

The background of the entire image is a blue-toned photograph of a complex, spherical geodesic dome structure, likely a modern architectural feature. The structure is composed of numerous interconnected metal rods and spherical joints, creating a mesh-like pattern. In the top right corner, there is a dark blue rectangular box containing the company logo. The logo consists of the word 'TROCELLEN' in large, white, sans-serif capital letters, stacked vertically. Below this, in a smaller font, is the text 'A FURUKAWA COMPANY'.

TROCELLEN

A FURUKAWA COMPANY

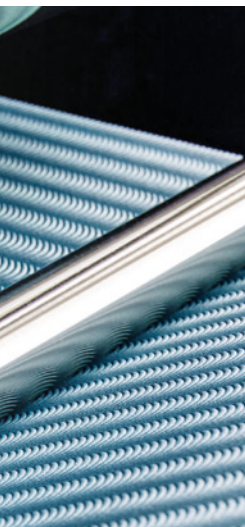

TROCELLEN
FROM POTENTIAL
TO EXCELLENCE

HEADING FOR GLOBAL SUCCESS

Since the foundation of Trocellen in 1972 by Dynamit Nobel AG, a successful brand and an outstanding reputation evolved as a result of our committed work. Seven production sites and an advanced distribution system make Trocellen today a substantial polyolefin-foam-solution provider in Europe. With its headquarters in Troisdorf, Germany, the quickly evolving and transforming company has since opened or acquired various production plants in Germany, Italy, Spain, Hungary and Malaysia.

Through close cooperation with our Japanese owner, Furukawa Electric Co. Ltd., we are heading for global success. Together, we dedicate ourselves to one goal: protecting and comforting humanity.

OUR VISION

MAKING A DIFFERENCE – SHAPING THE FUTURE

We shape a safe and comfortable future with products that make a difference. Our smart solutions improve people's lives and promote our partners' businesses. We take pride in running a prospering company, a first-choice workplace and a number of responsible business operations.

OUR MISSION

EXPANDING THE HORIZON FOR ADVANCED SOLUTIONS

Relying on our broad experience, know-how and the extensive support of our owner in the background, we keep looking for innovative ways of product development. To this end, we work together with our partners to develop and maximize industry performance. We are open to adapt our methods to meet our partners' requirements; we aim to answer questions that have not even been asked yet.

OUR VALUES INNOVATION

Whenever we find that even the best solution on the market is not good enough, we are eager to create a better one.

TALENT

In order to be the best, we hire the best - and we are continually developing our talent pool to maintain our leading position.

DIVERSITY

As a result of being present in many markets and industries we developed broad knowledge base and well founded operations. It means we are as diverse as our partners' needs.

RESPONSIBILITY

We always keep our partners' interests in mind and consider the environmental and social impacts of our actions under any circumstances.

PARTNERSHIP

Since collective success is unimaginable without collective thinking and working, we aim to build long term partnerships.

TECHNOLOGY AND INNOVATION

The Trocellen Group earned its reputation by combining unconventional thinking and a deep understanding of its customers' needs. Dedicated to provide high-tech solutions in various industries, our young-spirited, dynamic team is eager to develop products with outstanding performance and high quality with keeping environmental aspects in focus.

CSR

We at Trocellen Group believe that our leading role in the market, the advanced technology we apply and our extensive manufacturing and business activity put us in a position of great responsibility to work towards an environmentally and socially sustainable future. To that end, we pledge to take a committed and responsible approach to everything we do throughout the manufacturing process, from using green energy to the recyclable packaging of our products.

INTERNATIONAL LOCATIONS

With its headquarters in Troisdorf, Germany, the quickly evolving and transforming company has since opened or acquired various production plants in Germany, Italy, Spain, Hungary and Malaysia.

TROCELLEN GMBH

Our first plant, established in Germany, is recognized for the uniqueness of the products it manufactures: this is the site where physically cross-linked foams as well as foams for high-tech use and special applications are produced. Located in Troisdorf, the plant exploits its advanced technological knowledge in the Automotive, Adhesive Tapes and ProGame business units.

TROCELLEN ITALIA

Managing completely different industries along with diverse manufacturing and converting capacities, the Italian lead plant is recognized for its colourful and dynamic operations. Our two plants in Capanago primarily supply the Insulation business unit, while the factory in Volpago supplies the Footwear business unit and also deals with limited series, special processed products: even our Tatamis are manufactured here.

POLIFOAM

The Hungarian factory is constantly developing its production capacities and also its product portfolio. Polifoam takes great pride in its innovative product development and its fast and customer-oriented solutions to the most complex and sophisticated market demands. The company is specialized in highly processed products in addition to foam production. Polifoam supplies the Sport and Packaging industries and also manufactures finished products for the Insulation and Automotive business units.

TROCELLEN SOUTH EAST ASIA

Through continuous technological development as well as industrial and geographical expansion, our Malaysian company has become a lead supplier in the Asian region since it started its operation 18 years ago. Specializing in chemical cross-linked PE foam production, Trocellen SEA plays a great role as a manufacturer of our Insulation, Sport, ProGame and Automotive products.

TROCELLEN IBERICA

Our Spanish company is mainly responsible for manufacturing Footwear, Sport, Insulation and Automotive products as well as supplying the South American market with high quality solutions. It is also the only company in which our original owner, Otsuka still represents itself as major shareholder and also manufactures finished products for the Insulation and Automotive business units.

BUSINESS UNITS

AUTOMOTIVE - LIGHT WEIGHT & COMFORT

Our passion for automobiles drives us to put great efforts in extensive development to create ground-breaking innovations for the Automotive business unit. Through close cooperation with our customers, we continuously develop innovative and versatile applications to satisfy the highest requirements and meet the increasing demand for light weight solutions.

INSULATION

Construction and Interior - Comforting space for people
Engineering - Perfect finishing for precise solutions

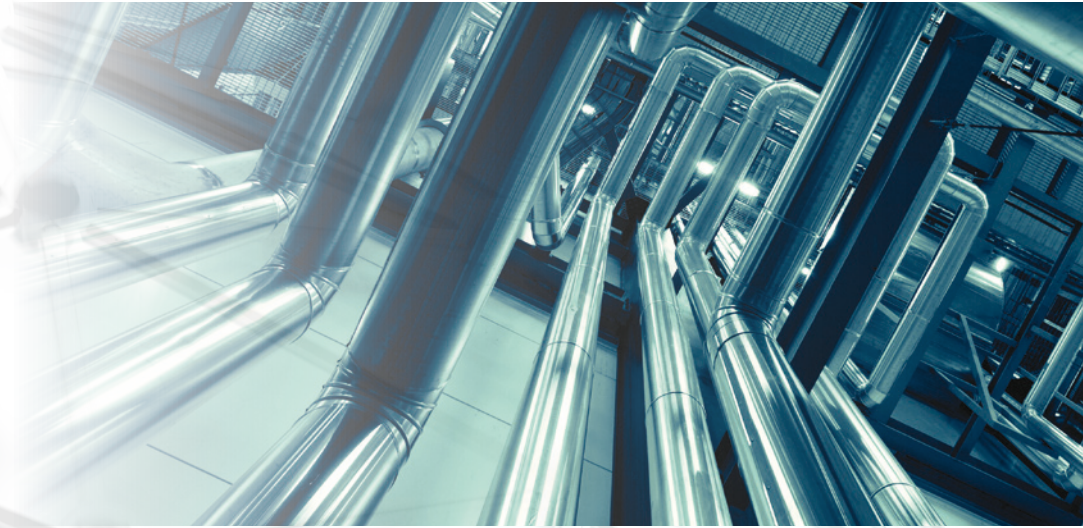

We are dedicated to transform living spaces into energy efficient and comfortable homes, offices and recreational buildings.

Supported by our extensive experience and strong technological background, we come up with innovations to meet the constantly growing expectations of our partners in the field of construction and engineering insulation.

SPORT, HOME & LEISURE - NO BOUNDARIES

Design, comfort and safety - those are the key elements the Trocellen Team is passionate about when creating outdoor activity and leisure products. Built on our experience and cooperative innovation, Trocellen's long-lasting and reliable solutions create perfect environment for quality free time.

Our full commitment to environmental and social awareness requires the best production processes considering aspects on a larger scale. Trocellen sport and leisure products thus offer a sustainable and competitive solution to our partners.

PROGAME & TATAMI – PROFESSIONAL SPORT PROTECTION

Our passion is people's comfort and safety. With that in mind, we are eager to provide high quality professional solutions for specific indoor and outdoor sport activities.

The ProGame Artificial Turf Shock Pad system evolved through 30 years of cooperation with pioneers from the synthetic turf industry to maximize safety and comfort in sport halls and playgrounds.

Our martial art tatamis focus on safety and comfort whilst ensuring high performance and stability to create an environment that allows maximum concentration.

TROCELLEN FOOTWEAR – SOOO EASY

We believe that shoes must be taken seriously: they define mood, support health and contribute to the overall wellbeing of people. Our intense R&D activities supported by broad technical know-how and special testing techniques aim to find creative and optimal solutions to meet high requirements of the footwear industry.

ADHESIVE TAPES – STRONG BONDS FOR THE FUTURE

The Adhesive Tapes business unit is one of our most diverse branches when it comes to applications and industries. Through continuous development and high-tech manufacturing techniques, Trocellen's innovative adhesive tape solutions offer customized features to provide for the diverse needs of our customers.

TROCELLEN PACKAGING – LIGHT AND EASY

Trocellen's packaging solutions are based on a strong technological background offering a wide range of options to provide packaging for products of any size, shape or weight and even for the most sensitive devices. They ensure long-lasting protection during the shipment, handling and storage of different materials.

BUSINESS SOLUTIONS – FROM POTENTIAL TO EXCELLENCE

Trocellen Business Solutions focus on those consultancy areas, that might be critical for production driven companies with complex operations.
