

# Your Sourcing Partner for Small and Big Series

Ensuring better quality parts at the  
best price with on-time delivery

Procurement services for your desired parts

# About Us

- At Insourcify, we are a leading outsourcing solution provider of manufacturing services for small and big quantities of parts.
- We offer cost-effective and high-quality manufacturing solutions to clients worldwide
- Our dedicated team of experts works closely with our clients to provide tailor-made solutions that meet their specific requirements.
- Our comprehensive range of services includes casting, forging, and machined parts manufacturing.
- Our suppliers are certified with ISO 9001, AITF 16949.

# Our Expertise

## AUTOMOTIVE

Empower your automotive business through strategic outsourcing. At Insourcify, we specialize in automotive Parts sourcing within Europe and India. We have a large network of certified suppliers which ensure the best quality parts a better pricing:

### Categories:

- Casting parts
- Precision metal and plastic parts
- Forging (hot and cold forging)
- Sheet metal and forming parts
- Injection molded and plastic parts
- Machined and turned components

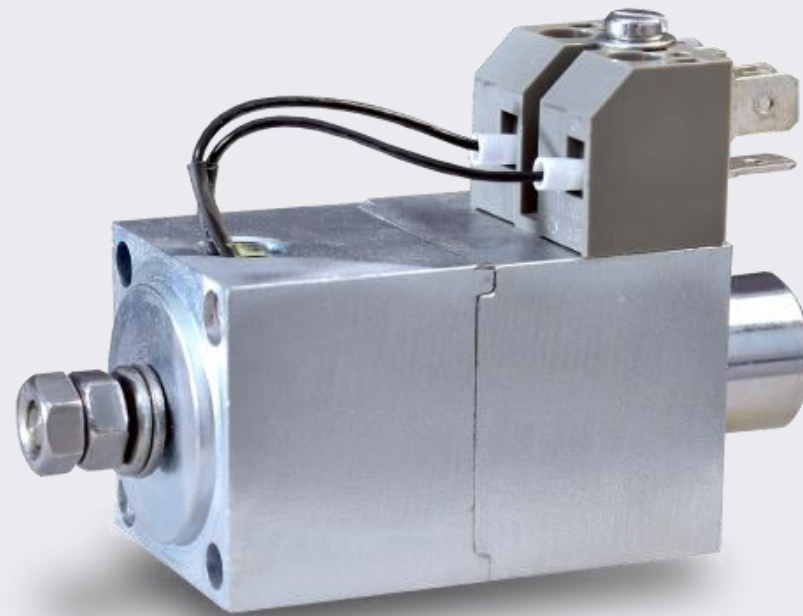

# Our Expertise

## ENGINEERING

Unleash engineering excellence through strategic outsourcing. At Insourcify, we specialize in engineering outsourcing within Europe and India. Gain access to cost-effective solutions, specialized expertise, and cutting-edge technologies. Our suppliers are flexible to manufacture small series and big parts for Engineering industries.

### Categories:

- Gearboxes and machines parts
- Power sector parts
- Railways and locomotive parts
- Food processing sector parts
- Prototype for our customers for new products
- Contract manufacturing as per your drawing

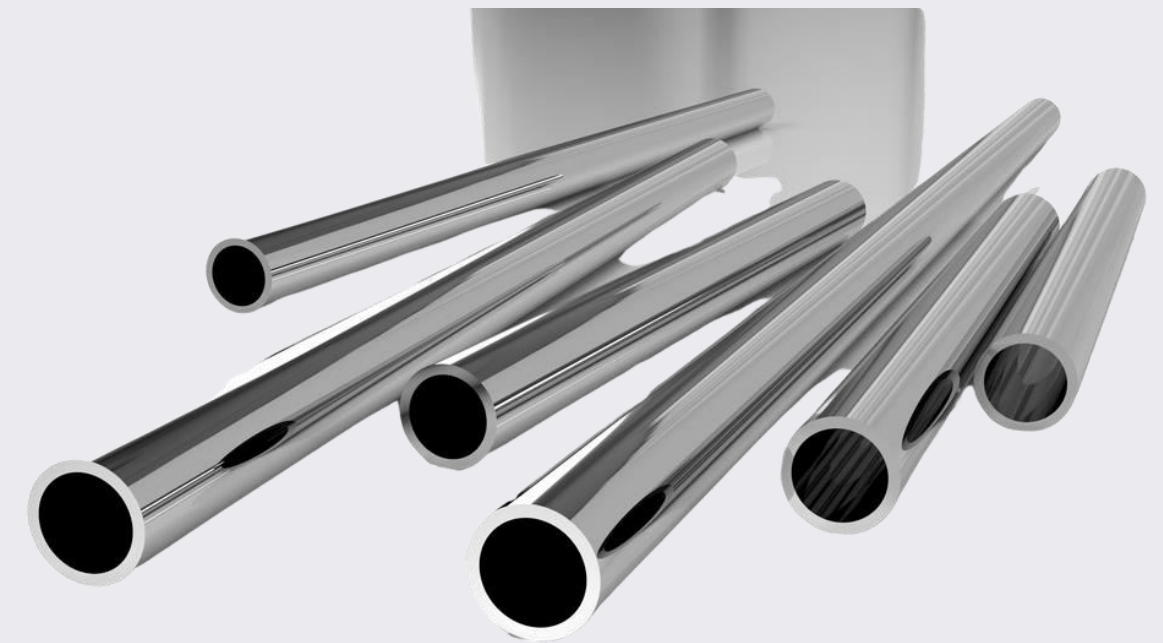

# Our Expertise

## CONTRACT MANUFACTURING

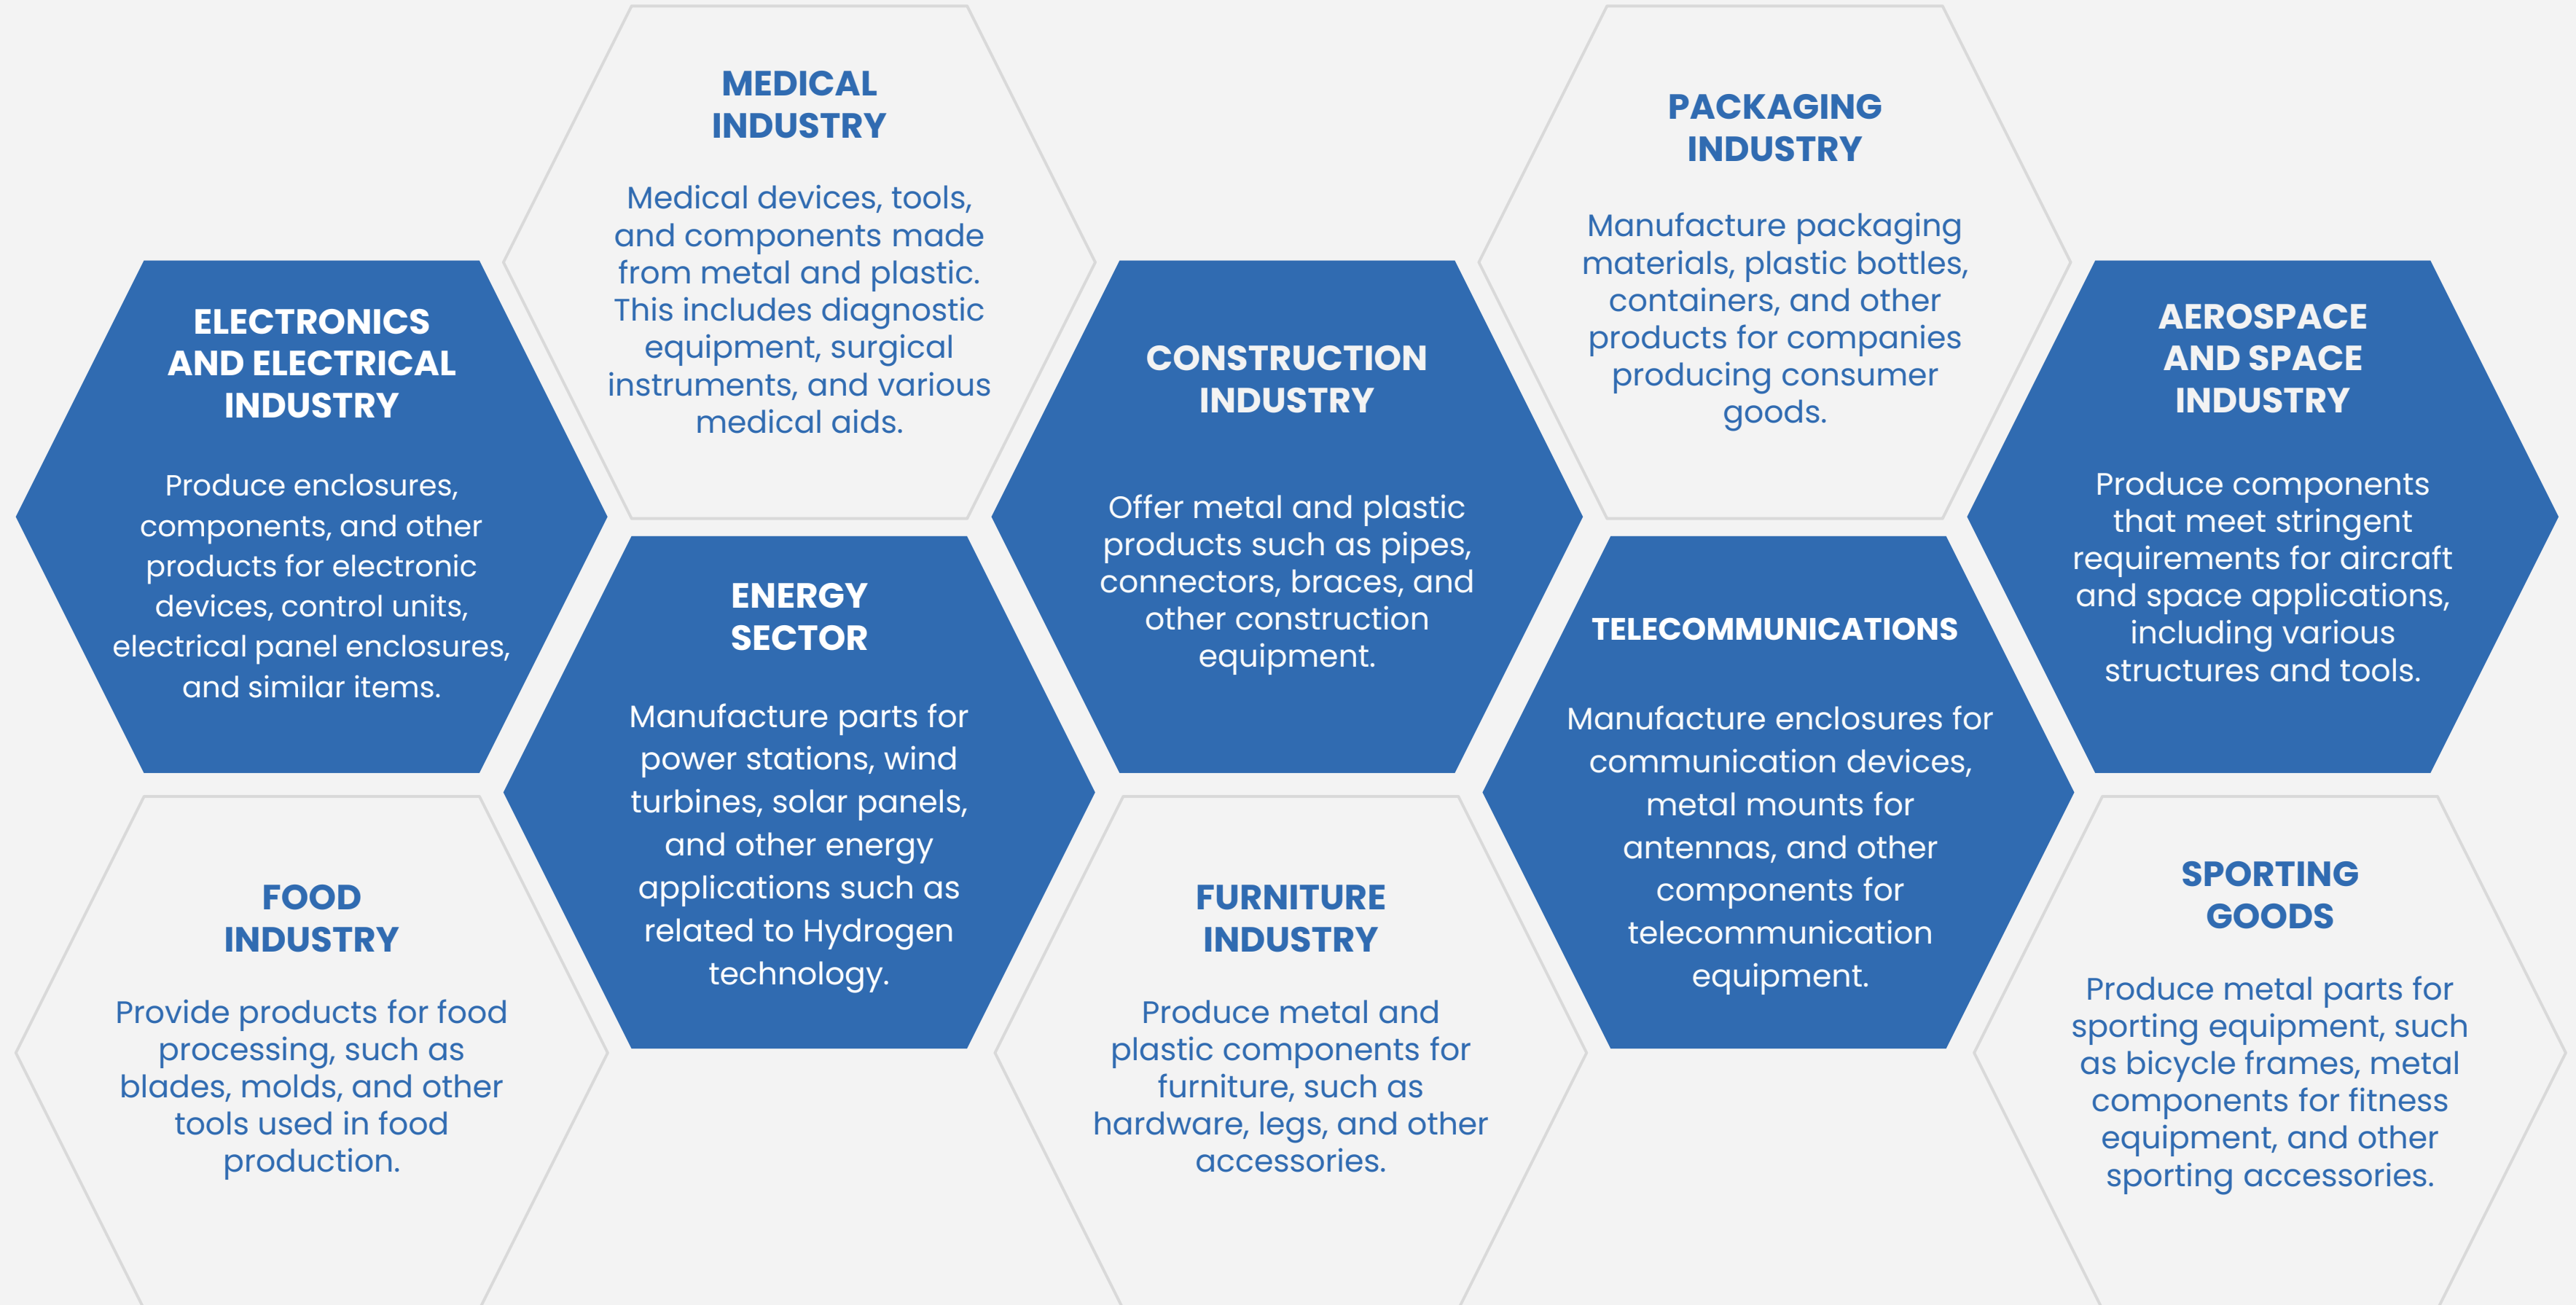

Our suppliers have the capability of producing large metal parts as well as tiny components. Thanks to our extensive cooperation network, we are also able to produce larger quantities and meet special requirements regarding, for example, surface and heat treatment or degree of hardness.

### Categories:

- Precision less than a micron
- Heat treatment facility
- Bigger diameter tubes and pipes facility
- Casting of bigger structures
- Large machining facility
- Can produce small series and big quantities in less time

# Industries we serve

# OUR STRENGTH

The things conveyed can be in the form of ideas, programs, products, or services and are usually carried out in a discussion or forum.

### **Messer Plasma Cutter**

Can produce the complex structure and cutting as per desired shapes. Small series parts is also possible on this machine

## **Examples of Machinery**

### **DNM 5700 Vertical/ Horizontal Machining Centre**

3 and 5 Axis machining centers can produce any kind of machined components in a short time and ensure the best quality

### **Trumpf Laser Cut**

The laser cutting machine brings flexibility to our operation to ensure the fast processing of desired cutting operation of sheets up to 10 mm thickness

# FACILITIES

## Forging and Machining

- Forging machine of 2500 tons, which can produce parts up to 25 kg
- Stainless steel and mild steel material processing
- Aluminium forging is also possible
- More than 100 turning machines for pre-machining
- Shot blasting, normalizing and other heat treatment processes
- Quality control and ISO 9001 certification

# FACILITIES

## Sheet Metal and Forming Parts

- Sheet metal and welded assemblies
- Deep drawing, blanking, cutting and other forming processes
- More than 100 sheet metal presses up to 1000 tons
- Can produce series parts with high accuracy and – fast delivery
- Less tooling cost
- In-house tooling manufacturing
- Tool design center

# How online manufacturing works at INSOURCIFY

# Numerous advantages over conventional contract manufacturing

## FAST

- ✓ Consistently short delivery times
- ✓ Offer within 24-48 hours
- ✓ Simple online request
- ✓ Europe-wide express shipping

## UNIVERSAL

- ✓ Broadest manufacturing spectrum on the market
- ✓ Prototyping, small and large series
- ✓ 300+ materials constantly available
- ✓ Everything from one source

## RELIABLE

- ✓ Unlimited production capacity
- ✓ Low complaint rate
- ✓ ISO 9001 certified quality management
- ✓ Personal account manager

- Complex precision components
- Prototypes
- Assemblies and Fixtures
- Customer-specific test gauges, measuring devices and measurement holders
- Turned and milled parts in large quantities and special sizes
- Gears, spindles and shafts in all sizes
- Sheet metal work
- CNC Pipe Bending
- Plastic manufacturing (extrusion, casting and 3D printing)
- Rubber and silicone parts manufacturing
- Mold and tool making
- Stamped parts and fine blanking
- Progressive tools
- Injection moulding and die casting tools
- Deep drawing tools
- Die-cast aluminium and steel parts
- Forging parts
- Automation technology
- Tool steel, stainless steel, aluminum and special materials
- Custom-made plate making
- Aluminium products, foils and plates
- Custom-made magnets
- Large components
- Company sales

# Our Services

# Our Team

**TASVVAR ALI**

**Indian Sourcing Expert**

Tasvvar is born in India and works as a Sourcing Expert for several years for bigger Indian accounts. Having moved to Germany in 2021, he is bridging the collaboration between Germany and India.
