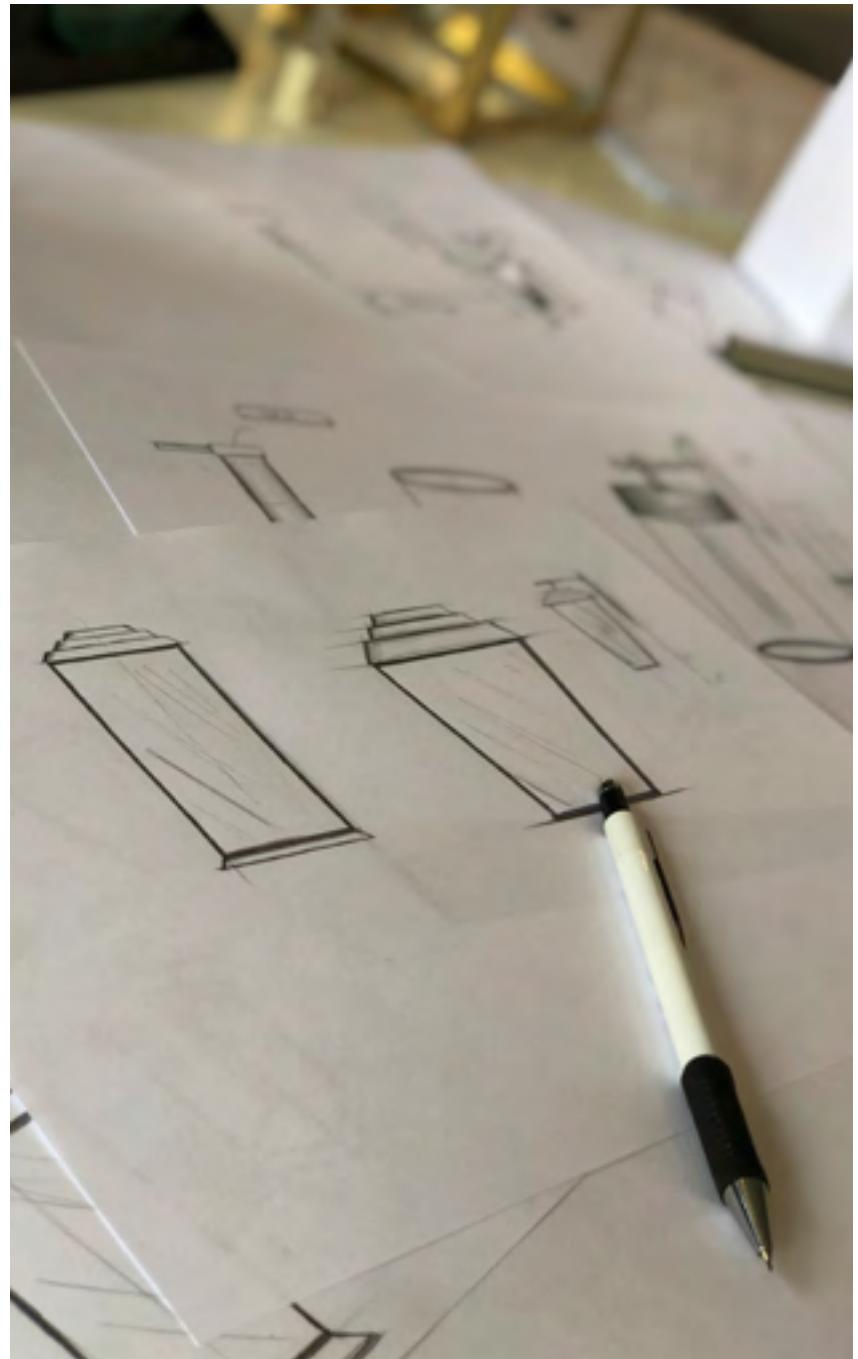

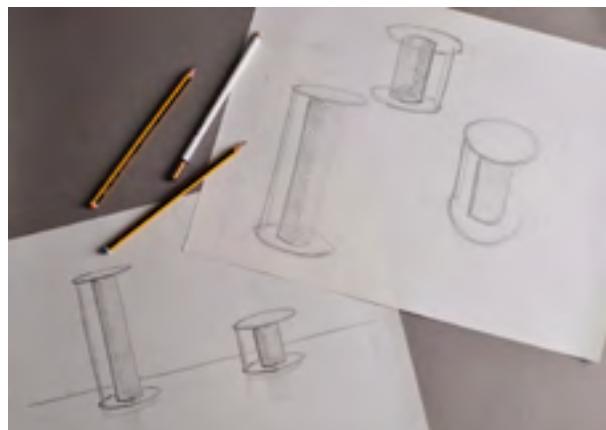

Haute Couture LIGHTINGS

DESIGN AND PRODUCTION CUSTOMISED MODELS

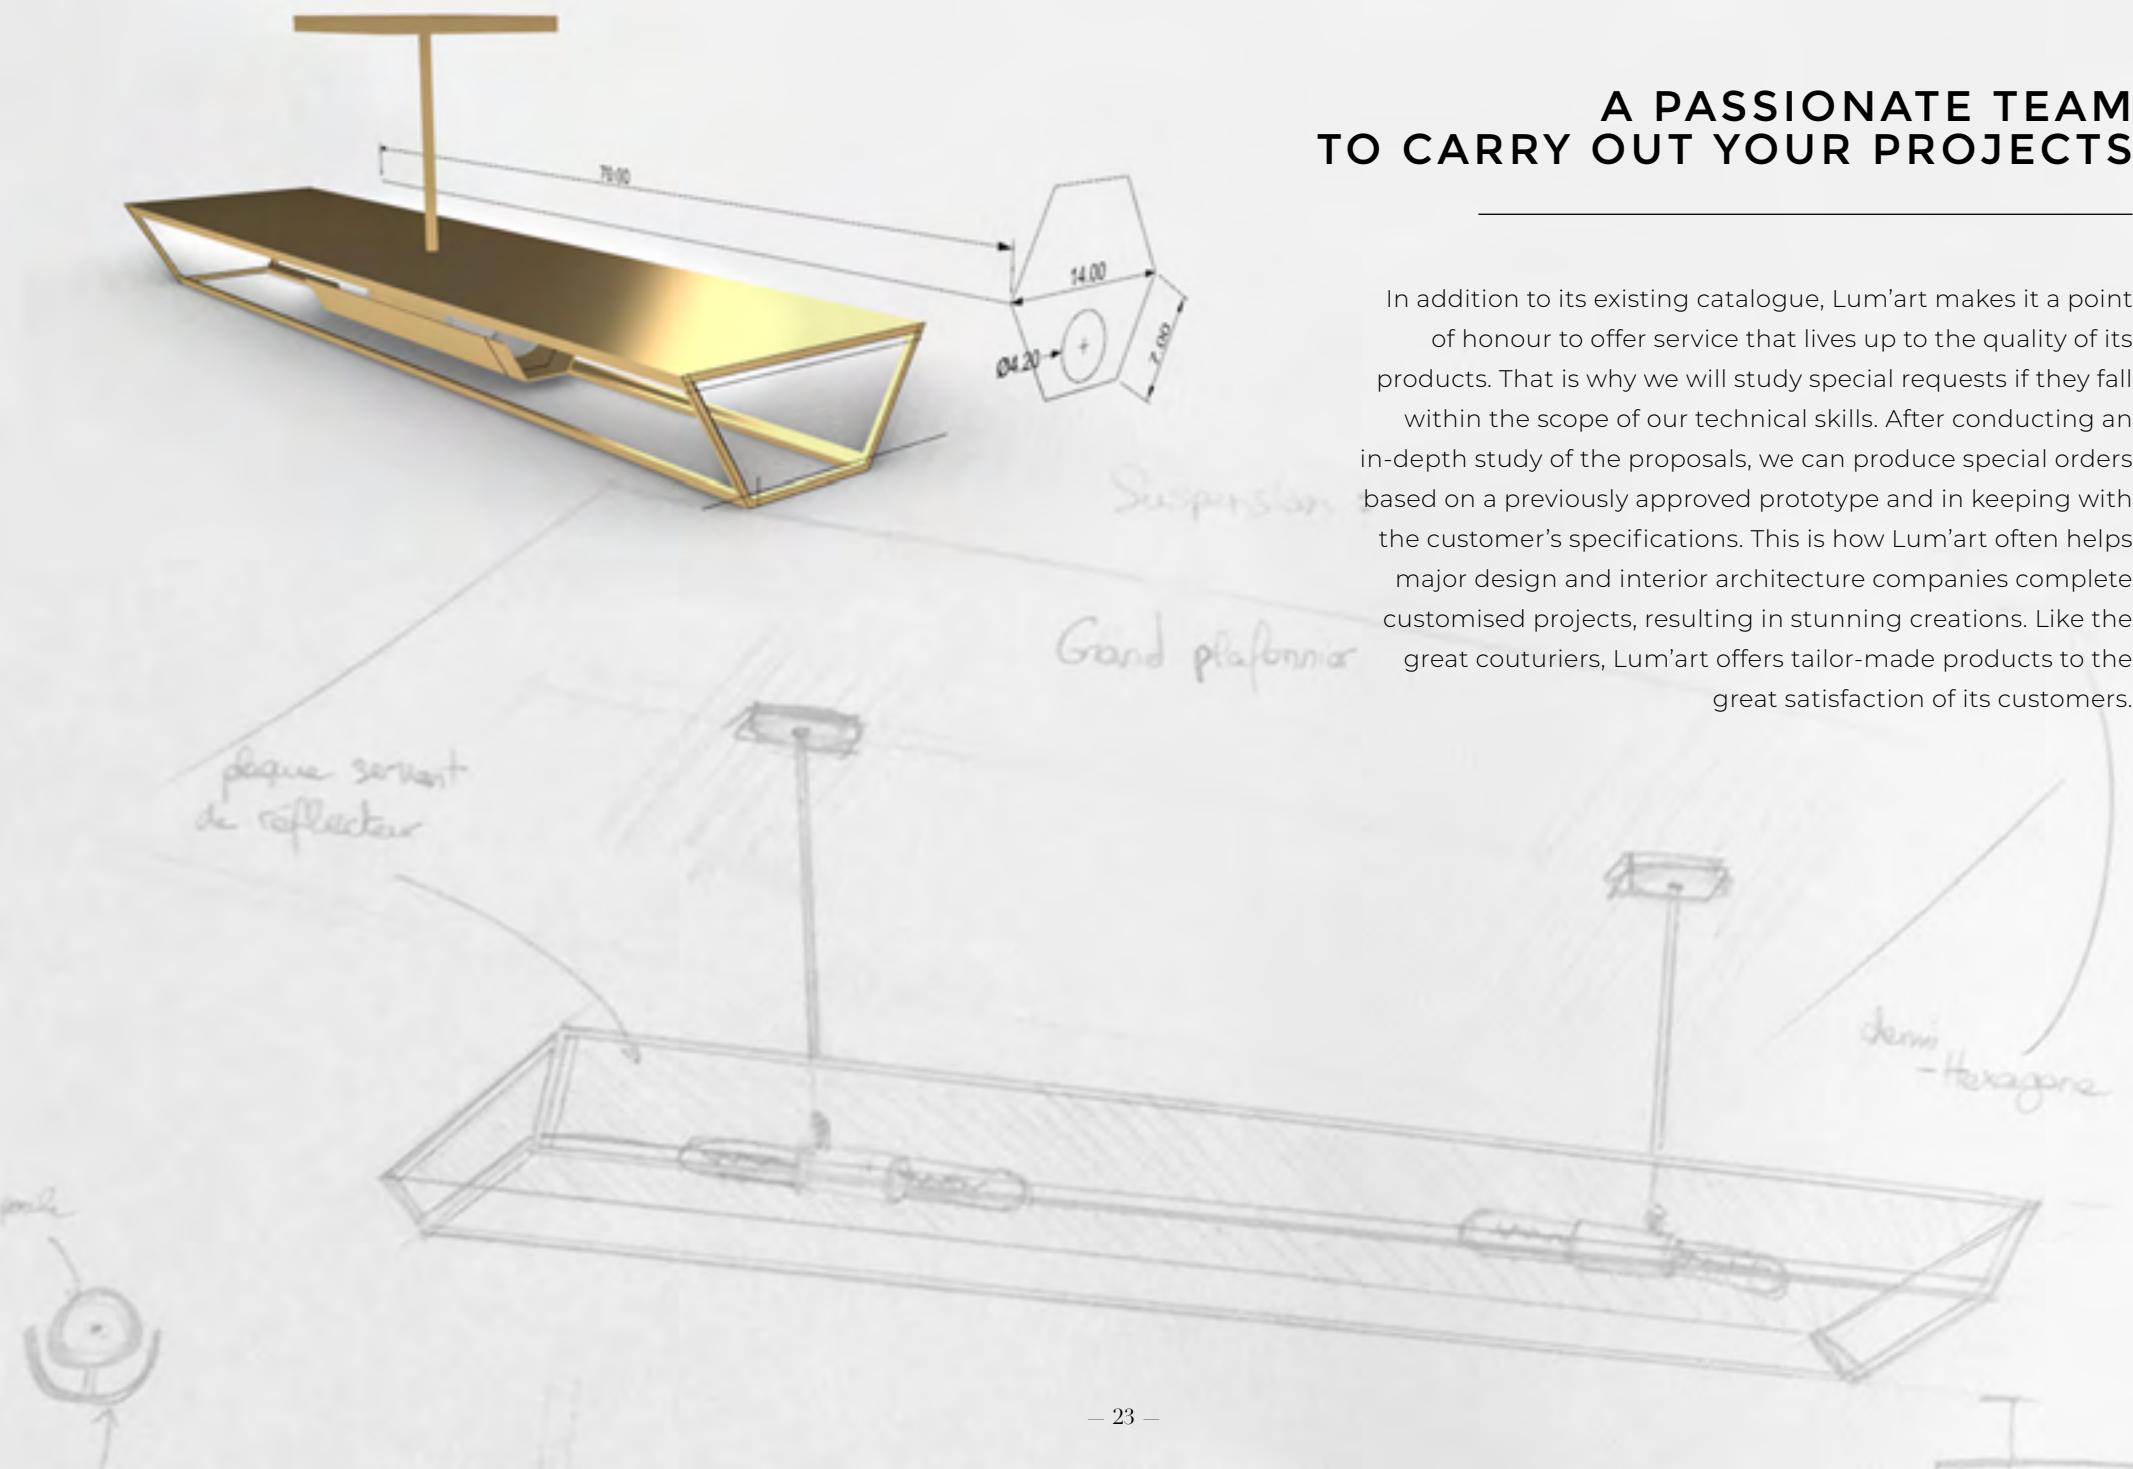

Twice a year, Lum'art Studio designs and creates new models, rounding out the traditional offer or revealing more contemporary forms.

The very wide range of designs, finishes, sizes and hanging methods helps to translate the intentions of creatives, architects, designers or private customers in a completed project. Taking a personalised approach to each project makes it possible to offer unprecedented solutions as close as possible to customisation to meet the most challenging needs of the most demanding customers. Lum'art perfectly adapts to the smallest as well as the most ambitious projects.

A PASSIONATE TEAM TO CARRY OUT YOUR PROJECTS

In addition to its existing catalogue, Lum'art makes it a point of honour to offer service that lives up to the quality of its products. That is why we will study special requests if they fall within the scope of our technical skills. After conducting an in-depth study of the proposals, we can produce special orders based on a previously approved prototype and in keeping with the customer's specifications. This is how Lum'art often helps major design and interior architecture companies complete customised projects, resulting in stunning creations. Like the great couturiers, Lum'art offers tailor-made products to the great satisfaction of its customers.

COMPLETED PROJECTS

PARIS HOTEL LE SAINT

Nesting in the heart of the Saint-Germain-des-Prés neighbourhood, Le Saint is a hotel where the lost meaning of luxury is restored and French savoir-faire is found in every detail.

The Haussmann façade of this Parisian hôtel particulier is magnificently lit by various lanterns and wall lights from the Commanderie collection.

TARTINE ET CHOCOLAT BOUTIQUE PARIS

Tartine et Chocolat is a French high-end children's fashion shop that has been offering collections recalling French elegance for over 40 years. The historic flagship boutique in Saint-Germain-des-Prés was renovated by an

architect who chose lanterns from the Line collection to light its exterior. Their details and refinement perfectly match the boutique's worked and plant-covered Haussmann façade.

PARIS HOTEL THE HOXTON

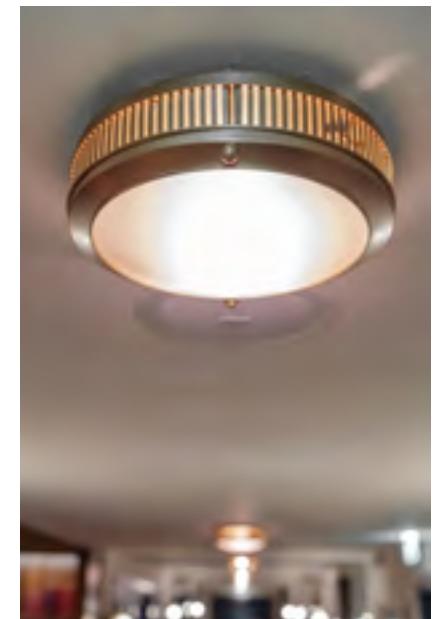

The Hoxton is a hotel with an assertive, modern and refined design in an elegant building dating from the 18th century located in the heart of the 2nd arrondissement of Paris. Porthole lights from the Rustique collection

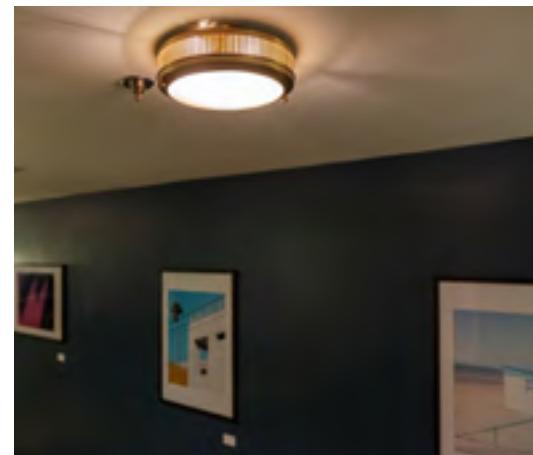

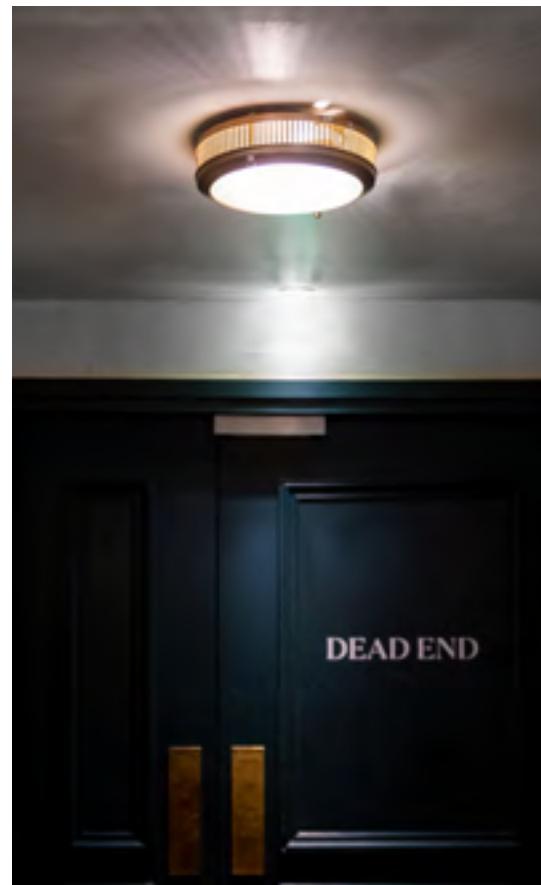

seamlessly blend in with the décors to subtly light the hotel's corridors, casting graphic shadows on the walls and ceilings.

RUSTIQUE

PARIS
HOTEL
LE PRESBYTÈRE

Le Presbytère is a hotel located opposite the Pompidou Centre in the heart of Paris. On the outside, a Bellecour wall lamp with a thoroughly contemporary design elegantly contrasts with the former 17th century presbytery's Flamboyant Gothic architecture.

Inside, modern Léman wall lights and pendants in micro-perforated brass are side-by-side with exposed beams and dressed stone. The pendants were specially dimensioned to fit the volumes of the staircase.

PARIS HOTEL DES GRANDS BOULEVARDS

In a building erected shortly before the French Revolution on the foundations of a former garden, the Hôtel des Grands Boulevards is ideal for a getaway in the heart of Paris.

Famous French interior designer Dorothée Meilichzon decided to fit

the lobby, corridors, restaurant and cocktail bar with Bordeaux outdoor lanterns, blurring the boundary between the indoor and outdoor spaces. Aged zinc highlights the gardens' peacefulness, while polished brass adds a decidedly contemporary note.
