VIDA DESIGN

Your Engineering Partner in Europe

Design Engineering Services & Industrial Automation

8 experts **270+ projects**

10 years on market

Design Engineering Services

VIDA DESIGN

More than CAD modeling — we provide senior-level design engineering support across the full product development cycle. From concept design and detailed engineering to FEM/CFD analysis and production documentation.

INDUSTRIES WE SERVE

- Automotive & Tier 1 suppliers
- Pharmaceutical & medical devices
- Food processing & packaging
- Agricultural machinery
- Composite structures
- Oil & gas equipment

CAD experiences

creo®

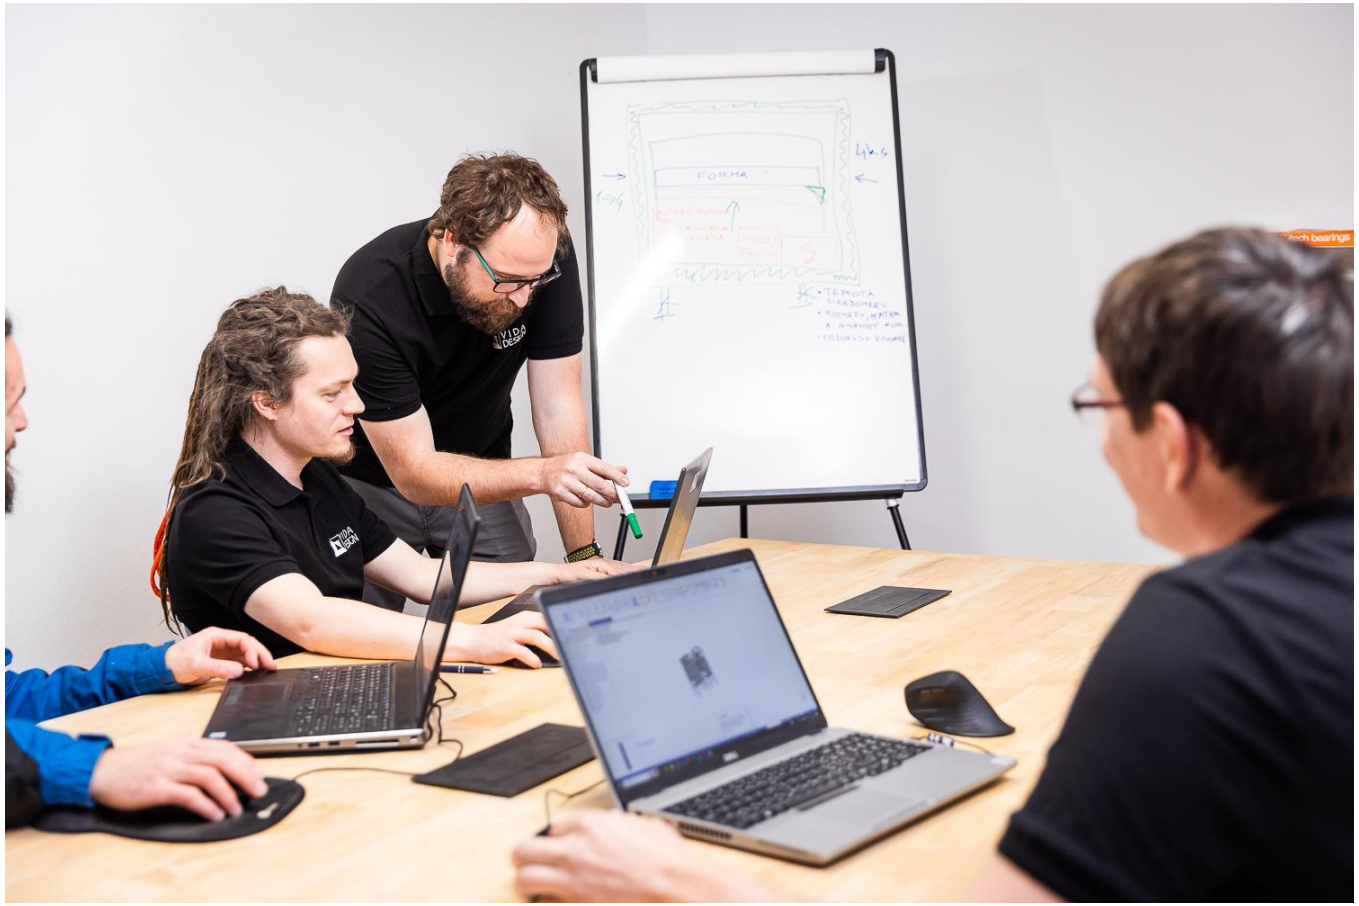

CATIA

SOLIDWORKS

SOLID EDGE

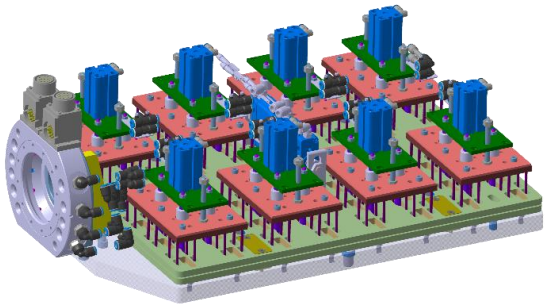

AUTODESK® INVENTOR®

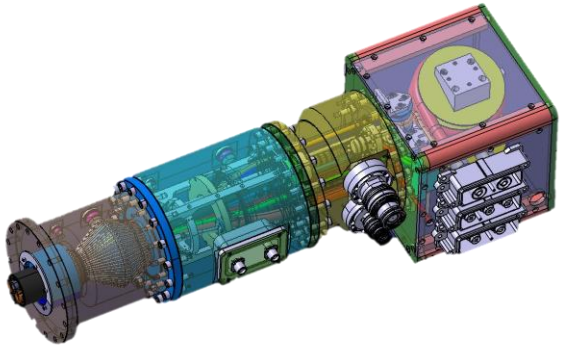

SIEMENS NX

Industrial Automation

VIDA DESIGN

We deliver turnkey automation solutions — from initial concept through mechanical and electrical design, PLC programming, robot integration, to on-site commissioning and operator training.

What We Build:

- Robotic cells (ABB, FANUC, KUKA)
- Assembly & testing stations
- Single-purpose machines
- Handling systems & grippers
- Special jigs & fixtures

Typical project scope: €50K – €120K
Delivery: 3 – 9 months

ABB ROBOTICS
FANUC ROBOTICS
KUKA KUKA ROBOTICS
SIEMENS
MITSUBISHI ELECTRIC
OMRON INDUSTRIAL AUTOMATION
BECKHOFF
B&R
FESTO
SMC
SCHUNK
KEYENCE
SICK Sensor Intelligence.

Why Work With Us

Multi-CAD Expertise

Native proficiency in Creo, CATIA, SolidWorks, NX, Inventor, and Solid Edge. We work in your CAD environment — no file conversion delays, no compatibility issues.

Turnkey Delivery

From concept through commissioning. We handle the full scope — design, build, programming, installation, and training. One partner, one responsibility, one timeline.
