STAND-UP  
POUCH

### DESIGN

Laboratoire PYC assists you in the printing of your packaging.

### PACKS AND BOXES

To personalise your pack, give us your specifications.

## HIGH PROTEIN POWDERS

Laboratoire PYC has been a leader for over 30 years in formulating high protein energy reduced products.

To control the energy density, these products are:

- **Energy reduced**
- **Low-sugars**
- **Low-fat**
- **Low-carbohydrate**

Over 150 products have already been developed, including sweet and salty powders: drinks, desserts, soups, omelettes, porridge, etc.

More than 3000 ingredients are available to personalise your recipes. We also provide gluten-free products.

## HIGH PROTEIN SNACKS

Calorie contents are controlled:

- **High protein**
- **Reduced in carbohydrates**
- **Low fat**
- **Low sugars**
- **High fibre**

Laboratoire PYC supplies sweet and salty snack products, sold under a private label.

Choose among smoothies, bars, crisps, biscuits, etc.

At our plant in Manziat, France, Laboratoire PYC produces high protein snacks reduced in carbohydrate. Cakes can be made without gluten, using a strictly controlled process.

## MEAL REPLACEMENT & TDR

These weight-loss products replace a meal and allow weight control or weight loss as part of an energy-restricted diet.

You can benefit from our support to create a starter pack with a weight-loss menu customisable with your brand name.

We can also produce total diet replacement products for weight control.

## WEIGHT-LOSS FOOD SUPPLEMENTS

As part of an energy restricted diet, food supplements help the body to moderate its appetite. They also help to control or reduce weight.

Drainer, fat-burner, appetite moderator...are examples of our slimming food supplements.

## HEALTH FOOD SUPPLEMENTS

Health food supplements (vision, omega-3, bone health...) and well-being food supplements (stress, transit, ...) can be customised to your brand.

Vitamins, minerals, plants and algae extracts, and other ingredients are available.

For marketing in Europe, our specialists recommend food supplements labelled with the appropriate health claims.

## NUTRICOSMETICS

In Aix-en-Provence, our French laboratory draws upon nature to develop beauty-enhancing food supplements. The formulas are developed from carefully selected ingredients with proven efficacy on skin, hair, and nails.

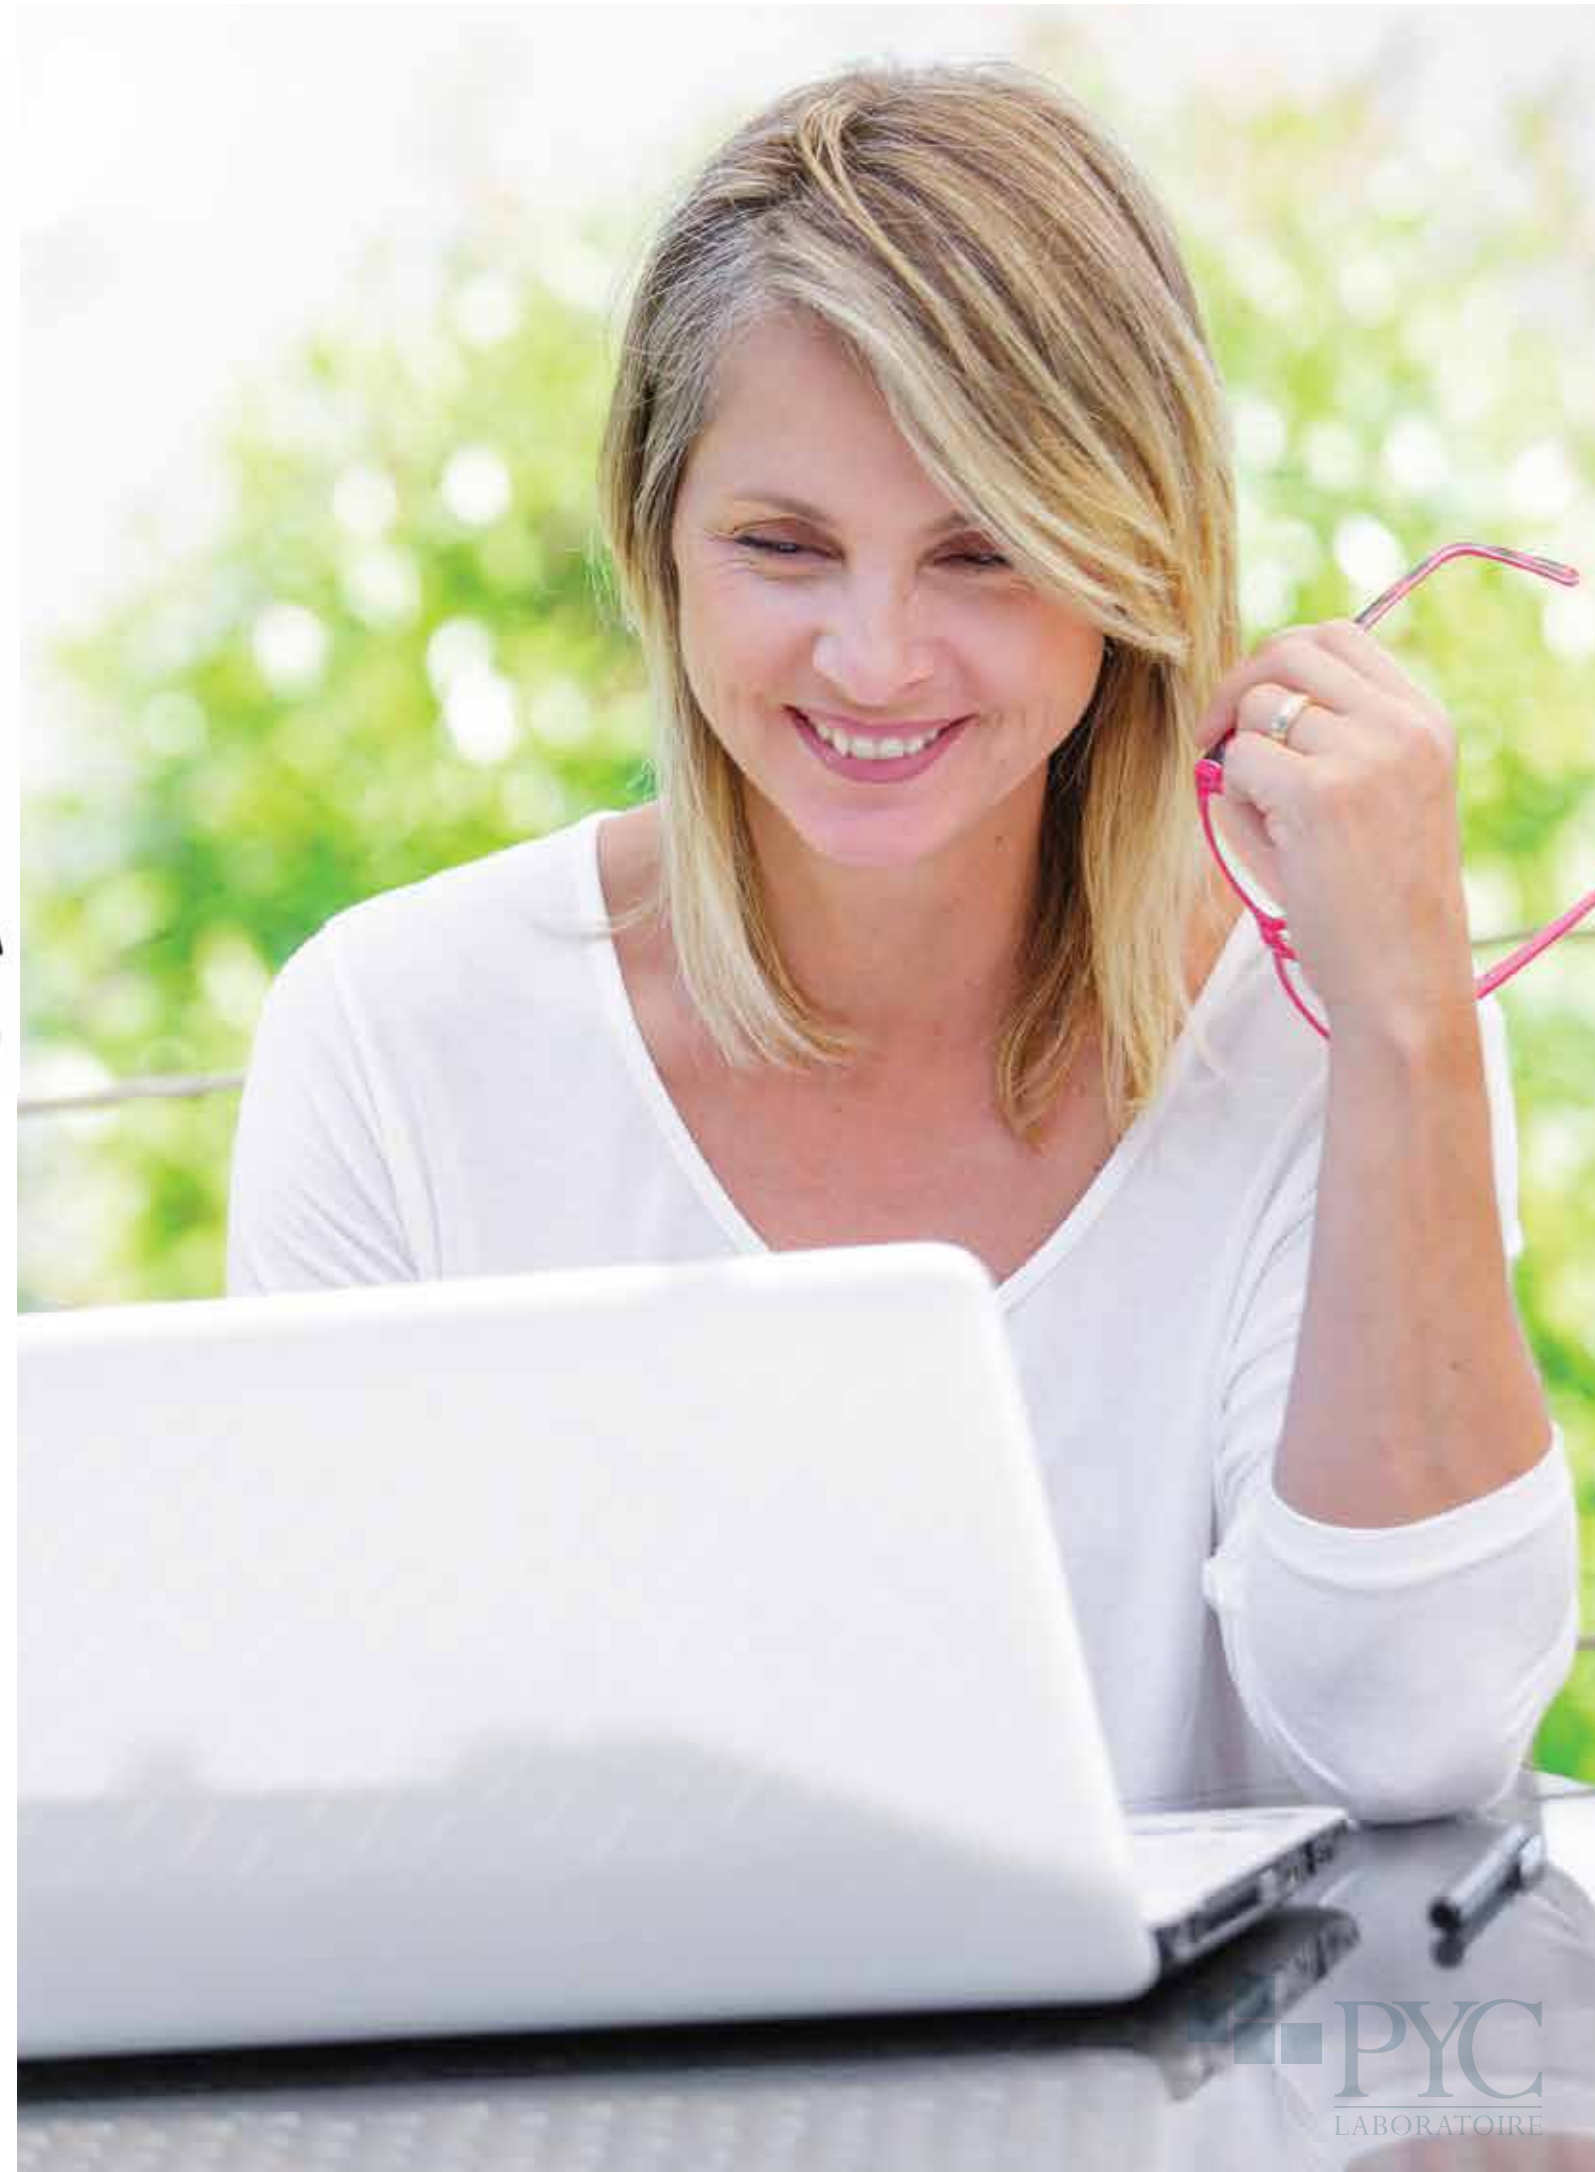

Formulas based on collagen, maritime pine, and other anti-aging ingredients are available to you.

Cellulite, skin lightening, skin hydration, hair food supplements...

All the food supplements offered are documented in clinical studies.

## SPORT

Laboratoire PYC formulates food supplements for sports and offers high-protein drinks, bars, and other snacks.

For every type of exercise, your specific nutritional formula:

- Energising
- Isotonic
- BCAA-based
- High-protein
- Carnitine-based
- Whey-based
- and more

## CLEAN LABEL

Consumers often expect less-processed products. They want ingredients lists that are short, clear, and easy to understand, more authentic compositions, and product formulations free from:

- Free from additives
- Free from GMO
- Free from nano-ingredients
- Free from sweeteners
- Free from sugar

...

Laboratoire PYC has several solutions for meeting these expectations.

Food supplements can be developed in respect of this Clean Label commitment.

## VEGAN

Laboratoire PYC offers a selection of vegan products: chips, seeds, mini-baguettes,...

For more information, please contact us.

## GLUTEN FREE

All gluten free products made by our teams are suitable to meet the needs of people with gluten intolerance or allergies.

Each ingredient is selected in compliance with European regulatory thresholds and to guarantee an exemplary gluten free finished product (< 20 ppm). Your products are labelled gluten free.
